Mountain Glory

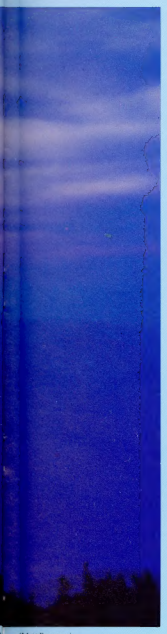
At Its Finest

by Deborah Morton



(Matt Bowman)

Mountains. In the winter, we call them treacherous, in the spring we call them beautiful; but what everyone at East Tennessee State University calls them is "home."

We have been considered a small university; with an enrollment of 10,000 we are smaller than most. However, what we lack in size, we make up for in spirit. Whether it be the spirit of athletics as we cheer our teams on, the spirit of friendships or the spirit of accomplishment, as we work toward our majors, students here give it all they've got.

The mountains seem to help us. They surround us; they lift us above all other universities. We take our glory from them.

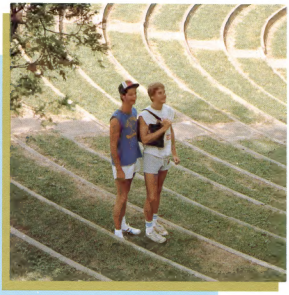
We are ETSU. We are the glory of the mountains.

(Randall Lewis)

Enjoying a slightly different view from the University Center, these ROTC cadets prepare to repel from the upper level using only ropes and nerve.

A modern day couple, Brian Kerr and Kelly Garland pose as nineteenth century college coeds during Organizational Fair Day.

(Adrienee Lopez)



A common occurrence on campus, Dane Brown and Richard Ramsey talk to pals on the ramp overlooking the amphitheater.

At Its Finest

In August, sounds of mountain silence invade our campus. Breezes whisper through the trees, cooling the summer heat, making it pleasant. The squirrels, always present, seem to suddenly outnumber the students on campus. They scamper along the sidewalks, edging closer and closer to us, until they decide that we are not worth their time and run off to sit in the trees chattering busily to one another. The birds, possibly disturbed by the squirrels, begin their singing and the flowers in front of the Culp Center bloom in their most beautiful and vibrant colors, seemingly for the enjoyment of the birds and squirrels alone, for there are few students here to see them.

Then, near the end of August, the first car door shuts as the first small trickle of students arrive on campus. The trickle, slowly at the beginning, builds within a few days to a stream of students who are coming to our mountains for their education. The sounds of mountain silence give way to sounds of suitcases being opened, friends calling out friendly hellos to one another, the sound of money changing hands in the bookstore, and eventually, of teachers calling their classes to order.

Another school year has begun.

Still, behind all our noise, the squirrels still chatter to each other, the birds still sing their songs and flowers show off their beauty for all to see.

This is mountain glory at its finest.

Parties are one aspect of student life. These bunnies served students at a fraternity party.

(Ron Campbell)

(Randall Lewis

A student pursues one of the campus squirrels around a tree trying to make friends with it.

Almost every aspect of campus life touches the Student Life. Beginning with registration, students begin a whole new way of life. New kinds of food, new roommates, new study habits, and, yes, new dates are all part of the college student's way of life.

Homecoming and All That Jazz and Miss ETSU were only two of the events sponsored by the university this year. Other activities may not have been sponsored, but were just as important. These are just a few of the experiences everyone shares. Good or bad, big or small each is unforgettable.

(Randall Lewis)

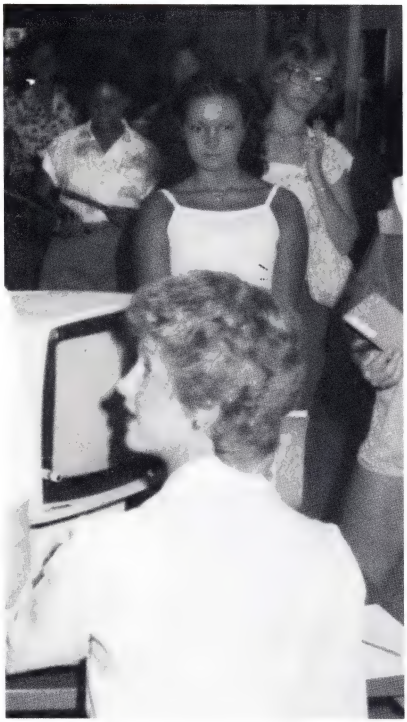
STUDENT LIFE



(Ron Campbell)
Long lines made it necessary for an auxiliary terminal to be set up in the first floor of the Burgin E. Dossett Hall.

One student waits pensively to see if the classes he wants are available. If not, alternatives are cut cards or different sections.

(Ron Campbell)

Registration Blues

By Chris Hutchins

One ordeal all students must go through at least twice a year is registration. With the new wave of computer technology, this procedure is supposed to be uncomplicated and organized.

First, you must make an appointment with your advisor, who is usually out to lunch or in a meeting. You should use them to help you decide on what classes you need to take and to get their signature. Or you can do as most students and take five physical education classes and sign your advisor's signature. It's amazing how many ways Dr. John Jones can sign his name.

Next, you must wait until your classification day and make your way down to room 106 in the Administration building and get in the long spiraling line going half-way down the hall.

Your troubles have just begun! After waiting in this line for 30 minutes and not really going anywhere, you start hearing rumors that the computer has gone down and nobody ever knows for how long.

A half hour later, the line begins to move and it's finally your turn. The tension rises as the controller punches in each number of your selected courses. You have carefully selected these courses so you could sleep in on Mondays, Wednesdays and Fridays until 4th period and still get home in time to watch your soaps. Parties are a must for Tuesday and Thursday nights, so your class load has to fit around your social life.

Rats!!! All your sections are already full so you have to take a first period class every day and classes through the middle of

(Ron Campbell)

The registration computer operators handle many people during registration, but they can still keep a smile on their face.

The registration game can be boring as shown by students waiting to check their schedules. Even with friends, the wait can be long.

(Ron Campbell)

your shows in the afternoon. If that's not bad enough, you end up with night classes on Tuesdays and Thursdays.

Quickly you think of the alternatives: getting out cards and going back through the line again, or sticking out the terrible schedule for one semester. You console yourself with the fact that a semester is only about 15 weeks long, but it doesn't help much. 8:00 in the morning is going to come awfully early in a couple of months, and 4:30 will take forever to get there in the afternoons.

When the person at the keyboard asks you if everything is the way it's supposed to be, you say a reluctant yes.

So goes the registration blues for another semester.

Writing a check to the cashier can be a hard thing for anyone to do. Each student must eventually pay their ever present semester fees.

Step two of the MAZE GAME is almost as humorous as the first step . . . You can make many new friends while waiting in line to pay your fees.

(All Photos by Matt Bowman)

It's Fee Time and Everyone Wonders

Can You Find Your Way Through the MAZE?

by Chris Hutchins

Paying fees can be as simple as writing a check and sealing an envelope for those students who pay on time and do not receive grants, loans, or scholarships. But for those of us who ignore the due date on the bill we are sent through the mail or if we are lucky enough to receive student aid, paying fees means playing the Maze Game.

First, you must find your starting position according to the first letter of your last name and whether you have received a P.E.L.L. grant, V.E.I.A. loan, or athletic scholarship. There are five or six different lanes to choose from, so be careful. If you pick the wrong one, you lose your turn and must start again.

There are also several obstacles along your path to prevent you from completing your route through the Maze. Such things as the computer going down, your schedule being purged because you are paying your fees one or two days late after your dog ate your bill, and last but not least, the dreaded lunch hour when all the cashiers and terminal operators leave even though you are next in line and have already waited for over an hour can drive you crazy.

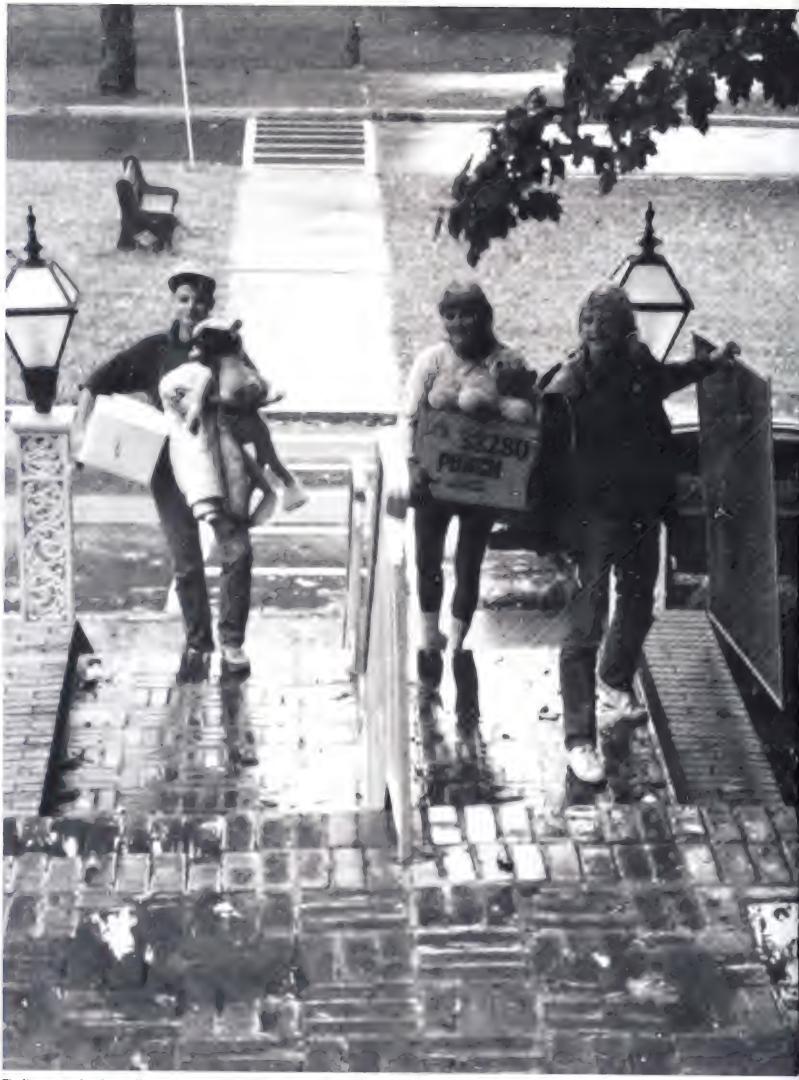
When the computer finally gives you the O.K., you receive a small sticker on the back of your sacred I.D. card and a receipt which permits you to enter the second phase of the Maze where you should receive your parking sticker.

This phase is easier because there is only one lane to choose from. The infamous Lane Ten is easily recognized because of its length. Each student, whether they drive a Mercedes or a farm tractor, must have a parking sticker.

If you overcome all the obstacles, you receive your parking sticker and the satisfaction of completing the Maze Game.

Step one of the MAZE GAME . . . Finding your fee card can be trying at even the best of times for the average student.

A student's first order of business is to attack the fee card file before writing that infamous check allowing her to go to class.



Finding room for the stuffed animals may be difficult, but new friends are always welcome in a dorm room.

Heave Ho . . .

by Chris Hutchins

The job of moving in begins at home when you have to pack 12 boxes of stuff and a two by two and one half refrigerator into your car and still have a hole to see out the back window. With everything needed for a successful year at college it's time to hit the road. Upon arrival, you must check in. This consists of getting a card which lists all the things that don't work in your room, like the electricity and the running water. After checking in you make your way down to your car and begin toting that barge and lifting that bale.

After numerous trips up three flights of stairs you decide that maybe you can do without your aquarium and eight foot snow skiis.

When everything is moved in, you look around and wonder how everything that has taken you years to accumulate is going to fit in your 12'x12' "home" for the next year. You claim your territory by making up your bed and plastering the walls with posters and pictures, hoping your roommate likes Slim Whitman as much as you.

Finally, after everything is situated, you feel kind of warm, that's probably because the air conditioning isn't working. Safe in the confines of your new dwelling, you forsee the events of the upcoming year. The only thing that seems to pose a problem is how to get everything you just moved in plus all the gadgets you will collect all through the year packed back into the same small car when moving out time comes in the spring.

(All Photos by Todd Perry)

You've Always Wanted It . . .

By Mark Williams

(Randall Lewis

Tim Jones tries to catch some sleep between his classes.

Becky Brien heads out of the dorm with her bicycle to get some exercise.

(Adrienne Lopez)

Can you imagine what people in a hundred years will think when they find out about dormitories? I mean, really folks, they're going to freak out. Think of the newspapers:

Archaeologists Discover Dormitories A small group of brazen archaeologists exploring on the planet Terra have discovered what first was thought to be part of the prison structure but later was determined to be part of the missing link of University life: Dormitories. This extinct institution was commonly a large building containing many small rooms in which students were forced to stay while not in class. As far as can be determined, these "dorms" were segregated by XX or XY chromosomes, a definite sign of deviate behavior. In these dorms students cohabitated in groups

(Randall Lewis)

LIFE ON YOUR OWN

of two or more and some even shared a common bathroom.

For each part of the dorm a responsible person was entrusted with the job of Resident Advisers. These "R.A.'s" were in charge of everything: Making sure rooms and halls were kept clean, residents followed the rules, and quiet hours were kept quiet.

Wouldn't you just love to have been around then? For the time being, back to this century.

Living in a dorm isn't all fun and games. There are a lot of heavy worries that need to be straightened out at all costs, like: "I knew I should have brought my stereo. My roommate's the pits and I won't be able to go home until this weekend. What am I going to do?" or "Why did I bring that blouse? My roommate has one just like it,

Rule Walker, Kurt Kisch and Cindy German look upon their spoils after a party.

This is a perfect example of everything having a place in a dorm room.

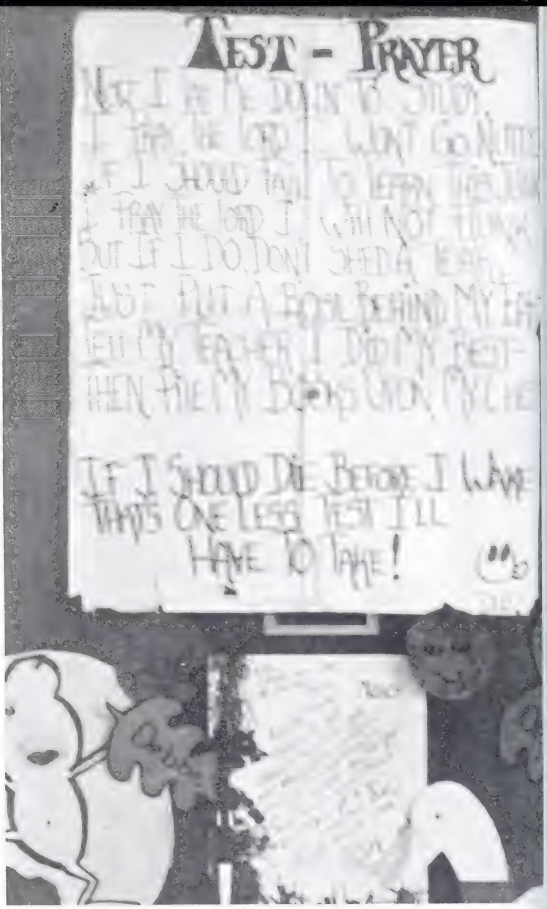
(Adrienne Lopez)

and when we wear them, we look like two-thirds of the Supremes.'' or maybe "Omagosh, I'm out of deodorant and I have a date tonight. What will she think?'' Get the point?

Another point to ponder: Your roommate. Were you assigned (stuck with?) someone who isn't a prime candidate for "Roomie of the year?" Maybe you like peace and quiet while studying for chemistry, while your roommate cranks up the stereo with Led Zepplin while studying for History of Classical Music. Maybe you will settle for a path to your bed while dear old roomie insists that the room be immaculate.

Dorm life isn't all bad though. That is, after getting over the initial shock of the room decor. Four cinder block walls, 2 beds, a desk, and maybe a sink don't compare with Biltmore House; but all is not lost. Posters come on the scene. It's time to run down to Spencer's or Fifth Avenue Card Shop (No, this is not a paid ad, folks) and buy that gorgeous hunk or buxom blonde poster, of course. There are other possibilities but I'll leave the rest to the imagination (Beer cans are always interesting.)

After the room is tastefully decorated, cans arranged and everything crammed somewhere, it's time to find anything of interest in your hall. You probably know where the bathroom is, for the times when Mother Nature makes a call — collect. Of course you can take a shower before all the hot water is gone. The snack and drink machines are around somewhere. Find them! These are godsends when it comes to the midnight munchies and you ate your last candy bar today —



(Adrienne Lopez

Leisa Paine, Stephanie Brooks and Tamara Skinnell try to gossip.

Left, this prayer is on everyone's mind at one time during the semester. Below, Jim Crum, R.A. in Ellington Dorm, takes time out to study.

(Adrienne Lopez)

(Randall Lewis)

Denise Thomas, a resident of Lucille Clement, starts to laugh at a joke the photographer made while taking her picture.

for breakfast. Last but not least, if your room doesn't have a telephone, find one. Heaven knows where civilized students would be without one. Can you imagine cancelling a date face to face?

The final concern of dorm life: Home cooking. Face it folks, it doesn't exist. One can come close by learning to cook; you can't do any worse than they do over in the student center and man cannot live by Big Macs alone. Most will realize that mistakes will be made, small ones tolerable, but when a burning quiche sets off the fire alarm, sending everyone in a mad dash to get outside, a few people might be a little perturbed.

In closing (sounds like a debate speech, doesn't it?) dorm life can be a very enjoyable experience. Just relax and feel at home, after all, it is going to be home for a long time.

Kay Danna and Linden Colley sing and dance with dancing bear Debbie Baker during rush.

Sorority rush is a time of craziness, but these girls are enjoying meeting with sorority members.

(All Photos by Larry Smith)

These sisters display their singing talent and togetherness by singing their traditional sorority song.

Karen Pope and sorority sisters enjoy performing skits for their prospective pledges during sorority rush week.

Rushing to the Greeks

By Keith Ford

Perhaps the only time during the year that members of fraternities pay attention to other men rather than to the women is during rush week.

This is the week in which the brothers take time out from the women and the refreshments to seriously discuss the Greek system and to interview prospective pledges.

During this week, each fraternity schedules parties where students seeking the Greek life can go to each fraternity house, socialize with the brothers, find out information about the fraternity, and the fraternity system.

These parties offer a chance for the prospective pledge to become more acquainted with the brothers, make new friends, and increase his chances of receiving a bid, or a formal invitation.

Rush is an ongoing thing for a fraternity to achieve their goal of getting the sharpest pledges and maintain a high standard of brotherhood.

They must continue their rush all year long. The following year they become full brothers.

(Adrienne Lopez)

Above: Girls listen to rush schedule for the upcoming week. Right: The guides during rush lead the hopeful rushees along.

RUSHING BY

By Vanessa Moore

We have succeeded once more in surviving sorority rush.

Rush is a week devoted to getting acquainted with the five national sororities on campus.

These sororities, Alpha Delta Pi, Delta Zeta, Kappa Delta, Phi Mu and Sigma Kappa, each center their respective parties around selecting those girls who seem best suited for their particular sorority.

College women who decide to journey through rush can expect a week of shattered nerves, laughter, tears, dreams, and fears.

All this in hopes of finding the right sorority for them.

The first three nights each rushee visits all five sororities. The fourth night they can attend three theme parties. Finally, rushees attend three preference parties which are designed to finalize the rushees' choice as to which sorority they will pledge.

(Adrienne Lopez)

(Larry Smith)

Sorority rush has been called frantic and hysterical at times, but it is a great way to meet people and make new and lasting friends.

Those young women who chose to go through Rush and the Greek life while at school, never seem to regret it.

During Homecoming week, they have the chance to get back together and reminisce about the old days even though they may not have been so long ago.

Left: Robin Rogers and Lisa Hester listen to a sorority sister during a skit. Below: rushees sit and chat with Delta Zeta members.

(Tom Mullen)

When Hunger Strikes

By Tom Kirkland

Food is a wonderful thing. It gives us strength and health, and by middle age it usually gives us a gut as well. I have prepared myself for such and don't want to be disappointed.

Students who dine here this year really have no cause to be disappointed either. The food service we have now receives fewer complaints than the last few we've had. Not only that, there is a lot less guess work in the consumption business.

By guess work, I mean guessing what really went into that stuff on your plate. Personally, I never found it appetizing to have to dissect everything before it is injested. Takes away from the fun, you know?

The food service now provides something for everyone. For a hot plate lunch, a student can go to the third floor of the D. P. Culp Center and enjoy a variety of buffet items at the Main Meal. On the other side of the wall you have your choice of soups, salads, and sandwiches at the Lite Bite.

Bennigan's has recently become a very popular place to go with friends. They serve food, drinks, and fun.

On the second deck, fast food is the order of the day. At the Eat and Run, one can enjoy hamburgers, chicken, or breakfast items. The student can have it ready and eaten before the Biology final.

The Cave, located on the first floor of the Culp Center, is the place to go if you have the time to eat and socialize with your friends. All sorts of delicatessen goodies are there just for the asking. There is a juke-box and television down there for your enjoyment.

Burger King: The home of the "Whopper" and a quick lunch for a lot of students here at East Tennessee State.

Of course, the students are not confined to the University. The more adventurous souls may venture out to the local eating establishments and begin the expansion of their true selves. Funny how all that eating can get the best of you.

Former students may not recognize the quality of the food that has recently surfaced in our institutional food. Many would still probably look askance at an Eat and Run hamburger. After all, old lessons are hard to unlearn.

(All Photos by Matt Bowman)

Above, the firehouse Bar-B-Q is the place to go for great food. Below, Long John Silver's has served many a student at noon.

Hardee's is the place to go for the Big Deluxe and other good food.

Maybe increasing the quality of food has taken some of the mystery out of getting an education. Then again, maybe some of us can do without those kind of mysteries.

The eating establishments off campus can be discussed in depth if you have the time.

For pizza people there are many choices. You can go to Pizza Hut, Greg's, or even Little Ceaser's. But once you get a pizza, make sure you have enough Certs handy to make your breath kissing sweet.

For a deli treat, there are numerous places. The Woodstone Deli is a popular place with good sandwiches and beer if you want. The Sub-Station II is located on North Roan next to Bennigan's, and Poor Richard's Deli which is close to campus and not that expensive.

For the traditional hamburger people, the choices are almost endless. Burger King, Wendy's, McDonald's, and Hardee's are just a few of the hamburger places to go during lunch time. Jimmy Buffett had the right idea when he wrote "Cheese Burger in Paradise."

Of course for the discriminating college student (who has the money to be discriminating?) there are some really nice restaurants around town. Red Lobster, Bennigan's, and Augustino's are a few places where you can go, sit down, be served, and enjoy a meal with someone you care about.

The choices are practically endless when you are talking about food in Johnson City. I only wish there were more places to list in this story.

Above, The Woodstone Deli on Market Street provides a complete selection of sandwiches, drinks and good times. They have been around for about a year and a half, providing students with a place to eat and drink.

Right, the Eat and Run on campus gives the student a place to go for a quick lunch or dinner. They serve a variety of sandwiches and breakfast treats.

Below, Pepper's, located next to the Mall, gives us sandwiches (a staple for students) hot dogs, and pizza at a reasonable price. These restaurants are all located near the campus and give the student a good reason to take themselves and someone else out for a good meal.

NIGHTLY TREKS

By Lin Ruys

The night life — ah yes. It's what every student yearns for — especially on those *long* (and I do mean long) Friday nights.

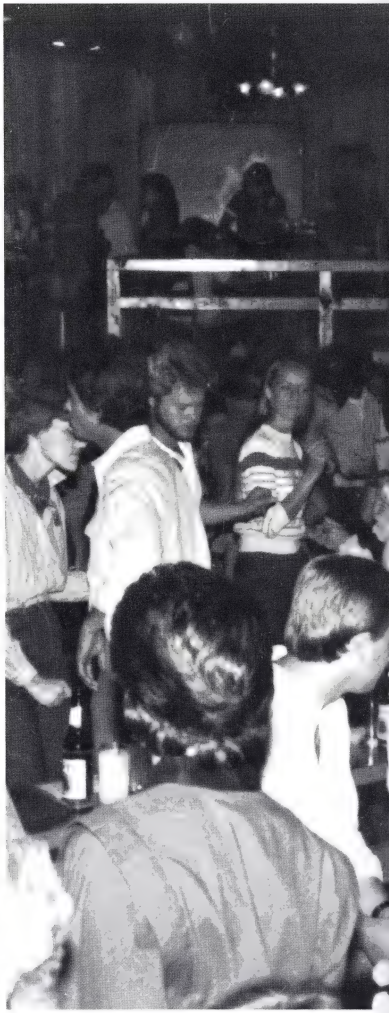
Johnson City, Kingsport, and Bristol, better known as the Tri-Cities, is a budding metropolis full of surprises waiting to be uncovered by the bored, unsuspecting college student. These consists of numerous night clubs, and awesome auditorium or two, fine food and delightful dancing. Please excuse the descriptions, but trust me — they're appropriate.

The night club circuit is something that has to be experienced during your stay at school. The Seahorse Club, Gomez and Garcia's, Richard A's, Poor Richard's Deli, The Ambassador, and others are examples of the never ending party opportunities which lie before you.

Sometimes, some of us are lucky enough to see a few concerts throughout the long year. Freedom Hall in Johnson City or Viking Hall in Bristol are the best bet. But there are always a few ambitious people who'll get a road trip organized and set off for Knoxville, Greenville, or possibly, Atlanta. Concerts are definitely in the top five of the night life activities.

Food. Everyone needs it. Everyone wants it; but, not everyone can afford it. There are those chosen few though who always seem to eat out (i.e. off campus — not the Main Meal, Eat & Run, or Cave food) at places like Bennigan's, Bonanza, or even, Red Lobster.

Sig Ep's know how to keep the night life jumping with parties, social functions, and general get-togethers for everyone.



It's another Thursday night and everyone puts the books away and gets out of the dorm for some dancing and good times.

(All Photos By Terry Rowell)

The E.I. is a popular hangout for everybody on Thursday nights.

The Seahorse has been a place to meet people and have fun.

After a week's worth of studies it's time to get out and visit.

The Toga Party. First introduced in "National Lampoon's Animal House" by the immortal John Belushi; a tradition lives on.

Two wild and crazy guys out looking for some fun at the Seahorse; the drinks, people, and good times make it worth their wild.

The mural on the wall of the Seahorse has caught the attention of many passersby.

(All Photos by Terry Rowell)

These restaurants, bless their hearts, usually have good food and give the student a break from everyday food.

After drinking, eating, and concert going, you won't have a complete evening until you stop and dance awhile. Two-stepping and good dance music is available at most places close to campus. What ever you do — plan on spending some money. Whether you're a couple of girls on the loose or a few guys out to party, nothing's free these days.

When you begin counting up your funds for your party efforts — you discover that there just isn't enough for a party this week and food next week. You then resort to a quick phone call to Mom and Dad, explaining to them that textbook expenses were unbelievable this semester. Money problems solved (temporarily), you plan your night life.

Go for it!!! You only (hopefully) go through college life once — why not make it the best time of your life!!

WILBUR: B.S.O.C.

By Ted Cogdell

You can't help but to love them. One frolicking around our campus is enough to catch your eye as you walk to class. Wilbur is one such squirrel.

The competition for B.S.O.C. was stiff this year with a lot of entries. Wilbur Q. Squirrel was chosen on the basis of his social and community work with underprivileged squirrels, his uncanny ability to jump the creek, and finally his secured stock of nuts for the winter.

Other squirrels like Wilbur are pretty funny. They pop out from under bushes and dart from trees when you least expect them. They can make you look over your shoulder as to say, "what was that?" Sometimes you can hear the little rascals, but do not see them because they are under the leaves doing whatever it is they do. Every once in a while you see the little rodents chasing each other around the trunk of a tree.

Occasionally, you might get a beady eyed look from one of them as if they were saying, "What are you doing walking across my playground?" For our campus squirrels this is their playground as well as their home.

Did you ever wonder what squirrels think of us humans? I think the poor little creatures are confused. I certainly would be if one day a human threw me some bread for my tummy when the next day threw a stone to try to break my little bones!!!

Of course Wilbur doesn't have that kind of problem, being B.S.O.C. and all.

Wilbur Q. Squirrel goes for his morning constitutional.

(Terry Rowell)

(Terry Rowell)

(Randall Lewis)

There are always a lot of squirrels going for the crown. Of course the squirrels from the V.A. are allowed to enter, but a hometown squirrel almost always wins the title. Last year it was won by Alexander P. Squirrel who hails from above the Ampitheatre.

Mr. Squirrel won by daring to kiss a freshman co-ed while she was studying on a park bench by Gilbreath Hall. His daring act caused the second place contender, who incidentally was from the V.A., to forfeit the race for the title.

Ever since then the B.S.O.C. title has remained here at school where it rightfully should be.

After you consider what life on campus would be like without the loveable, everpresent squirrels it makes you want to support the home-town favorite everytime.

Above, Wilbur poses for the photographer who catches his eye. Left, Mr. Squirrel caught in the act of eating a nut.

(Terry Rowell)

Wilbur warms up before jogging.

(Debbie Morton)

Married and graduate student housing is located on the southeast side of the campus.

'Till Death Do Us Part

By Lin Ruys

Well, you've met your match while you're here, and your wife or husband to be has made your life at school complete.

When you begin to consider the life you'll lead at the Enchanted Kingdom (known to some as school) you begin to worry about things such as money and living quarters.

Money these days, isn't the easiest commodity to acquire. For the married student a lot of things come into play when the subject of a "family budget" comes up.

Food, for one thing, costs more for two than one. When you or your spouse goes shopping coupons will be important. Also, comparing prices at the various grocery stores will become a way of life.

If both people are in school, tuition can be rough. Books are a big chunk of the budget twice a year along with other supplies.

Once the money situation is fairly under control, you still face the unbelievable housing situation. There is always a problem with this on or off the campus.

Although some might connect the two, (money and housing), they are sometimes separate.

Housing is provided for married students on the southeast side of the campus. The apartments are convenient to everything on campus as well as the outside world. The rent is modest when you compare it to prices elsewhere.

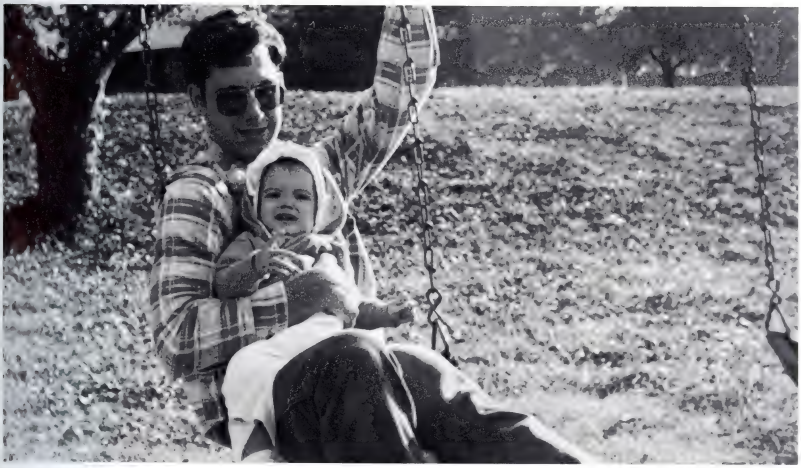
Although married life can be fun (for obvious reasons) at times, there are drawbacks.

To really make things work out easily, one or both of you have to get a job. Times are tough at the job market so you have to take what you can get.

Jobs on campus are scarce unless you've got connections. Off campus, the job will probably end up being part-time. It won't be easy getting by on that kind of money, but you'll make it somehow.

Darwin had something when he came up with the survival of the fittest. Being on your own with someone you love is the main advantage to the whole situation.

The disadvantages obviously outweigh the advantages, but if you're the one planning to go through thick and thin, rich and poor, and the rest of the marriage nuptials soon, marriage and school might not be your cup of tea, but if you try, things will somehow always work out.



(Lin Ruys)

Jonathon Mahler and his daughter Jen ride a swing on a warm autumn day.

FAR FROM HOME

by Tom Mullen

For many students, the trip home on Friday afternoon is a weekly ritual, broken only by very special circumstances such as Homecoming. But some students can't go home, as their homes are too far away and embroiled in life-threating conflict.

Such is the case for many of our foreign students, especially Roxanna Sepahi, from Tehran, Iran, and Ramzi Zakharia, who hails from Beruit, Lebanon.

Roxanna came to the United States in June of 1981, as conflict heated up in her native land.

"I came here to finish school because all the universities were closed because of the fighting," she said. She chose here on recommendation of an older sister who was going here at the time.

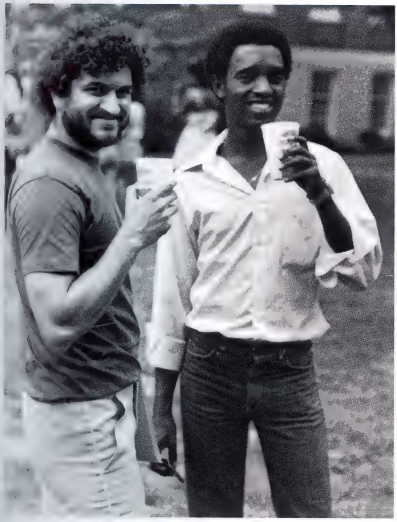
Roxanna, a B.S. nursing major, said she would consider going back to Iran, as her parents are there, but definitely not until things got a lot better.

(Adrienne Lo

Right, Lisa Tilson and Kooros Sotudeh laugh at the conversation during the Spanish Club dinner in November.

Mario Cangas, enjoying the recent dinner, smiles for the photographer, Adrienne Lopez.

(Adrienne Lo



(Kathy Covington)

(Adrienne Lopez)

War also played a major part in Ramzi's decision to come to this country. "You can't study over there (Lebanon). All of the schools are closed and we didn't know when or if they'd reopen," he said.

Along with his family, Ramzi left Beruit "about two or three months ago, before things really got bad."

The family moved to West Virginia a move that is somewhat funny to Ramzi and some of his friends back home.

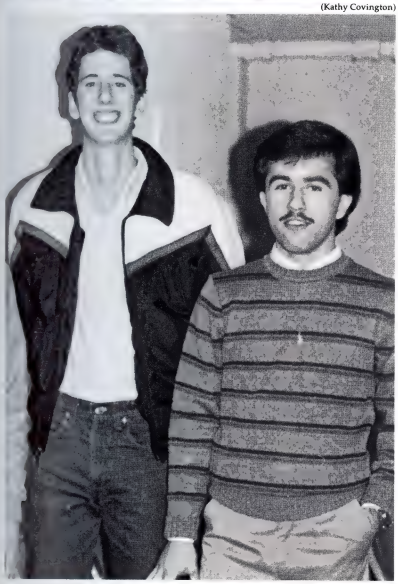
"They say stuff like, 'Almost heaven, West Virginia, and things like that. It's a pretty big change from what I'm used to, but I like it very much," he said.

A freshman broadcasting major, Ramzi came here after looking through catalogs and getting information from other Lebanese students.

"I was going to Concord College in West Virginia, but they didn't have my major," he said, adding "I'm quite happy here."

Like Roxanna, Ramzi said he would gladly return to his homeland someday, but not with the situation like it is now.

"If things, the fighting, etc., get better, I'll go back. I miss Beruit, but certainly not the war," he said.



(Adrienne Lopez)

Above, left; Ramzi Zakharis and a friend get something to drink during the Organizational Fair this fall.

Above, two friends in the Spanish club get together off campus for some laughs and fun.

Left, James Dosher and Kooros Sotudeh are caught by the photographer at the recent Spanish Club dinner.

Learning Where You Work

By Vanessa Moore

While many students anxiously await a check from mom and dad, others wait for their paychecks.

This growing number of student workers are not only gaining wages for their hours, but valuable experiences and contacts for future jobs as well.

Many student workers not only work at fast-food restaurants; some hold responsible, sometimes critical jobs.

One such critical job is that of a Radiological Technology student. These students work alongside area doctors in performing vital radiologic studies as well as working in surgery and emergency rooms of local hospitals.

Another student worker, who seems to be more of a worker than a student, is Deborah Morton. Deborah is a senior public relations major from Elizabethton. She works 31 hours a week combining her two jobs. She is Editor-in-Chief of the 1984 Buccaneer. That alone is a 20 hour a week job.

She also works at J. C. Penney's in Elizabethton approximately 11 hours a week. The money she earns helps out in paying for tuition and gas, she has to get to work somehow!

(Matt Bowman)

Ron Campbell, head photographer for both campus publications, is caught in the act of what he does best.

(Randall Lewis)

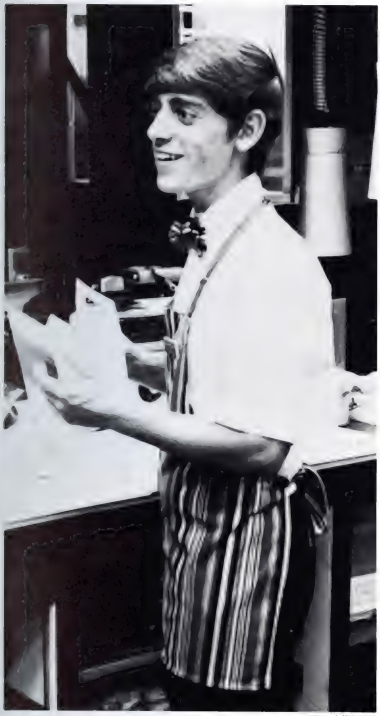
Rick Kemper, sports editor, is busy typing and getting ready for an imminent deadline.

Deborah has made a lot of friends from her jobs as well as occasional dates. Although she states that her schoolwork suffers some, the money helps make up for that.

All students interviewed seemed to enjoy their "mini-careers." Juggling work, classes and a social life can be hectic, but all-in-all these students are the better for it.

(Ron Campbell)

Matt Bowman takes time out from his two jobs for some pinball.



(Randall Lewis)

Juan Ascoli, at Chick-Fil-A, is busy on a weekend night; he prepares a sandwich here.

(Matt Bowman)

Terry Rowell, a staff photographer, is leaning against the wall.

There are a lot of student workers on campus. They come from all walks of life and all of the students can certainly use the extra money.

Speaking as a student worker, I can honestly say that the job I do makes me feel wanted (or at least needed) from time to time.

As stated earlier, responsible jobs are held by students; Medical Lab Technology students all the way to a worker in the intramural office.

Everyone who has a job on or off campus certainly plays an important role in the area's economy. The student population of 10,000+ effects the city in a mostly positive way.

The students are always eager to work for a little extra spending money and the friendships that undoubtedly come from working with someone day in and day out.

When you're working for a living, it also tends to make life easier on your mom and dad's finances. It isn't as tough if there are two imputs instead of one.

Learning and working in the same place does have its advantages and disadvantages. If you have a big test to study for or a term paper due the next day, your employer is bound to be more understanding than one off the campus.

Of course nothing is perfect these days; sometimes it seems you just can't get away from everything . . . you live where you work!

(Randall Lewis)

Juan Ascoli is seen at work, Chik-Fil-A in the Johnson City Mall. He's a computer science major and originally from South America.

(Lin Ruys)

John Brooks, a mini-mart clerk, is also a student here. He enjoys his work as well as his studies.

Greg Walters, assistant editor of the Buccaneer, makes an appointment over the phone.

(Adrienne Lopez)

(Matt Bowman)

Lin Ruys, leans over the copy desk in the Buccaneer office. She enjoys her job and hopes to graduate soon.

A lot of students have worked here or off campus since their freshman year. They seem to enjoy it, or they wouldn't be doing it year after year after year . . .!

Getting a job on campus can be more complicated than some people think. A lot of times it's being at the right place at the right time.

Applications are taken for all positions and you're put through an interview like any other job. Unfortunately, most of the time it's who gets there first.

In the fall when students are coming in for the start of a new school year, chances are that they already have a job waiting for them if they want it. Spring is the time of the year for getting a job for the following fall.

If nothing else getting a job while you're away from home is great experience. It teaches you to stick up for yourself and also give you a taste of how the real world can be.

(Lin Ruys)

Above, Cindy Graceffo leans on the post outside Red Lobster before going into work.

(Randall Lewis)

Left, folding pants for a customer at Sears is a fact of life for Dwight Harrell.

Betty Smith, director of the Commuting Students Center, takes a break during her hectic day. She started the center last Spring.

The Commuter Center

By Leesa Thacker

"Would you believe I had a car accident?" "I'm late because it took me 20 minutes to find a parking place." "No way was I driving in that snow storm!"

These are some of the excuses often heard by professors from the students we call "commuters." A cummuter is someone who lives off campus and drives themselves or uses public transportation to get here.

Approximately two-thirds of the university's student body commute. However, not all of them ride in the same manner. Of course, you have some riding in car pools, others taking the bus and in certain cases a taxi may drop someone off.

The university has a few extraordinary commuters to speak of. A student from Kingsport hitch-hikes every day. He feels that is a good way to meet new people. Another student commutes 60 miles up and 60 miles back on a motorcycle; nobody said you had to commute in a car!

"Those who live in a dorm don't know how easy they have it," said Lance Stewart, a commuter. "I have to get up a lot earlier to get to class and I get home a lot later than if I had a room on campus."

Complain and complain, is that all commuters do? No, of course not. There are many who have legitimate grievances. Furthermore, most students consider it a plus to live off campus where they have their own privacy and space.

The Commuting Student Service Center in the D.P. Culp Center is another plus for the "commuter world." The center was started the Spring semester of 1983 by Betty Smith.

Commuters can go there and sit in the lounge, drink coffee and use the center's microwave oven. Moreover, there are weekly lunch-bag seminars given every Wednesday in the lounge for commuters as well as anyone else who is interested.

As you can see, commuting is not a piece of cake but over 6,000 students do it despite the continuing obstacles. Besides, since when is something work having (i.e. a college education) easy!

The commuter student is definitely a special breed of person. To get up every morning and battle traffic and leave every afternoon knowing you face the same task, is more than some of us could handle day in and day out.

The map in the Commuting Center shows all the surrounding counties.

Ted Keesee, a commuting student, sits at the desk in the Center. He is usually extremely busy with commuting students.

(All Photos by Matt Bowman)

The Lunch Bag Seminar for commuters is held every Wednesday afternoon.

A COMMUTER'S DAY

By Lin Ruys

Mon. Morn —

Get up *slowly!* Sunday night parties are definitely out from now on. Oh gosh. Sunshine. This wasn't in the contract I signed when I was a freshman. Crap. The floor in the bathroom is disgustingly cold again. Shower: to-shave or not to shave, that is the question. Time for clothes. Why didn't I drop out in high school? Or rats. Class starts in 15 mins. and I'm 20 minutes from school and there *won't* be any parking places. Why don't I live on campus? Got to hurry or cut class. Jump in the car and pray there's enough gas to get there. Great. The Transit System had the same idea — only slower, slower.

Mon. Night —

Thank God. I made it through another day. Now. Where did I park? Why didn't I leave my car at home and walk? Crap. Please tell me that piece of paper on my windshield isn't a ticket. Wouldn't you know it. I know I should have limped when I parked in handicapped. What? Did everybody have the same idea? Let's all leave at once and cause a traffic jam!! Yea!! Gas. I forgot. Buc Plaza — do they deliver — gas?! No, I can make it. I'm tough. But is my car? I think Monday will be about seven days long this week. Who gave that guy a license? Please God. Get me home in one piece and I'll give up drinking or sex (choose only one) for the rest of my life!! Drive away. Front door. Home, once more. Tomorrow's another day.

(Matt Bowman)

The card rack in the commuting students center is handy for commuters and visitors to the campus.

Parking is always a problem for commuters. They will park everywhere — even between the trees!!!

(Matt Bowman)

(Ron Campbell)

(Matt Bowman)

A day in a commuter's life is a hectic one. The opposite page shows that. Their day starts early, but rarely ends that way. A commuter should trade places with an on campus student at least once during their college career; then everyone would know how it feels to be a commuting student. When you have to park a mile from class and get out of bed two hours early, you don't have a lot of sympathy for the on campus students who miss their class because they over-slept.

Above, parking lots are in demand this and every year. Left, There's always a line of traffic around school. Below, Here motorcycle parking has always been a problem on campus. You park where you can.

(Debbie Morton)

FACE-LIFT FOR BROWN

By Lin Ruys

The renovation of Brown Hall on the east side of the campus has been an interesting development over the last couple of months.

The renovation came because of the age and condition of the building. Everybody has been in Brown Hall at one time. The building is located across the street from Old Gilbreath Hall.

The other day a friend and I took a walk across the campus to see what all the fuss was about. While over there we took a few pictures for the Buccaneer. We decided that the construction was probably needed, but still one heck of an inconvenience.

For commuters as well as on campus students, the traffic situation is bad enough without the help of a HUGE construction crane in the middle of Alexander Drive!

The students and faculty have been understanding and cooperative throughout the construction project. We keep saying to ourselves that the administration is doing this for us.

You'll have to admit Brown isn't the only building on campus which could use a face-lift.

The front steps of Brown Hall will never be the same after the renovation is completed. It's a mess, but worth it.

(Debbie Morton)

(Debbie Morton)

At sunset, the renovation takes on a different light. The lifts to the roof are silhouetted in a November sunset.

Above, a trailor sits alone in front of Brown Hall. Adam's Electric Co. is a local business.

(Ron Campbell)
A wheel barrel can really be useful during construction projects. A workman is seen dumping garbage out of his.

(Lin Ruys)
Below, the dumpster is the only safe place to hide during the renovation of Brown Hall.

(Debbie Morton)

(Debbie Morton)
The sign on the crane says it's a wide load, and you had better believe it!!! Roads might get blocked during the renovation.

Some of the dormitories on campus are certainly prime candidates for the somewhat major surgery. But who's complaining?

Brown Hall is the building in which most science classes met. During the construction the classes have been meeting in other places like Gilbreath Hall and the English building, Burleson Hall.

The students have been really understanding and obliging during the construction project. Besides the obvious inconvenience of traffic and getting from one side of the campus to the other, not much has changed . . . except the look of Brown Hall. To some students the construction has just been one of those things. To this student, the project has been interesting to watch, nothing else.

When you were young didn't you ever like to see construction sights and how the changes seemed to happen so quickly?

Well hopefully this one will follow suit.

(Lin Ruys)

Saint John's Episcopal Church is located on South Roan Street in Johnson City.

(Adrienne Lopez)

The Catholic and Episcopal University House is pictured here on Locust Street.

Looking For Answers

By Lin Ruys

When classes become too hectic, friends get too rowdy and a sense of needing to belong sets in, where do you go?

For some of the students here, that place is the church. Our campus is lucky; students from many different faiths have special groups which they can worship with. Among these are the Campus Crusade for Christ, the Catholic Student Center, the Christian Student Fellowship and the Baptist Student Union.

The Campus Crusade for Christ or the C.C.C. is one of the fastest growing fellowships on campus. It is inter-denominational so everyone is always welcome. Earl Chute! a staff leader, is responsible for five staff members as well as those involved in C.C.C.

During spring break, the group travels to Daytona Beach for "operation Son-Shine." This involves spreading the word of God to others. The group meets every Tuesday night at 7:00 p.m.

Several of the crusaders are involved in on-campus action groups and witnessing. Bible classes are also available for those interested.

Christian Student Fellowship, or CSF, is located on W. Pine St. at the "Campus House."

The First Christian Church on University Parkway is convenient to the campus and the surrounding community.

(Adrienne Lopez)

CFS sponsors retreats, guest speakers and performers. Dean Mathis, leader, is also the campus minister. The group meets every Wednesday night at 6:00 p.m. for a meal and fellowship.

The Catholic Student Center is for those Catholic students who need a place or friends to worship with.

Tom Mullen, president, said that the group sponsors retreats for members and those interested. They meet every Sunday at 10:30 in the morning and every Thursday at 5:30 p.m. in the ampitheatre located in the F. P. Culp Center.

The Baptist Student Union, of the B.S.U., meets every Monday and Wednesday at 12:15 p.m. and Tuesday at 5:00 p.m. Fred Witty is the leader of the group.

They sponsor a Bible study group, a drama group and the Horizon Singers. They are also involved with a missionary service and overseas visits.

The group sonsors regional and state retreats along with conventions and conferences.

Lelia Ward is the president, Dan Perry, vice-president; Faye Chittenden, Kings Hour Chairperson; and Lori Volkman, Noon Day Chairperson.

Of course these are not the only religious organizations on campus. There are more located on or near the campus with representatives who are easily reached.

(Lin Ruys)

C.F.S., or Christian Student Fellowship, is there for the students who want or need it.

(Adrienne Lopez)

University Parkway Baptist Church is located near campus and town.

The B.S.U., or Baptist Student Union, is the meeting place for those students who are involved with the Baptist faith.

(Ron Campbell)

Working in the cafeteria is one way to earn the money needed for college tuition. Pictured is one person who makes our daily meals.

STUDENTS WHO TOIL SAY . . .

WE WORK HARD FOR THE MONEY!

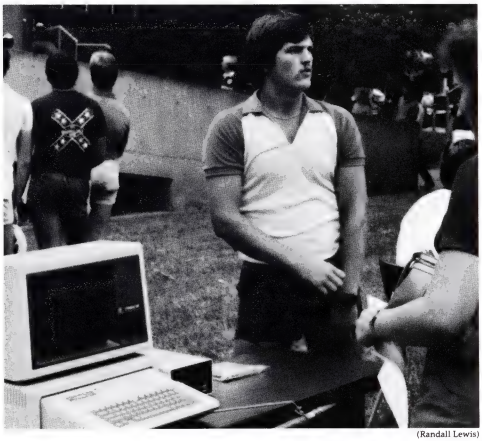
By Lin Ruys

(Matt Bowman)

(Randall Lewis)

Below Left, Scott Snell and an associate work together on scenery:

Left, Billy Ballard sells televisions part time at Sears in the Mall.



(Randall Lewis)

Allen Haulsey tells a few people about computers at the Organizational Fair.

Most students at one time or another will have to get a job during their scholastic career.

To many, those who can't get jobs on campus, this means going to restaurants and retail stores around the Tri-Cities area and selling their abilities to prospective employers.

A lot of these establishments take to heart the fact that you're a starving student working only to survive in a rough and demanding world; but then there are others who already have more than enough employees and wouldn't really want to hire someone who only wants to work Monday through Thursday between the hours of 4 and 7:30 p.m., with Friday, Saturday and Sunday off.

For those lucky enough to find jobs (on or off campus) the concept of a social life will go down the drain. If I could have a quarter for every time I couldn't go out with my friends, I could retire.

Working for a living does have its advantages though. The friendships that are made are something special; you all work as a team toward one goal and special bonds are formed.

The group you affectionately call your co-workers, are mostly in the same boat as you, so they will understand your situation and try to help you. When Homecoming comes around or there's a long weekend at school, you'll have to get the jump on the rest of the store in order to get the time off, but let it be a challenge and it won't seem so bad.

(Ron Campbell)

The Greenwood Band from Indiana shows up with a strong drum line. They presented themselves well during the festival.

Ben Davis High School shows a good formation including flag and rifle corps.

(Ron Campbell)

WE HAD THE BEAT

by Lin Ruys

The National Band Festival was held for the last time this year in the Mini-Dome. Bands from all over the country ventured to East Tennessee for this competition.

Emotions ran high during this weekend. It's considered to be the ultimate contest for high school marching bands. They were judged on everything from shoes to the entire band formation.

If you were to ask any band member who has competed in this or any other contest, they'll tell you that competing in such a festival has long lasting ramifications.

They'll always remember the time they hit a wrong note or went one step too far in a huge formation. But not to worry, only thousands of people saw them and they'll never do the same thing again, so call it a learning experience and go on from there.

Hopefully the competition taught them to give everything they've got to things that are important. All the band members went through the same things during competition and became close friends, and after the festival was over, they looked back and remembered all the good times and all the bad; but chances are the good times overcame the bad ones.

(Ron Campbell)

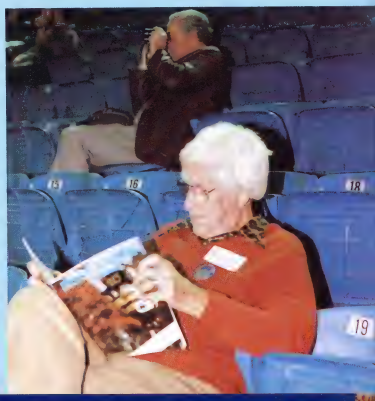
A lone horn sits by itself on the sidelines. The life of a marching horn isn't a pretty one . . . getting dropped or used and abused isn't fun.

(Matt Bowm...

Above, the Student Government Association's banner says it all. Below Left, parachutists land near Carter Hall during Homecoming activities. Below right, a fan prepares for Homecoming excitement.

(Doug Hilliard)

(Matt Bowman



ALL THAT JAZZ. . . HOMECOMING

They were all here.

The spirit, the pride and the emotions.

1983 . . . All That Jazz.

Homecoming this year was a tremendous success. The floats, music and football game seemed almost whimsical.

The theme, which was depicted with beautiful floats, included music and papier mache designs.

(Matt Bowman)

(Doug Hilliard)

The people who were responsible for all the activities this year really could be given credit by saying "thanks" to the student body and the community.

Without everyone pulling together, it's doubtful that everything could of happened so smoothly.

During homecoming week, alumni return to their alma mater and cheer on the home team and catch up with sorority sisters, fraternity brothers and old roommates.

People don't forget four years of their life, so they "come home" for a weekend and catch up with all their relationships which were put on hold after graduation.

But after the parties are over and the banners come down, the memories of another homecoming celebration will begin to live on with all the others.

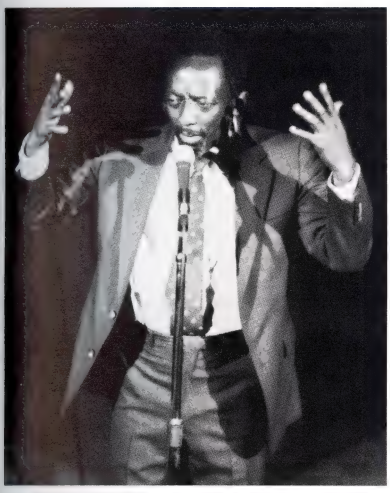
Left, Dana Banks, homecoming queen, after she's crowned. Below Left, ADPi's float catches a few eyes. Below, Pepper's got a pal.

(Matt Bowman)

A few members of the float committee catch some z's during the process of the float building.

Dana Banks, 1983 Homecoming Queen, seems to be happy after being crowned during the halftime ceremonies.

Above, fireworks make an exciting night sky behind Lucille Clement Hall. Right, some old and new cheerleaders get the crowd riled up!



On October 14, a former Saturday Night Live performer came to our campus. To say the least, he didn't leave without making an impression.

His performance was one which will be remembered for some time.

The show began well enough, but went downhill quickly. Because of some of the material in his act, Mr. Garrett Morris was asked by President Beller to tone down the show.

In the audience that night were some members of the 1000 Club. It came to President Beller's attention that some of the members were offended by the contents of Mr. Morris' act.

President Beller went backstage during an intermission and proceeded to ask Morris to change some of his act, because a few members of the audience were leaving because of the material.

Being the gentleman he is, Morris obliged. The show was considerably shorter than originally planned, and those who went to see the Garrett Morris we all know were disappointed.

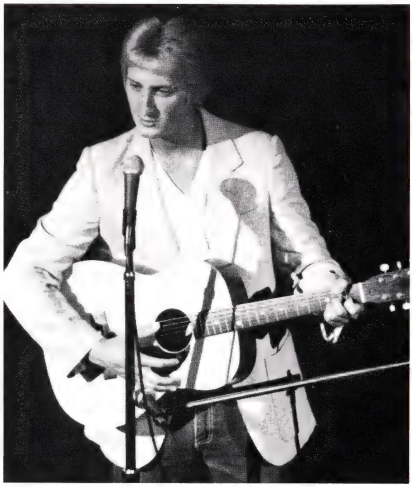
A former writer for Saturday Night Live gave a wonderfully funny performance during Homecoming week.

Andy Andrews, who has written for such people as John Belushi and Dan Akroyd, talked to those who attended about life as a college student.

His performance was during the week of sorority and fraternity skit competition, so most of the audience was able to relate to what Andrews was saying.

The man is funny; no doubt about it.

Hopefully he will be back again next year to give us something to laugh at . . . ourselves!



All Photos by Ron Campbell)

The Organizational Fair during Homecoming week allowed feelings to be vented.

The floats around campus made the week a lot more cheerful and exciting. Walking to class became an experience rather than a task.

The Organizational Day Fair made a lot of people work for their fun. Egg throwing contests, fireworks and fun made the week seem to fly by. All the excitement of the upcoming football game could be felt throughout the campus.

Winning the game made us feel as though our efforts had paid off.

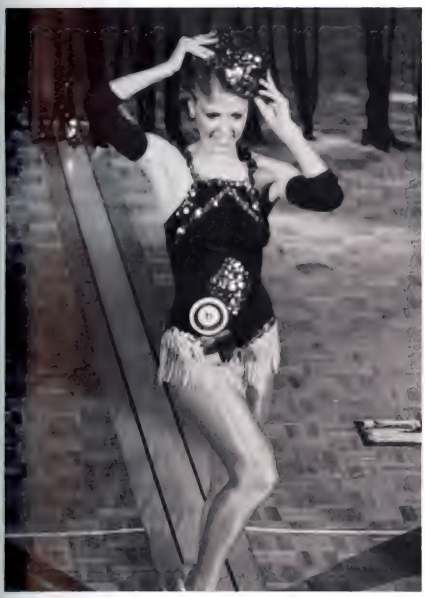
The Phi Sigs float in front of Lucille Clement was colorful as well as musical.

Fireworks above the Buccaneer Court made Homecoming spectacular.

The Sigma Kappa float next to Luntsford Apartments. shows Pepper kicking the ball.

Linda Basham, a competitor in the Miss ETSU, pageant, dances to the music during the talent portion of the show.

Susan Chinouth and a little friend give Hope Boone a big hug.



Elizabeth Hudson, a Miss ETSU competitor, does a song and a dance for the talent portion of the pageant.

CROWNING TOUCH

By Lin Ruys

Miss ETSU, Hope Boone, is an 18-year old from Elizabethton.

Hope is a pre-medicine major and hopes to be a physician's assistant. Snow skiing, singing and jogging are some of her hobbies.

She has to devote a lot of time to school, but as she says, "I'm sure it will all fall into place."

The competition this year was stiff. The first runner-up, Karen Cunningham was chosen as Miss Congeniality. She sang "Rise Again" in the talent portion of the pageant.

Robin Hunt, 19, a Limestone resident, was chosen as second runner-up and sang "Time and Again."

(All photos by Ron Campbell)

The ten competitors in the Miss ETSU Pageant line up for the audience's approval.

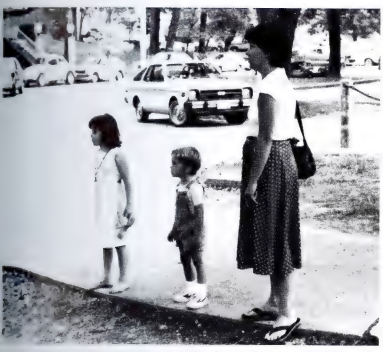
MISS ETSU 1984

HOPE BOONE

Family Day, on October 1 was a success as seen here by the crowd going up the ramp of the D. P. Culp Center.



A mother and her children watch some activities during Family Day on campus.

The fall trees make a scenic shot at the Culp Center during Family Day activities.

FAMILY DAY 1983

by David Cook

On October 1, 1983, ETSU held the first annual Family Day. The families of students and faculty were invited to an "open house" on campus. There were planned activities for those who participated.

President Beller, who seemed excited about the event, spoke at the Welcoming Ceremonies.

To say the least, the visiting families of students were kept busy by the welcoming ceremonies, a football game and the Jazz Singers concert.

For students, the act of the parents coming to them instead of them going home was a great change of pace.

Although the change was welcome, it meant being available for your family instead of your friends and probably a major clean-up job on your room.

As usual, the students were helpful and happy to direct any lost parents to their correct destinations.

When you're on campus all the time, you take it for granted. Visitors see it as a confusing maze of buildings and acreage that they need to be led, or at least directed through. Patience paid off in the end, as everyone got to where they were headed, or were found along the way.

All in all, the day was a tremendous success and will become a regular part of the year's activities in the future.

I'M BUSY TONIGHT

By Tom Kirkland

I guess the first thing I thought when I was asked to write about dating was, why? Why worry about dating when you can wander through the Culp Center and get attacked?

The first date I had out here was a blind one. This Frat Rat set me up with one of his "brothers." If I had a brother that looked like this one, I wouldn't let him out of the house, much less out on a date with somebody I knew.

Anyway, the guy shows up and turns out to be a real pizza face. I think it was the same guy who wrote the male point of view article on dating. I just couldn't do it, going out with this guy would ruin what little reputation I have. So I told him as nicely as possible to get out of my face. Some girls can do that without even batting an eye, but I have yet to develop the knack.

(Adrienne Lopez

During the summer weather, two students sit on the lawn and enjoy each other's company. Dating comes easy when it's warm.

(Greg Walters

Laura Cunningham, Paul Harris, Jo Dunford, Tom Riddle, Debbie Shell and Chuck Flemming get together with some other friends and party during the summer. Laura and Chuck have been dating for three years.

(Gary Howard)

Above, a kiss on the dance floor seems to be exactly what the doctor order for this couple. Contentment on their faces makes for a good picture.

(Gary Howard)

Above, slow dancing is always a great way to get to know somebody better, it also helps if you don't know them at all!

(Gary Howard)

Above, in the course of a date, hopefully you'll be able to get this close without too much trouble.

(Lin Ruys)

Robin Estep and D. H. Perry show how a kiss on the cheek can brighten up your day!

(Lin Ruys)
Caught in the clinch of an affectionate kiss, Mary Bell and Lee Blevins show us how it's done!

THE ULTIMATE EXAM

By Lin Ruys

Dating on campus is one of the things that doesn't happen all the time to everyone. Those lucky enough to go out occasionally with a member of the opposite sex, could probably tell this writer a thing or two.

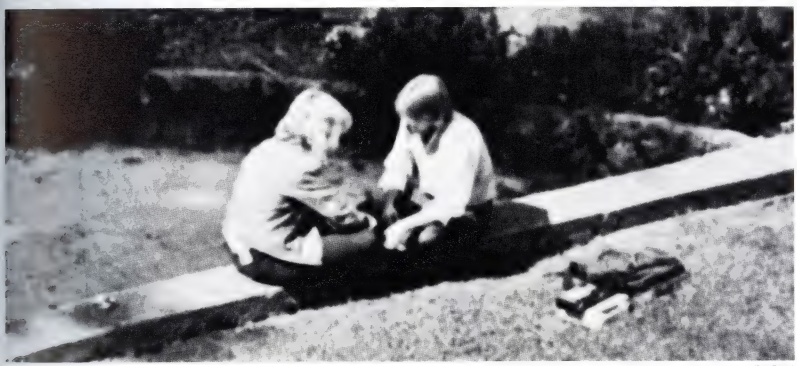
On any given warm evening when the stars are out and the breeze is warm, you can be sure to find a number of couples out and about practicing the age-old custom of a date.

The typical evening consists of a dinner and movie or play. The cost of a date such as this is usually nominal. Coupons for restaurants come frequently in the paper, and you might be lucky enough to win some movie tickets from the local radio station.

When the date comes to an end and your companion is standing on the door step of your home away from home, the evening seems magical.

Hopefully, this date will lead to more dates and who knows??? College romances may be rare, but not unheard of!!!

Two unsuspecting students are seen together in the warm autumn of the amphitheatre. It's always a popular place for couples.



(Lin Ruys)

THE HEALTH CLINIC

By Lin Ruys

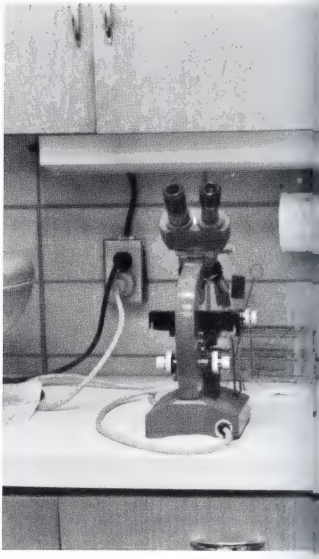
The student health clinic, located in Lamb Hall on the ground floor, is open for all currently enrolled students.

The office hours in which you can be seen are from 7:30 a.m. until 4:30 p.m. Two registered nurses are there along with one full time clinical aide and four different doctors who keep alternating office hours five days a week.

All you need for treatment at the clinic is your current I.D. They are able to prescribe antibiotics if the doctor says so. Allergy injections can be given if the student has the serum. Tetanus boosters, flu shots and T.B. screening can be done for those students who are foreign or those who are going into the health field.

The treatment, depending on what is, can be administered within 15 minutes of you coming in.

This is a service which is handy for all students on campus; but it is available for commuting students, also.



Above, the microscope is an essential part of the health clinic's operation.

(Adrienne Lopez)

Below, a bed and table for exams is shown.

(Adrienne Lopez)

(Todd Perry)

Above, Taking X-rays is part of the technician's work day. Right, working with real patients can be a trying experience.

THE DENTAL CLINIC

By Lin Ruys

The dental clinic, located across the breezeway from the health clinic in Lamb Hall, is there for all students who need clean teeth or a painful tooth looked at.

The hours of the clinic are 8:30 a.m. until 4:30 p.m. and a dentist sees patients on Mondays, Wednesday and Friday between the hours of 8 and 12 during the day.

When asked, a staff member said, "A dentist is always present supervising the hygenists." There is always somebody there to look at a problem if a patient warrants it.

The fee for a basic teeth cleaning job on a first visit is $6 and $5 for any following visits.

The clinic is open to all students who are currently enrolled in the university.

(All Photos by Adrienne Lopez)

Above, there's always a certain amount of fear associated with this chair; but fortunately that fact with time is becoming a fallacy.

Left, these technicians work daily with patients and doctors to try and make the task of coming to the dentist an easier one.

(Randall Lew

THE NEVER ENDING PAPERWORK!!

By Jeff Gill

A journalist's work is never done, or so it seems.

This group of relentless troopers can be found anywhere on campus at almost anytime covering some event — whether it be a tediously boring faculty senate meeting, a Shakespearan play or a Buc football game.

The first few weeks of the semester are shaky and nerve racking for the staff members of the East Tennessean. Every day becomes a mental and physical outpouring of running, reporting, writing, editing and laying out the pages for one of the newspaper's bi-weekly editions. They have to stay late writing headlines and waiting for pictures (and in some cases, ulcers) to develop.

What's so crazy about all this is the staff member must find time to cater to such natural needs as sleep and hunger, and also educational needs, like term papers and test. It's possible to do all these things, but the price paid is physical fatigue, mental exertion and just plain apathy.

Then why do loyal staff members push themselves to such an extent?

It's simple. They love their job. A journalist, after all, is an adventurer by nature. He/she is a crusader for truth and knowledge — ever-perseverant in his pursuits and always curious to learn what's beneath the surface of that great expanse known as human nature.

A few other traits may characterize these hard workers: outgoing, egotistical, proud, lunatic, absent-minded, devious, cheap, people-loving, tactless and brash.

The one thing that characterizes them as a group is they resemble a tight-knit family caring for and looking out for each other's welfare.

Above: Tim Miller, news editor of the East Tennesean, is looking over some copy before it is set in type.

Above: Jeff Gill, successor of Leslie Stewart as Editor of the East Tennessean, is caught on the move once again.

WORKIN' 'ROUND THE CLOCK

By Greg Walters

"A little hard work never hurt anyone."

Perhaps this old addage applies to most aspects and participants of college life, but for some, with 400 pages to draw the layouts for, write the copy for, and select the pictures for it's a way of life.

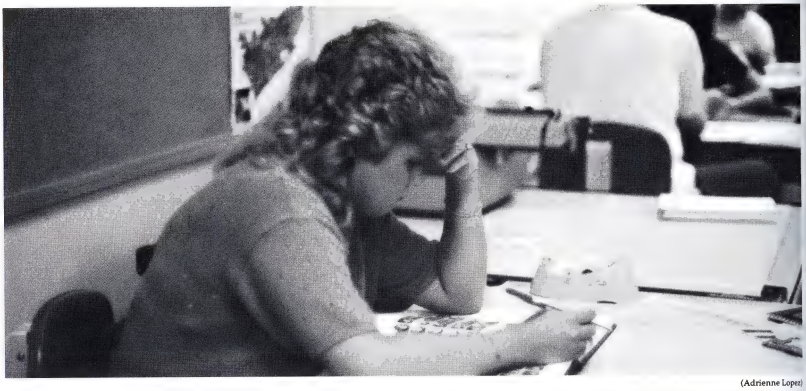
With a membership that seemed to change every few days, the 1984 Buccaneer staff was composed of fifteen full-time students interested in designing and publishing a yearbook, with periodic help from a pool of eager volunteers who gave up a great deal of their class time to help record for prosperity another year of ETSU history.

A typical day for a Buc staffer began around 8 a.m. by stopping by the office to see who (or what) was left over from the all night session that became a common occurrence. Some quick one-fingered typing on the lone typewriter that worked and a frantic search for pictures always preceded a couple of bad jokes and the mad dash to second period. Tom Mullen, copy editor said, "It's pretty hectic and it gets pretty crowded, but all in all it's fun."

After sitting through a couple of classes, choking down a 10 minute lunch and a quick trip downtown to pick up color prints, the staffer would return to the office and spend the next eleven hours finishing the eight double page spreads in his/her section. (Why do typical days always occur when the following day is a deadline?) Then it was home to bed for a few hours and then back to the office to greet the Taylor Publishing Company representative, David Honnold.

Once David had the six signature deadline safely on the plane to Dallas, a collective sigh of relief always seemed to escape from the University Center. Freedom at last! Until the next day when 96 more pages were assigned to be done in the next three weeks — between classes, meals, sleep, dates, and homework (what is homework?).

No, a little hard work never hurt anyone. But if asked anytime between August and March, a staffer might say it never did any good either. Then in April, when that first box of yearbooks was opened . . . Somehow, it was worth it in the end.



(Adrienne Lopez)

Above, Brenda Crisp is shown here getting some ideas for the future layouts of the Class section of this book.

CAMPUS ACTIVITIES BOARD

By Lin Ruys

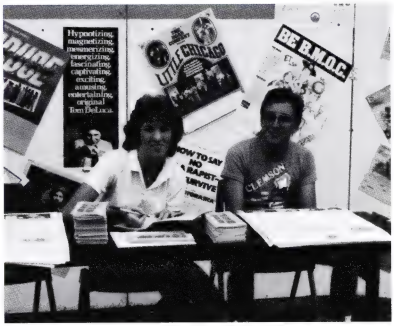
The Campus Activities Board coordinates and keeps most of the student activities on campus going in the right direction.

The CAB sponsors events like Homecoming, lectures, campus movies and concerts.

Some of the concerts which were sponsored by CAB were the Back Doors, Sugarcreek and Brian Huskey to name a few.Movies on campus are a major commodity for CAB. Recent films are shown like Flashdance, Vacation and Mr. Mom; there's always a lot of students who attend.

Homecoming was and always is a special event on campus. All the school participates and everyone has a good time with family and friends.

CAB is a vital part of our campus for the activities we all participate in and like.



(Randall Lewis)

SGA

There is a group of students on this campus working very hard to make things happen the way you want them to happen. This group is constantly seeking to attain your ideas, suggestions and grievances. Taking these opinions and incorporating them into projects and services ia a main objective of your Student Government Association.

Special services this body provides for students include student discount cards, the student handbook known as "Spectrum", and the University telephone directory.

An annual project that is planned by SGA is Homecoming. Homecoming week (which was Oct. 10-15 this year) was a great success due to much planning and hard labor. The Secretary of Student Activities and Services and her committee began planning for that eventful week this past summer. The theme was, "Homecoming and All That Jazz!"

An important goal for Student Government this year was to improve communications between the student body and the administration, and as always, between the students and their representatives in SGA.

To help attain this goal two major events were held. One was "SGA Day" during which you had the opportunity to meet the senators representing you, and to offer opinions and suggestions, or air your grievances. A very frequent question from the student body was, "What has SGA been doing this semester?" During the fall semester, the Student Senate approved a five-dollar Buccaneer fee to assure the continuation of having a yearbook. Also approved was legislation to provide a parking lot designated for the use of carpooling commuter students, and several recipients of the student loan fund (606 fund) were determined. Another event held frequently by the SGA was the Town Meetings. These were held so that the students could have a chance to ask Dr. Beller and other administrators questions concerning the University.

Student Government is working dutifully to increase communications between them and who they represent. Their Senate meetings are held once a week on Tuesday afternoons. Their adviser is Dr. Dorman Stout, Dean of Student Affairs. Their office is located on the upper level of the D. P. Culp Center. The organization consisting of eight cabinet members, eight court justices, and thirty-two senators makes up a body you can be proud to call your own.

1983: A YEAR TO REMEMBER

By Lin Ruys

Any of the facts in the following article were taken from the January 1984 volume 7 issue number 1 of *Life* magazine.

To begin with, music was the center of a lot of things. The first name that comes to mind is Michael Jackson. He had a banner year with his *Thriller* album which has been dubbed number one for 1983. He starred in a 14 minute video depicting a horror film which cost about $800,000.

MTV became incredibly popular with cable subscribers because it offers 24-hour music videos and recent music news. A lot of network affiliates now have weekend late night video shows for those who can't or don't have cable.

We had an invasion from down under by groups such as Men at Work, Air Supply, Olivia Newton-John and others too numerous to mention.

The Police went on their most successful tour with their *Synchronocity* album. "Flashdance" the movie spawned new fashions as well as new music.

If the music wasn't enough to keep you busy during 1983, Hollywood did its best to. Karen Carpenter, David Niven, Gloria Swanson, Norma Shearer, Jack Dempsey, Eubie Blake, Ira Gershwin, Arthur Godfrey and many others left us with an irreplaceable void in Hollywood. Their loss will be felt by all for many years to come.

The final chapter in the Star Wars trilogy was released, *Return of the Jedi,* and Harry Calahan paid viewers another visit in *Sudden Impact.*

Those nights you weren't at the movies the local and national news kept you entertained in the comfort of your own home. Politics in 1983 were something you had to use a scorecard to keep up with. James Watt, our former Secretary of Interior, did us all a favor when he resigned after describing his staff as being, "a black, a woman, two Jews and a cripple." This was, to say the least, one of the many, many times his foot found the way to his mouth.

A 747 Korean jetliner flew into Soviet airspace and was shot down by an air-to-air missile. The jetliner, full of passengers, fell into the Sea of Japan killing all 269 aboard. The Soviets were condemned for the action which they denied.

Beirut saw a "Bloody Sunday" when a total of 239 soldiers, marines and sailors were killed in a brutal attack in which a truck loaded with two tons of TNT slammed into full barracks. America watched its sons and fathers die for their country once again.

Moving right along to happier subjects, 1983 was the Christmas of the adoptable Cabbage Patch Kids. These small, unassuming cloth dolls were the cause of riots in various cities. Trips to Europe were taken on the spur of the moment in order for the spirit of Santa Claus to live on in some children's eyes.

If the riots during the Christmas didn't kill you, the weather probably did! It was the coldest winter ever recorded and the hottest, dryest summer ever. You couldn't win for losing it seemed!

Computers in the home became common and video games were a regular home commodity.

Vanessa Williams, 1983 Miss America, became the first black woman to hold the coveted title.

The Rev. Jesse Jackson went to Syria and brought home Lt. Robert Goodman. He was being held there by the Syrians for political reasons.

If all that wasn't enough, AT&T broke up into at least seven different corporations. It was described by AT&T officials as being a happy divorce in which everybody's interests were taken care of.

All in all, the year of 1983 was one of people, far off places and things here at home.

You should be happy to know that you don't live in a boring country or state. Something new is always happening, and if you don't like it, wait around and I'm sure something will come along soon.

RIGHTS OF MOTHER NATURE

By Lin Ruys

Weather.

It's something that we all have to live in and with at one time or another, unless you're a hermit with a fear of going outside your cave!

For as long as man and beast have existed on this meager planet we affectionately call Earth, weather has played a major role in the plans he has made. Either it's too cold, too hot, too wet, too dry or too something. It's true, man is never satisfied with what he gets from Mother Nature.

The ironic part about that is that he takes out his frustrations on his fellow man. Have you ever noticed how people change as the weather does? It's true. For example, perfectly normal drivers turn into maniacs if a snow flake or a rain drop happens to hit their car. We won't even bring up the radical change in their personalities. Mr. Hyde would have felt right at home around here when it rains. All the Dr. Jeckylls' come out of their hiding places and attack unsuspecting victims.

Weather in East Tennessee could be a lot worse. I guess we had better thank our lucky stars we're not in the Amazon or the Antartic. Boy would we complain then!!!

THE ADMINISTRATION ...

By Tom Mullen

President Ronald Beller brought quite a bit of experience with him when he took over the reins of the university in September of 1980.

Prior to coming to ETSU, Beller served in a variety of university management positions, the most recent of which was his tenure at Virginia Commonwealth University in Richmond, VA.

At Virginia Commonwealth, Beller filled the position of executive vice-president. This position consisted of fulfilling all of the duties of the "second in command", such as assisting the president with general administration of the university and complete responsibility for the management of all fiscal, administrative and selected academic support services of the university. He was also the university's liason to the Virginia General Assembly and was responsible for primary contact with the State Council for Higher Education in Virginia and other key personnel in the executive branch of the state government.

Beller also fulfilled similar duties in the capacity of Provost for Administration at Virginia Commonwealth. During his two year stay in this position, he was also a member of key university policy and management committees.

As president of this university, his job certainly hasn't gotten any easier.

Right: Dr. Shirley Chapman, vice mayor of Johnson City, is shown here addressing the administration.

(All Photos by Ron Campbell)
President Ronald Beller reads an invocation at the first annual Family Day ceremonies on October 5, 1984.

Right: Dorman Stout ties up some balloons at the Homecoming Day alumni dinner tent.

1984 WHO'S WHO

By Lin Ruys

To be chosen as a representative of your school in Who's Who Among Students in American Universities and Colleges is an honor few get to hold during their college career.

This year 35 students from ETSU were chosen. To be accepted in Who's Who, you must be a junior or senior with at least a 2.8 gross grade point average and have made a significant contribution to at least two of the following categories: (1) community services; (2) campus organizational life; (3) drama, speech or fine arts; (4) music; (5) athletics or (6) publications. A personal interview is conducted by the selection committee and the decision is based on that and your application.

Those who were chosen are as follows: Anne-Marie Adams, Mona Baharestani, Carla Bolton, Dianna Bourn, Kellie Brown, Rebecca Burnette, Tabace Burns, John Cinkus, Sara Copeland, Terry Dempsy, Donna Dugger, Lisa Eldreth, Kellye Ford, Randall Hall, Cathy Hyder, Michael Jones, Randall Light, Elizabeth Edwards, Laurie Long, Mitzi Marsh, Elizabeth McKay, Sonya Musick, Teressa Nutter, Tim Powers, Carl Purvis, Tammy Robinson, Jamey Smeltzer, Betty Smith, Kevin Squibb, Dennis Stark, Wendy Turner, Rebecca Williams, Sandra Wilson, Kim Woody, Debbie Wright.

These students should be commended for their effort and participation in the school and community.

WATAUGA LAKE

By Debbie Morton and Ron Campbell

No one would believe it, but we found sea shells in Tennessee.

Actually, they were fresh water clam shells, but they were so unexpected that we didn't quite believe they existed ourselves. They were found at Watauga Lake, or what is left of Watauga Lake.

In 1941, the Tennessee Valley Authority approved land in Johnson County to build Watauga Dam. Some of the land purchased held the town of Butler, or what would be known as Old Butler later. In 1947 residents were relocated to Carderview and Butler was readied for burial . . . in water.

Parts of some of the buildings in the town were not torn down; they were simply covered by the lake. A new road was built to take the place of the one which was now being covered by water. The area took on a whole new look.

In May 1953, former Butler residents living in Carderview changed the name of their new home to Butler. This became known as "New Butler", while the original town was known as "Old Butler".

Now, 35 years later, the TVA felt it was necessary to draw down the water in the lake to check on the condition of the dam at its base.

To drive by Watauga Lake now is mind-boggling. Hills and valleys have emerged, showing stumps of trees that died long ago. The road that ran to Old Butler is visible and looks as good as it did when it was put under water.

On afternoons when the weather was good, traffic would be backed up for miles waiting to drive to the old town. The phenomenon was not that the water was down, but that the town was there. Foundations that had been standing when the lake was made were still there.

Former residents of Old Butler held a reunion in early December. Many would take their children or grandchildren back to the home of their present town, showing them old, familiar sights.

Even though Old Butler is buried again, it is still interesting to go to the lake and walk where, in any normal summer, the lake in some places would be a good 100 feet over your head.

It has been a crowded recreational facility in the summer, a dumping ground for stolen property and the cause of death for several people, many of whom were never found.

We were on the look-out for exciting revelations, and semi-regrettably found none. What we did find was the beauty and the splendor of the valley between the mountains and a town where no one lives now, except some sea shells.

Below: Road to "Old Butler" reappears.

Above: Watauga Lake left it's mark on the land. Lines show the levels of water as it was dropped.

Below: Watauga Lake has risen a lot since they dropped it in early December.

Below: A lone rock survived the rise and fall of Watauga Lake, it's edges have been smoothed over by time.

MUSIC TO STUDY BY

By Lin Ruys

Campus Concerts have traditionally been one of the more popular events that CAB sponsors every semester.

The Back Doors, The Misstakes, Tish Hinojosa and others are not usually nationally famous groups or individuals, but given the chance, they could be.

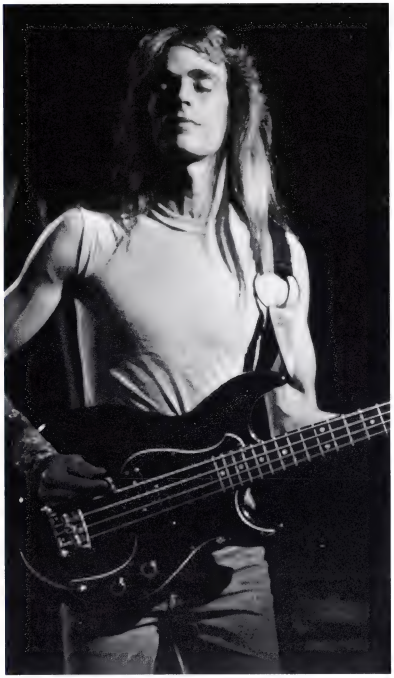
The Campus Activities Board which sponsors these concerts feel that these concerts let the students have some good, live music without having to leave campus or pay high ticket prices.

The Back Doors, a group from the north end of the country, gave a performance which reeked of their mentor group, The Doors. All those who went, really got the feeling of being back in the late sixties.

The Misstakes also gave a great performance when they came last fall to the ballroom on the third floor of the Culp Center. They seemed to appeal to a younger crowd as their music had a punk flavor to it.

Tish Hinojosa, who hails from Nashville, was one of a couple of performers who played in the Cave. The students who passed through or stopped to listen seemed to enjoy the break. She was a nice change of pace from the music videos and the regular lunch crowd.

All in all, this year saw some good concerts on campus. Hopefully next year will be just as good or even better for the music lovers around campus.



(Ron Campbell)

The bassist for SugarCreek appears to be entranced by the song he is playing.

PLAYING AROUND

By Lin Ruys

I know we aren't located in the best place for concerts, but even the skeptics couldn't complain too loudly this year.

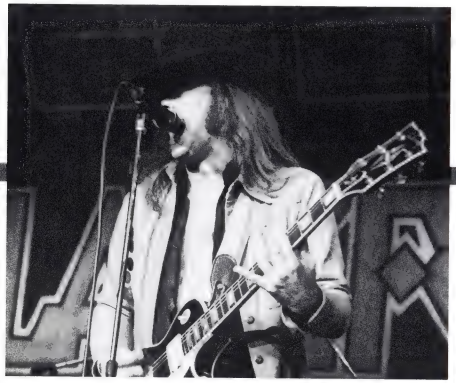
Let me tell you a little bit about going to a concert at Freedom Hall. First of all, you have to get there early, because the only kind of concerts they have are festival seating. This involves getting there about two hours before the show and standing in line with some of the strangest people. While waiting, you begin to notice abundance of alcohol and drugs in the crowd. Oh well, you have to do something to occupy your time!

Soon, but never soon enough, you begin to see the crowd slowly move inside the building. After being frisked and pushed through the door, you begin to look for a place to park your tired body.

This is something you have to experience to believe.

After finding a seat, you begin to feel the anticipation in the crowd begin to grow. They know it won't be long now, and the noise in the building starts increasing as the time for the concert to begin gets closer.

There's nothing quite like the feeling you get from going to see a group you love; suddenly you decide that the $11 you paid for the ticket is worth every penny of it.



(Randall Lewis)

KID'S STUFF

By Brenda Crisp

The Child Study Center, located on the first floor of Warf-Pickle Hall, has been operating since the late 1960's and currently has 58 children between the ages of three and five. The children come either for a full day or for a half-day.

"The children enjoy such activities as 'tree walking,' where they observe the trees, running and swimming," said Vera Peters, a teacher at the center.

"They make life seem so important," she said. "They are so eager to learn."

There are currently 14 people on the staff that work directly with the children, said SuSu Mobley, acting director and kindergarten teacher of the center. This includes a speech therapist, and occupational therapist and a deaf educator. All of the teachers who work in the center have elementary and kindergarten certified teaching certificates.

The center is in connection with the Uniting Children of Ranmging Needs (Project UNICORN), of Washington County which began three years ago, Mobley said.

"The two organizations are becoming more and more linked," she said. "The children have a lot more in common than they don't have."

The curriculum, which may include such subjects as language arts, math, music and art, is planned according to what the children need to develop mentally, she said.

One of the activities that helps to "stretch their imaginations" is a project called the changing center. Mobley said, "This is where the children set up such things as a restaurant, library, grocery stores, a disco or an airport.

Field trips are planned as a follow up for these projects. "It helps them to have an idea of what the real thing is like," she said.

Above: The wall in the Child Study Center would brighten up anyone's day. The bright colors cheer up the play room.

Above: After the "worlds shortest race" the children gather by the swings. Below: As the gun is sounded, the children raced to a close finish.

Below: Monkey bars can be a kid's best friend sometimes.

(All Photos by Randall Lewis)

Bill Warfield and Chris Sureel swing during the spring-like weather. While outside, the kids get exercise and fresh air.

Saturday Night MADNESS . . .

By David Cook

Boring, boring, boring. Saturday night and here I lie with no TV, no stereo, no date, no money, and most importantly, no beer. Talk about the pits. It's now 9:30 and as the night grows on I become more and more anxious to entertain myself. But what's a man to do?

Nothing immediately comes to mind, so I find myself walking over to the Culp center, as if I don't see it enough during the week. On the way over, I just happen to notice the girls in McCord getting ready for their nights on the town. You guys know what I mean! I venture on toward D. P. Culp Center still amazed at what I had just seen moments before.

Upon entering the center as I began the long climb up the ramp, the silence is interrupted by an announcement: "May I have your attention please? The University Center will be closing in five minutes, please exit the building." Ignoring the announcement, I continue on my way up the ramp to the third level. I am suddenly in darkness, the building is closed. I'm all alone. I notice a glow coming from a room over my right shoulder. Reluctantly, I go to investigate. I begin to hear music. The voice seems familiar. As I approach the door, the music gets louder, lights are flashing. Sticking my head in the doorway, I look up and see Donna Summer in the flesh, singing her heart out. God, it's hot in here! In front of me people are dancing and having a great time. I look closer at the crowd and to my amazement see the Commodores, Barbara Mandrell and Stevie Wonder.

This can't be real I keep telling myself. I tap this lady with long hair on the shoulder to ask what is this wild and strange place. She turns and I immediately recognize her as Diana Ross, I freak out. I finally get myself together after a few slaps on the face and she informs me that this is the Music Listening Room where people can come, relax and listen to music free of charge. Everyone suddenly disappears as a stern voice in the hallway orders me out of the building. Still foaming at the mouth, I turn to see parts of the night cleaning crew begin work on the third level. On my way back down the ramp at the mid-level I smell smoke and hear arguing in the distance. Getting off the ramp I turn right and in the distance across the smoke-filled lobby, I can see figures playing something. When I get to the door I see Jimmy Conners and Bjorn Borg playing table tennis and Dr. Beller

(continued on page 98)

David Vaught, Mark Watkins try their luck at the hockey game in the Culp Center Games Room between their busy schedules.

(Todd Perry)

(Ron Campbell)

(Adrienne Lopez)

Tammy Johnston defends herself against the Battlezone video game.

(Randall Lewis)
Chris Reece enjoys his favorite music in the D. P. Culp Center Music Listening Room which is on the upper level.

and Dean Stout playing Ms. Pacman. What a trip!!! Over in the corner I notice a couple of fooseball games, more video games, and pinball machines. I never knew this was here. As I begin my first game of Centipede, I heard that old familiar voice, only a little bit louder say, "I told you to get out of here, boy!" I turn in the darkness. This time it's down the stairway. I glance at my watch, it is 12:30. Way past my usual bedtime. I make it to the first level, this time it's laughter coming from a glassed-in room. The door of the room has NBC on it. I peered through the glass and low and behold it was Eddie Murphy and the entire Saturday Night Live cast watching themselves on the tube. I join them and watch the rest of Saturday Night Live.

A table tennis game in the games room keeps two aspiring pros occupied while others pump quarters into the video games.

(Todd Perry)

MORE MADNESS . . .

After the SNL cast leaves, I start to wander down the ramp which leads to the first level. One thing was for sure, this would be one night I wouldn't soon forget. Bert, Ernie, Grover and Big Bird gave me a big hello and warned me to be careful when I started out the door to go back to my dorm room. As I turned to walk away, the Cookie Monster stuck his head around the corner and gave me a dozen of his best to hold me over till the morning.

Again I heard the familiar voice literally ordering me to get out, but this time to my surprise, it was my roommate yelling at me to get the heck out of his bed.

A lone listener keeps a vigil in the music listening room. It usually isn't crowded — most students don't even know it's there.

(Adrienne Lopez)

Graduation is the time when students "look back" on their past four years in college.

(Adrienne Lopez)

Studying with friends in the library can make homework more enjoyable

Academics comprise a major portion of the student's time on campus. Lessons, studying, and the faculty are only three areas of academics. Other areas include the off-campus centers, the radio stations and the TV lab.

Some students receive hands-on experience in their fields. ROTC trains students in Military Science, other students work with computers while still others receive experience in publications. Nurses and doctors also receive experience, and hopefully, by the time graduation time comes, each student is a trained professional.

(Adrienne Lopez)

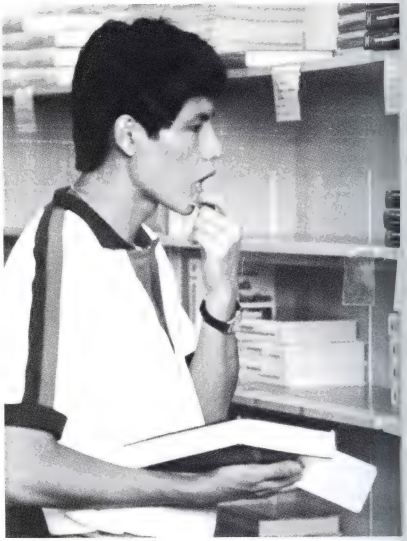
Studying is just one area of academics. Joel Douthat appears lost in his book while avoiding the camera

ACADEMICS

University Bookstore

BOOKS FOR BUC$

By Lessa Thacker



The University Bookstore proudly displays a banner stating "Welcome to Buccaneer Country;" it is at this point you enter ETSU's answer to shopping convenience.

Guy Maddox, the store's manager, feels that the facility's main goal is to serve the students' need for textbooks and supplies. With his experience of 20 years at ETSU, Maddox has successfully ordered a popular selection of merchandise.

"Choices are made by market speculation and sales representatives from different colleges," said Guy Maddox.

Inevitably, textbooks are the main source of revenue. At the beginning and end of every semester the book information desk is flocked by students. However, this uproar is not resented, but welcomed. "We are here for the students, if it were not for them, we wouldn't be here," said Geri Holden textbook manager.

There is more to life than books, and the University Bookstore knows that. Products range from stuffed animals to night-shirts. Even a "Greek Corner" was created two years ago for the sororities and fraternities on campus. And don't forget the new line of "E.T." (Extra-Terrestrial) mugs, pencils, etc.

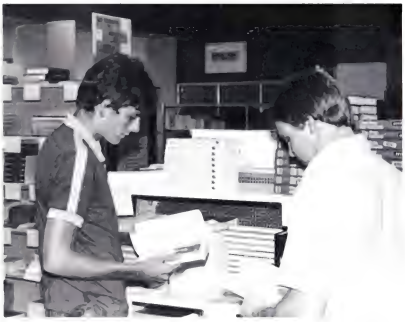
"However we are the original "E.T." (East Tennessee) and it's been good for us," said Maddox.

The bookstore is university owned and operated, thereby recognizing students as the essential customer.

TOP LEFT: Although books are labeled by course number, students still have some difficulty in finding them.

TOP MIDDLE: Kathy Lawson ponders over the large variety of greeting cards for a card to send back home.

TOP RIGHT: The University Bookstore also has an assortment of popular magazines available for students, Kelly Kennerly and Wayne Miyamoto, to purchase or browse at in between classes.



BOTTOM LEFT: As the new school year approaches, waiting in line to buy books was an event almost everyone took place in.

BOTTOM RIGHT: These ETSU students flip through used books looking for the one in the best condition before they make a final decision to buy.

University Relations

RELATING PUBLICLY

By Mitzi Smiley

The office of University Relations communicates with various university constituencies in order to gain their understanding and support.

Responsibilities of the office include: alumni communication, broadcasting, community relations, institutional advertising, internal communication, media relations, news, photography, publications, special events, and sports information.

"ETSU Today" is written, designed and printed in the office. This alumni publication comes out in June, September, December, and March.

WETS-FM is operated by the university and has a range of about 125 miles in any direction. It is affiliated with the National Public Radio network.

University Relations is involved with making the talents and services of university groups and individuals available to the region. The office also promotes regional involvement in the university's programs.

Advertising, which is used to promote enrollment, athletics, and special events, is handled in this office. "ETSU Update," the university's newsletter is written and distributed by the office. Different groups on campus supplement "ETSU Update" by information which comes through the office to insure editorial and design consistency.

The office is involved with oral communications including personal and group discussions, staff meetings, and informational/instruction meetings.

Wally Fromhart, University Relations director, is the designated spokesman for ETSU, although the president and departmental chairmen are occasionally consulted.

The office is also responsible for arranging and assisting media interviews with faculty, staff, and students. Area media are kept informed about ETSU through the University Relations Office.

Larry Smith, photographer for the office, photographs all university activities that are to be used in publications and news releases. All publications that are paid for by ETSU funds come through the office for writing, re-writing, and designing.

Publicity for all intercollegiate sports and production of brochures for media use and recruiting are handled by the sports information director, John Cathey.

Special events, such as National Education Week are also coordinated through the University Relations. Faculty, staff and students are called upon to assist in setting up displays, at regional fairs, anniversaries, and dedications.

TOP LEFT: Wallace Fromhart, who fills the position of director, is often found working diligently at his desk.

BOTTOM LEFT: Betty Burdine and Kristn Fry sort through newspaper clippings for future issues of "ETSU Today."

TOP: Kristn Fry and Nan Whitten discuss recent articles which will be used for publication in the "ETSU Update."

BOTTOM: Seeking advice from director Wally Fromhart, Chris Hyde finds the job of student worker for University Relations a challenge.

THE KINGSPORT CENTER

A BIG PART OF ETSU

By Mitzi Smiley

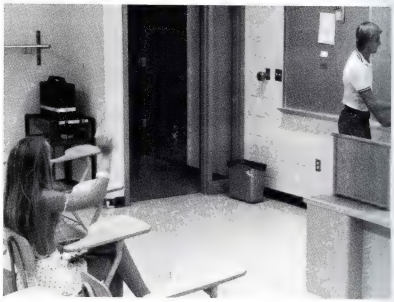
The Kingsport Center offers over 200 courses annually which serve about 2,500 full and part-time students.

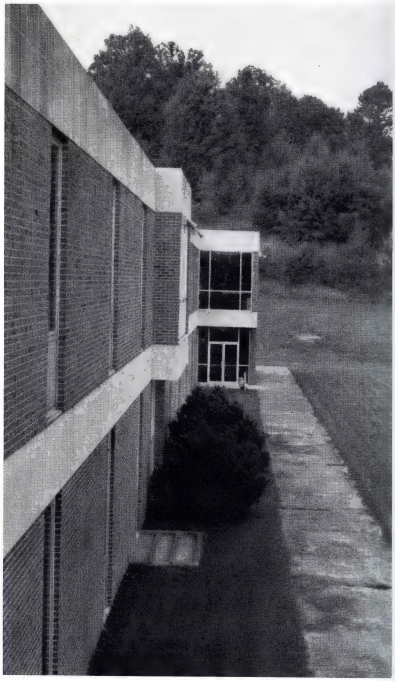
The Center provides Kingsport residents with the services and curriculum of ETSU. The average student is female, 26 years old, and is employed full or part-time. The average student takes two courses a semester. However, students of all ages and interests pursue studies at the center.

Courses are offered during fall, spring, and summer. These are taught by full-time ETSU faculty bases at the center, faculty from the main campus, and instructors from the Kingsport area.

Courses are available to meet primarily the degree requirements of the general education core, elementary education and most lower division business majors. These undergraduate courses are offered both day and night. Night courses are available for most master of business administration and master of education programs. Academic advisement, tutoring, and career and personal counseling are also available at the center.

Located in northwest Kingsport, in the Allendale community, the Center includes a library, two biology labs, a chemistry and lecture room, a bookstore, gymnasium, 30 classrooms and a student lounge. An athletic field and four tennis courts are also located at the Center.





TOP LEFT: Many full and part-time workers find the Kingsport Center an ideal setting for beginning their education.

BOTTOM LEFT: The Center includes several benefits of the main campus such as a gymnasium and a library.

RIGHT: The Center provides local access to ETSU services for the area residents.

LEARNING TO TAKE TEMPERATURES FOR DEGREES

By Mitzi Smiley

The Nave Paramedical Center operates in conjunction with area hospitals, physicians and dentists, but it is mostly affiliated with the Johnson City Medical Center Hospital.

The Center offers courses of study leading to associate degrees in Radiological Technology and Medical Assisting, Surgical Technology and Respiratory Therapy Technology. Programs are only started in the fall of each year.

In 1970 the Center opened, and by 1977 all seven programs were being offered.

Programs offered at the Center call for a high degree of individual motivation, good physical health and manual dexterity.

The staff consists of 14 faculty members, three secretaries and one maintenance person. Approximately 160 students are enrolled at the Nave Center this year.

Limited enrollment insures high quality and individualized instruction. The center is located in Elizabethton.

Carroll Reece Museum

History Comes Alive

By Mitzi Smiley

The Carroll Reece Museum, one of the most progressive and outstanding art and history museums in the region, was formally dedicated on October 10, 1965.

The museum was established as a tribute to the memory of First District Congressman, B. Carroll Reece. A display of Reece's memorabilia, including his collection of elephants and choice political cartoons was set up with the help of his widow, Mrs. Louise Geoff Reece, and contributions from friends.

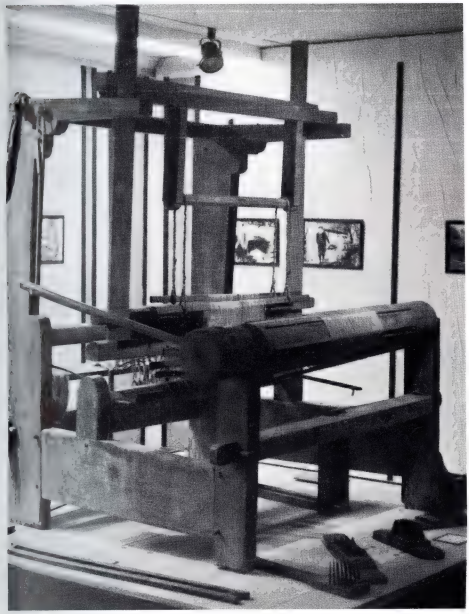
The museum includes an exhibit of Tennessee Frontier items. Most of these are 18th and 19th century items from East Tennessee and Western North Carolina. The Frontier Gallery includes an exhibition of the History of Printing in East Tennessee which was installed in 1982.

Annual exhibits include "Christmas Trees Around the World," in December; "Blue Ridge Quilts" in July; and "A Celebration for Children" in March. Displays from the permanent fine arts and historical collections are also exhibited temporarily.

Helen K. Roseberry is the museum coordinator. The full-time staff also consists of a secretary and an installation supervisor, six student assistants, and an active volunteer program also aid the museum and contribute to its successful operation.

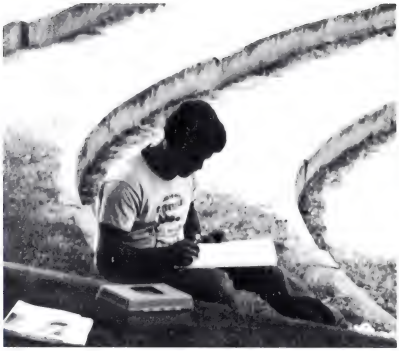
In 1966, the Friends of the Reece Museum support group was organized. Annually, this group sponsors a film series and a concert series. The current membership totals almost 400.

The Carroll Reece Museum is accredited by the American Association of Museums.



LEFT: The Carroll Reece Museum sits peacefully on the ETSU campus while the inside comes to life with Frontier Exhibits and old-fashioned Christmas trees.

RIGHT: One of the many frontier items is this device used for spinning thread.



Study Habits

BUCKLING DOWN

By Deanna Lyerly

Sitting up straight, reclining, or leaning against something were just a few of the positions ETSU students could be found in while trying to study. Some liked the quiet library — while others preferred benches along the sidewalks on campus, the amphitheater, or even their dorm rooms. Whatever the place or position concentrating on studying and learning was the goal.

What influenced a student's study habits was hard to say. Most students were just searching for an easy and better way to learn (or memorize in some cases) the material to be on tomorrow's exam, while others depend on sheer luck to get them through it.

There were always more enjoyable things to do around campus but when time for exams or projects came, students all around campus could be found buckling down to study.

TOP LEFT: The amphitheater offers privacy and shade — the perfect condition for reading an assignment.

MIDDLE LEFT: Although it is not easy to study in most dorms, due to the noise, some still manage to concentrate.

TOP RIGHT: These students prefer the warm climate outside to their stuffy dorm rooms for studying.

BOTTOM LEFT: This student is oblivious to the world as she sits on a bench and indulges in homework.

BOTTOM RIGHT: Kim Lingerfelt uses her time wisely by sneaking in a few minutes of studying while waiting on a friend.

An Easy Way Out

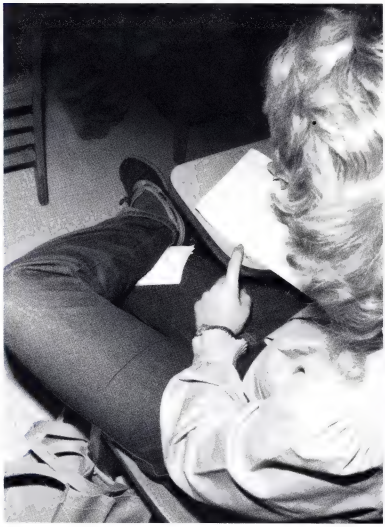
By Tony Ruys

Until I came to college, I was basically an honest person. I was full of naive visions of hours spent in scholarly deliberation. Even the beautiful college women I dreamed of wore horned rim glasses and carried big stacks of books on their chests. Then I went to a few parties and discovered a more appealing perspective to college life. My new friends convinced me that I was misguided and there existed other ways of getting the grades that had little to do with studying. With the use of a few creative test aids, I realized I could party hardy and still do well on my tests.

Since I was a cheating novice, I started with the simplest, beginner methods. Copying another person's exam answers was direct and easy, but I soon discarded this method. It is difficult to always sit next to a cooperative smart person. Some people suggested I get copies of the test prior to exam day. Social organizations usually have back tests files for almost any class and a copy can sometimes come from another student in the same department. However, I soon discarded these methods due to their common element of uncertainty. They required more trust than I was comfortable giving.

However, my cynical mind didn't give up its march down the road of corruption. You might be surprised how much information I can put on half of a three by five card. With a super fine tip pen, I can have a handy copy of a dozen algebraic formulas and a little peace of mind. And you can stick those little babies anywhere. Some of my favorites are inside my belt, on my ankle under my jeans, under a sweater sleeve, and my best was underside of the brim of a sun visor or cap. I once taped one of my exam helpers to a certain girl's upper back and draped her long hair over it. However, she got mad at me and sat down in the last seat in the back row, up against the wall. I guess you could say she left me in a corner, too. After that, I started to taper off my dishonest testing rituals and picked up a new habit for getting good grades. It is amazing how much a little studying helps, and if I study with the right girls, it can be just as much fun as cheating!

(All Photos by Ron Campbell)



BOTTOM LEFT: Ever wonder why so many students cross their legs during exams? This student holds her cheat notes by placing them on one leg and holding them with the other.

MIDDLE LEFT: Covering up cheat notes with the test is one popular way of cheating.

TOP MIDDLE: This student is helping out a friend behind her by holding cheat notes in place with her back. She's safe just as long as she doesn't lean forward.

TOP RIGHT: Students try to put a book's worth of notes on a piece of paper small enough to hold in the hand.

MIDDLE RIGHT: This method of putting the notes between the sleeve and the watch is a popular one during cold winter months.

BOTTOM RIGHT: Feet are also popular when it comes to trying to find a place to hide notes.

Required Classes:

English + P.E. + History Equals 48 HOURS

By Mitzi Smiley

English Composition, American History, and Physical Education — what do these courses have in common? They are required for a bachelor's degree. Out of 128 semester hours to graduate, 43 hours are general education requirements.

Every freshman must take English 1110 during the first semester here. Students struggle through personal essays, attempting to write clear effective paragraphs and sentences. Searching brains for creative ideas, students spend hours writing that perfect essay.

After students learn how to express their ideas and they pass 1110, they move right into English 1120. The students change from writing personal essays to writing interpretative essays. They spend nights trying to figure out how an author wanted his story to be taken. Then the students attempt to explain what they finally figured out.

Students may think they know all about American HIstory and the colonies, but regardless of how much they learned in high school, all students must take American History for two semesters. One semester is dedicated to history "to 1877," and the other semester is dedicated to history "since 1877."

Students can choose from several Physical Education classes; including tennis, conditioning, ballet, softball and volleyball. Or they can take marching band or Military Science to get their two hours credit.

Courses are required in natural sciences, but the students can select from biology, chemistry, geography and geology, and physics. Students also have choices in social and behavioral sciences, humanities and analysis, and communications. Students try to pick the classes they feel they can do their best in. Sometimes they make the right decisions, and sometimes they do not.

Whatever the reasons for having to take so many classes unrelated to the individuals' majors, consider the boredom that would result in taking 128 semesters hours of Accounting.

TOP RIGHT: Tennis is a popular selection for required Physical Education classes.

BOTTOM CENTER: Although History is usually taken because it is required some students find it enjoyable.

BOTTOM LEFT: Tom Martin discovers another world while using a microscope in Biology.

Electives
The Choice Is Yours

By Tony Ruys

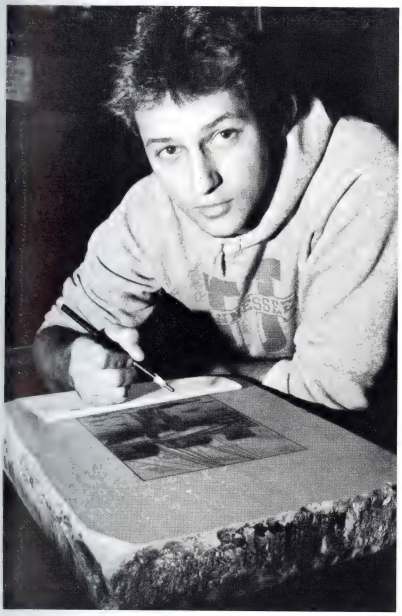
On those rare occasions when you actually have one of those required counselling sessions with your surrogate parent, the faculty advisor, you must eventually discuss the ambiguous topic of electives. Electives are indeterminate classes built into every student's curriculum. But not every student views his electives in the same way. Some students, mostly freshmen, may look upon them as a chance to explore fresh horizons and discover more about subjects they enjoy. Other more pragmatic students see them as necessary evils that should be efficiently manipulated for an easy "A." The rest of us use them as opportunities to flesh out our experience and knowledge in our sought-after professional goals.

The chance to take electives is an exciting aspect of college alien to most new students who remember having little choice in class selection when they were in high school. Some students use electives for exposure to different departments that hold interest for them. But the excitement soon wears off and the student has learned enough about himself to change his major or simply remain confident in his previous career decisions.

Other students grab easy courses for electives. They hope to make some high grades to aid their average with as little effort as possible. Some classes that might fall into this catagory of electives are Reading improvment ment or maybe Preparation for Marriage. Both of these courses deal with worthy material, but they require little intelligence from the student who wants a good grade.

Elective classes taken from the student's major help him to gain a bigger perspective on his area of study. It may also be a class which gives him experience with actual application of theories he has learned in his previous major subjects. Hands on experience is a real asset to go along with knowledge when a student leaves college. He might also select electives which give him exposure to other areas of his major to obtain a complete grasp of his area of study.

Freedom of choice in picking electives is a freedom all students enjoy in a system which makes so many demands on them. Just remember, whatever your reasoning behind your selection, you've still got to convince your advisor. Good luck!



(All Photos by Ron Campbell)

WETS . . . MORE THAN JUST A CAMPUS RADIO STATION

By Deanna Lyerly

"It's nine o'clock in the evening and you're listening to E63, your campus radio station."

This was part of WETS this year, but the station was much more than just a "rock and roll rebel." This year has been one of transition, not only in terms of the quality and emphasis of our programming, but also in terms of reaching more people. WETS can be heard over 630 AM, 100.5 FM Cable, and Channel 24 on Sammons Communications System.

WETS offers a variety of programs, such as jazz, "top 40", and Christian music.

But WETS is more than just music, weather, news, sports, and public-service programming. WETS is people; people developing skills, and growing in maturity.

A radio station is only a reflection of those who run it and work on it. So next time you flip that button on your radio for WETS, remember you're listening to far more than just a campus radio station.

Lee Hobis, a student disc jockey, reads the news while on the air.

Lora Scott puts on another hit song for WETS listeners.

Lee Hobis works diligently making WETS a success.

(All Photos by Ron Campbell)

WETS-TV

THE NEWS PEOPLE

By Keith Ford

WETS-TV is the campus television network. WETS-TV does not broadcast directly, but it does serve the campus community in many different ways. Many broadcasting majors gain valuable experience in different areas of television that will be very helpful in their future careers. About 50 of the students involved with WETS-TV make public service announcements and commercials for local television networks.

The broadcasting students also learn about instructional programs by making these type of programs for classroom use. Special presentations for other campus activities are also made by WETS. The students also produce a program called "Omni," a magazine type show which airs on Knoxville's channel 2, WSJK. In the future the students hope to get their own cable channel on Sammons Cable Communications, Inc.

TOP LEFT: Broadcasting students prepare for an "on the air interview."

BOTTOM LEFT: Students are frequently found at the T.V. lab putting on finishing touches before airing.

MIDDLE: Elaine Triplett edits her video assignment.

Computer Lab

A HOME AWAY FROM HOME

By Debbie Morton

Where is home for all the computer science students? The computer lab; and just like home, it's open 24 hours a day, seven days a week.

Finding a terminal at this home can be a murderous task. The number of students enrolled in computer courses outnumber the number of terminals by about 25 to 1. This means that waiting for use of a terminal takes almost as long as the actual work on a program.

The Assignments for students seem disastrous even though they usually have two weeks per program. Two weeks might seem like a long time to anyone who has never taken a computer course, but to computer students they are known as the hardest and shortest two weeks in the history of the world.

Upon walking into the lab, chances are that within 15 seconds you'll hear the famous line, "My program should work this time." This must be said a million times a day (or is that number too small?) by students working on assignments. The second most used line has to be, "But that's wrong? I don't see *an*ything wrong!"

Time spent in the lab varies for each student, but amounts range from 5 to 70 hours a week. Students in upper level classes spend most of their free time working in the lab; sleep and food suddenly become luxuries that they can live without. Meals are taken from the vending machine in the hall and sleep is done in class.

Sooner or later, everyone emerges from the lab, and if you happen to have been lucky enough to get your program running, so much the better. You can go home, sleep for a few hours, and then begin again for the next two weeks.

TOP LEFT: More experienced students enjoy listening to walk-man radios while working on programs.

TOP RIGHT: Computer programming is time consuming and sometimes frustrating to students such as this one.

BOTTOM LEFT: This student reads her program as it is printed out hoping that she will not find any errors.

BOTTOM MIDDLE: Since the computer lab is often crowded students are forced to wait for terminals.

BOTTOM RIGHT: Students are often found seeking advice from their classmates.

ROTC:

By Keith Ford

When someone mentions Army ROTC, immediately one thinks of soldiers marching around campus singing their songs, but this is only a fraction of the ROTC program. Army Reserve Officers' Training Corps is a program that provides college trained officers for the U.S. Army Reserve. The ROTC provides officers with diverse educational backgrounds and contemporary ideas.

The four year Army ROTC program is divided into two parts: the Basic Course and the Advanced Course. The basic course is usually taken in the freshman and sophomore years and consists of such classes as mountaineering, marksmanship, and basic tactics. Also during this course only two hours of ROTC classes can be taken each semester and there is no commitment to any armed force at this time. Uniforms, textbooks, and materials are furnished without cost to the student.

TOP LEFT: Major Owens shows a student the techniques of repelling.

BOTTOM MIDDLE: Ending a weekend outing, these cadets walk down a path on their return trip home.

BOTTOM LEFT: Cadet Davis demonstrates how to build traps during survival training.

EXPERIENCE FOR TOMORROW

After completing the basic course, students who have demonstrated officer potential and meet Army physical standards are eligible to enroll in the Advanced Course. The advanced course is taken the last two years of college while students are pursuing a degree in a major of their choice. This course puts heavy stress on teaching leadership through the knowledge of military tactics that they are also taught. While enrolled in the advanced course, the students have signed a contract as to serve initially in the Army, Army Reserve, or the National Guard as a rank of 2nd lieutenant. While in college, ROTC cadets in advanced classes get a commission. A paid six-week advanced camp is held during the summer between the junior and senior years. This camp permits cadets to put into practice the principles and theories they have acquired in the classroom.

Each year the ROTC department takes several trips to military installations across the southeast. They have already visited Fort Benning, Georgia, and plan to visit Fort Bragg, North Carolina later this year. The department encourages participation by non-ROTC students on these trips. The ROTC cadets also go on local field training maneuvers to the Beauty Spot which is in the Erwin area.

They also have cookouts and other various activities such as open rapelling at the Culp Center to attract students interest toward the ROTC program. The ROTC cadets attend a formal dance, the Military Ball, in the spring. The cadets also have teams for intramural sports on campus.

The Army ROTC graduates are the leaders, the thinkers, the decision makers of our country. This is why it must be such a good program installing the leadership, knowledge and judgment that made them the way they are.

This group of weary cadets endure the cold weather while riding back from Beauty Spot which is located in the Erwin area.

BOTTOM MIDDLE LEFT: Theater students take a break after a tiring rehearsal.

BOTTOM MIDDLE RIGHT: Crew members work long hours to prepare for opening night.

A STAR IS BORN

By Tony Ruys and Dr Harold Frank

ly, acting.

Major productions and studio productions are the two different types of plays scheduled by the theater. Major productions and multiple act plays produced by the University Theatre, chosen for their merit to the student's education and appeal for the audience. Studio productions are produced and directed completely by students. They are usually one act plays and are often student written.

The plans for this year include two major productions and four studio productions. Major productions include the musical comedy, *Guys And Dolls,* based on stories of the Broadway scene by Damon Runyon, which was directed by Harold Frank with Robert La Pella as musical director. The second was *Dark of the Moon,* based on the haunting ballad of "Barbara Allen" from the Smokey Mountains, which was also directed by Harold Frank.

The four studio productions, one-act plays, were directed by theater students as a requirement for their courses of study. Unusual and experimental plays were the choices of the students who were responsible for all phases of production.

BOTTOM RIGHT: Students are required to audition before a selected committee along with other cast members.

East Tennessee
State University
College of Medicine
Administrative Offices

COLLEGE OF MEDICINE

QUILLEN-DISHNER

The College of Medicine was named in honor of Rep. James N. Quillen and Paul F. Dishner, both of whom stand proudly in front of the administrative office.

Under construction, Building 119 located at the Veteran's Hospital will include housing laboratories, teaching areas, offices, and a department for animal care.

The College of Medicine's administration building stands beneath shady trees.

Medical School Continued

The new Johnson City Medical Center, a training hospita was dedicated at 2 p.m. on August 29, 1980. This dedicatio involved a formal exchange of property deeds symbolizin the agreement between the Veterans Administration an Johnson City which secured the VA property for the ne hospital facility. The new hospital cost $30 million to buil It represents a continuation of the cooperative medical trad tion in Johnson City which began in 1911 when five phys cians founded Memorial Hospital, eight years after the fou ding of Mountain Home. Also in 1911, East Tennessee Stat Normal School was begun.

East Tennessee's Normal School developed under th direction of presidents Sidney Gilbreath and C. C. Sherro and attained university status under the direction of the president Burgin E. Dossett, Sr. The College of Medicin became a reality under now retired President D. P. Culp are physician Charles E. Allen and other local administrator and state legislators.

In November, 1980, the medical school was officially nam ed Quillen-Dishner College of Medicine, in honor of Re James H. Quillen and Dr. Paul F. Dishner. The ceremony wa held in the auditorium of the D. P. Culp University Cente Governor Lamar Alexander delivered the keynote addres Dr. Dishner, a native of Duffield, Va. has contributed mor than $1 million in cash and real estate holdings to th College of Medicine since its establishment.

TOP LEFT: Dr. Hershel Douglas is one of the three deans who gained recognition for the school of medicine.

BOTTOM LEFT: Medical student Tom Seay waits for a laboratory print-out.

BOTTOM MIDDLE: Medical students get hands on experience with Dr. Marian Myers.

RIGHT: Registration is a process which medical students must also participate in.

Congressman Quillen, a resident of Kingsport and a native of Scott County, Va. is a member of the House Republican Leadership. ETSU was one of only five sites in the nation where a new college of medicine was established under the Teague-Cranston Bill. Rep. Quillen made sure the federal funds were available for the onset of the medical school development and that federal dollars continued to flow in an effort to keep its development first class all the way.

Another milestone was accomplished October 14, 1983 when East Tennessee State University's College of Medicine officially dedicated Buildings 1 and 119 at the Veteran's Administration Mountain Home facility in Johnson City.

Building 119 is a newly constructed facility, housing laboratories, teaching areas, offices and a self-contained animal care department. The new structure has 54,887 assignable square feet including 10 student teaching labs, eight offices and 73 faculty research laboratories. The design of the building allows for laboratories in the outer parameters and office support space in the interior. The Department of Animal Care is based on the entire fourth floor.

Rooms 226 and 227 in Building 119 are pediatric labs headed up by Kenneth Herd, M.D., and Irene LeClair, technician. Funds to equip this laboratory were donated by the Summers family in honor of the late Mr. Robert Summers, an area businessman.

Building 1, an original Mountain Home structure, was renovated to meet the needs of the medical school. The structure has 22,943 square feet of assignable space. Included are 80 offices, four classrooms and a conference room designated primarily for the use of the Department of Surgery. The conference room was furnished totally by private donations.

The completion date of these buildings was July 1983. Occupancy began in late July and early August. To date, construction and renovation costs are approximately $13.8 million

Occupancy of these buildings was a culmination of early planning based upon a "program statement" for physical facilities in 1977 by medical school administrators. The statement, developed after receipt of a "letter of reasonable assurance," provided a basis for the requirements for general facilities to meet the policies, goals and objectives of a medical school.

When added to past accomplishments, this facilities achievement has made the East Tennessee medical school a reality of efforts by citizens of the immediate area, the state and the geographic area.

The medical school has gained recognition under the guidance of three deans — Dr. Robert E. Jewerr, Dr. Jack E. Mobley and Dr. Herschel L. Douglas. In addition, direction has been afforded by acting deans, Dr. Charles E. Allen, Drs. Lamar Sutter and Frank M. Shepard.

(All Photos by Ron Campbell)

BULLETIN BOARDS: A SOURCE TO CAMPUS ACTIVITIES

By Keith Ford

Where can you find fraternity parties, summer jobs, and rooms for rent in the same place? ETSU's campus has many locations where these and other topics can be found. Gilbreath, the University Center, and many other university buildings house hundreds of pamphlets, posters, and booklets which inform students about everything from items for sale to upcoming events to oversea studies.

Bulletin boards are a sure source of communication and information for students on campus. Once students take the time to scan the interesting topics offered by these boards, they often become engrossed in at least one of the many activities ETSU has to offer. Too often, though their attention span is broken by the necessity of going to class.

TOP RIGHT: Cheryl Lewis reads information about English education on the bulletin board.

BOTTOM RIGHT: Another purpose of bulletin boards is to allow students, like Jean Holland, a place to lean on and read.

SHERROD LIBRARY: THE PERFECT SETTING FOR RESEARCH, STUDYING, OR FUN

by Ted Cogdell

Our campus library was named for a past university president, Charles C. Sherrod. Sherrod was ETSC president from 1925 until 1949.

The Sherrod Library contains over 600,000 volumes and over 60,000 periodicals. There are more than 300,000 government documents and thousands of microfilm strips for the use of the students.

There are several important parts to the Sherrod library. It holds the Southern Appalachian archives which cares for Southern Appalachian books, manuscripts, audiotapes, and videotapes. University records are also stored here.

Two other important parts of the library include the law and medical librarys. The law library holds approximately 9,000 volumes while the medical library contains over 50,000 volumes.

The Sherrod library provides several services for the students of the university. The first floor of the library remains open until 2 A.M. daily for those who have to burn the night oil. Instruction is given for certain classes from staff members. A soda machine is located in the first floor corridor for a study break refreshment. Copy machines are installed for the convenience of the students. On the second floor, an information desk is situated to answer any question that you may have.

Sherrod Library provides the perfect setting for many students to study in.

Even the windows of the library offers students a good place to study.

THE FINAL CRAM

By Tony Ruys

This dreaded process is something we all must face at one time or another during our college years. For some, it happens more often than to others.

Whether we like it or not, cramming can change our daily schedule to a high degree. During this time, we find ourselves in the library at odd times. Most students journey to the library after their delicious dinner at Dobbs House. If you happen to have dinner late one evening, it is possible that your favorite spot to study in the library has been taken. It isn't too bad if you have to study in a strange place. But when the material you are to be covering for the final is even more strange to you, chances are, you've got a severe problem.

Since you have been cramming for about an hour now, you decide it is time to take your five minute per hour break. You depart your cubical in high hopes that the Pepsi man (yes, the one with the driving award) has just filled the soda machine with your cramming refreshment. When you decide it is time to take another break, a walk around good ol' Sherrod does you good because the squealing of chairs being pulled out and pushed in is giving you a headache. As you take your short walk, you might say to yourself, "Well, at least they don't have that problem in the dorm." A couple hundred pages down the road, you take your final break of the long evening. While you wonder what to do with this time to break up the monotony that studying can bring, you pull out your student discounted issue of Sports Illustrated and look at all of the pretty pictures because you are sick and tired of reading for one day.

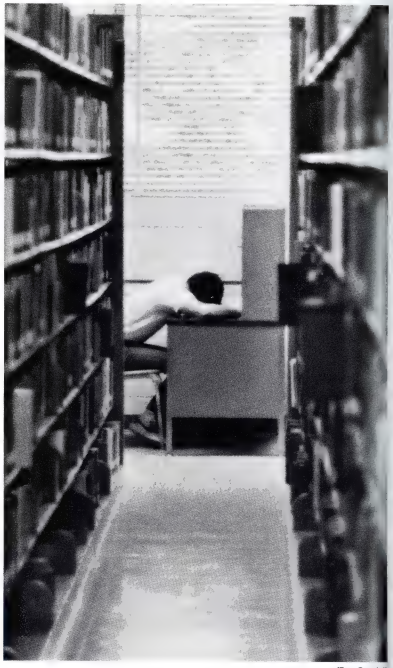
We make ourselves scarce to others during cramming for obvious reasons. You may even pass a friend while walking on campus and not even know it because you both probably have your faces buried and eyes glued to a text or notebook.

While cramming, we are temporarily out of touch with the outside world. So when we walk by the newsline in the Culp Center, we read what our footsteps will allow us to. Sometimes, we happen to walk by between broadcasts and are only able to catch "BBC of Texas."

That most important diet can become irregular during the dreaded days of cramming. We find that the Eat & Run becomes our second home to the library. Once we arrive at our second home, we try to locate our wallet among all of our books, pads, accents, rulers, etc. . . . We all look forward to the day when we can finally return to the campus favorite, the Main Meal.

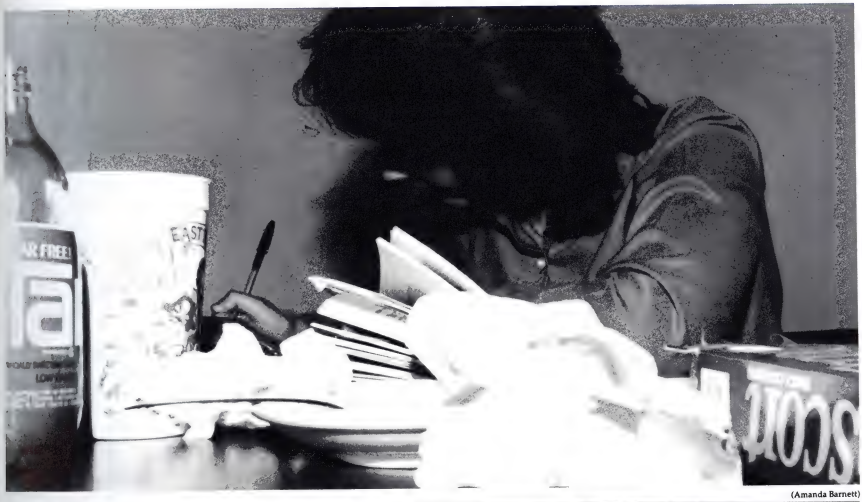
Due to the fact that cramming requires us to stay up past our usual beddy-bye times, we stop by the Mini Mart that is never open when you really need it to purchase something to keep us awake until the wee hours of the a.m. And once again, you skip happily over to Sherrod for more cramming.

As the story concludes, they crammed happily ever after and got an A.



(Ron Campbell)

Quite often fatigue takes over after studying for hours.



(Amanda Barnett)

As with most students, Deanna Lyerly finds little time for regular meals while cramming for final exams.

Learning becomes easier when students help each other out by sharing their ideas and answers.

This student discovers the library to be the only place where he can have the privacy needed to study during exam week.

(Adrienne Lopez)

(Adrienne Lopez)

"When I grow up, I want to be . . ."

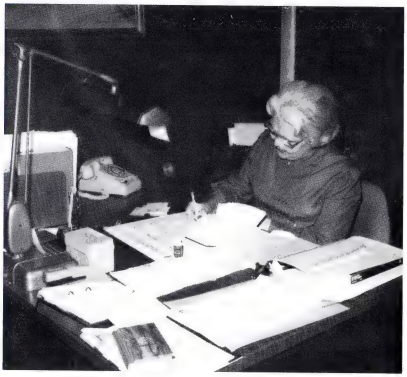
By Tony Ruys

There must be some reason why you decided to devote four years of your life to college. I mean beyond the sex and beer. Because the last school catalog I studied hadn't yet officially added thos topics to the course selection. So there must have been a more reasonable goal you had planned on achieving in college. Hopefully a goal like the proper education and preparation for a successful career. However, you may have discovered that your career goal isn't as definite as it was in the beginning. Or you may have realized that you are almost done with the rat race of college and you want a job waiting for you at the finish line. In either case, there are people on campus that you can turn to for help in making these choices: The Counseling Center and the Office of Career Development — Placement Services.

Life is much easier if you have known all your life what you want to be when you're an adult. But there are some students who need a little help in choosing a major and discovering what career goal is right for them. The answer for these aimless people is the guidance found at the Counseling Center. Experienced counselors and aids can help any student by administering tests and personality inventories. These are easy to take and help the student explore his interest, abilities, and personality traits. The complete tests are evaluated and interpreted for the student by the counselors to determine what career positions and fields of work he might excel in after college.

Most seniors get concerned that they may get bored after graduation without a place to go every day. They decide a job would be the perfect solution. And the solution to the worry of finding that job can be found in the Office of Career Development-Placement Services. The purpose of the Office of Career Development is to provide information on employment to the student as well as to enable the student to meet prospective employers in scheduled interviews. They also have the Occupaional and Employer Information Library which contains material on vocational guidance, career opportunities, and various employers. In addition, they hold workshops and seminars on different topics to prepare seniors for finding a position and interviewing successful for it. They will help seniors in the preparation of their resumes and can even advise them on how to dress to make a good impression.

Graduation is the cherished dream for most students and seems to become a reality quicker than some anticipate. These two campus offices have people who try to make that day of transition a new beginning for the student, instead of a poignant ending.



BOTTOM LEFT:

GRADUATION: A DAY TO REMEMBER

by Mitzi Smiley

How many times have you thought to yourself, "I can't wait to get out of here. I'm sick of this place."? But, then the time comes for you to graduate, and suddenly you are feeling different about leaving.

After a few months of college, most students are already tired of studying. Fortunately, summer breaks allow students to get tired of working and ready to go back to shcool. But, after four years of college, students are ready to move on to something new and to settle down in one way or another. Graduating students are relieved that school is finally behind them.

However, at the same time, they become afraid of facing the real world with all its unemployment. "What if I end up working at McDonald's?" is a question facing many students. Suddenly the security of being in college does not sound like a bad idea. At least you know more or less, what you would be doing for four years. Now you are not sure where you will be or what you will be doing.

Of course, some students already have jobs lined up for them and know exactly where they are going to be and what they are going to be doing. These students can graduate with the secure feeling that they do not have to worry about unemployment.

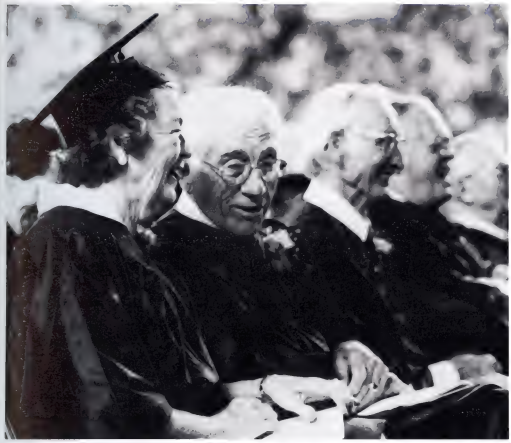
Then there is that feeling of pride in a graduate. This fantastic feeling that you have accomplished something really important. But, at the same time, there is a feeling of sadness. College is behind you now and so are many of your friends. You are going to be separated from the people you have become close to. In a few years you can all get together again and try to have one of those parties you loved so much. You can meet at your favorite restaurant and discuss old times.

Occasionally, you can visit ETSU, but will it ever be the same? Can you ever feel the same things you felt as a student? Well, people change, and so will you. How sentimental you are depends on your memories, good or bad, and if you are like most people, you will cherish them.

But, for now, CONGRATULATIONS and GOOD LUCK!

Graduating students prepare for the walk they have been anticipating for years.

This graduate checks to make sure her tears have not ruined her make-up on this special occasion.



Graduation Continued

Past graduates, who participate in graduation ceremonies twice a year, seem to be amused by something the speaker said.

Fellow classmates help each other pin their caps in hopes that they will not fall off during the march to the dome.

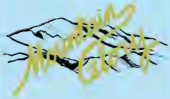
(Randall Lewis)



The various organizations on campus display banners as a part of the Homecoming celebration

As one wanders around campus, one will notice the effects of each organization and appreciate the fact that with their participation comes a better campus. In the following pages, you will see the individual organizations that are represented upon the campus of ETSU.

ETSU's organizations consist of special interest and religious groups, Greeks, and honor societies.

The memories of the times together and of participation in activities often remain with the people involved for a lifetime. There is a certain bond that will always connect them as brothers and sisters and that no one else can appreciate unless one has experienced it.

The strength of this lies within each organization and lifts ETSU to glory.

(Ron Campbell)

The Pi Kappa Alpha Quarter performs at the dedication ceremonies for Homecoming by singing the National Anthem

GROUPS

Panhellenic

The Panhellenic is an organization made up of 227 members and has been a part of this campus for twenty-five years.

Panhellenic's purpose is to develop and maintain sorority life and interfraternal relations at a high level of accomplishment. In doing this, they consider the goals and ideals of member groups that apply to both campus and personal life, promote superior scholastic abilities, and cooperate with the university administration to maintain high standards.

(Randall Lewis)

The members of Panhellenic are: (Front Row) Susan Walton, Karen Wright, Kim Coleman, Dana Keesee, Kristie Tanner, Judith Williams, Anne Schmudde. (Back Row) Lisa Hester, Stacy Cummings, Mitzi Marsh, Anita Mussleman, Sonya Musick, Ann-Marie Adams, Susan Bilbrey, Amanda Foster, Betsy Edwards, becky Burnette, Beth Boyd, and Ramona Milhorn.

(Todd Perry)

The members of Junior Panhellenic are: (Front Row) Paula Condra, Lisa Matlock, LeAnne Hutchins, Tamara Skinnell, Amanda Foster, (Back Row) Stacy Bible, Joy Bowman, Lesia Paine, Suzie Mynatt, Lisa Luster, and Mary Ann Myers.

Junior Panhellenic

The Junior Panhellenic helps sorority pledges to develop their interests in their particular sororities at ETSU. They place a special emphasis on responsibility and good campus citizenship.

This group, which is made up of ninety-two members and has been in operation for ten years, will be involved in car-window washing for faculty members, participation in aerobic dance-a-thons, publishing a Greek directory and participation in the March-of-Dimes walk-a-thon.

Alpha Delta Pi

(Kyle Fugate)

Alpha Delta Pi has 55 members and has been in operation locally for the past 30 years.

This sorority has the open motto of "We live for each other." Its colors are white and azure blue with the symbol of a diamond. The organization's mascot is Alphie the Lion.

Alpha Delta Pi is involved in several activities. This year they will participate in Homecoming, Pike's Peak, Derby Day, All-Sing, Kappa Alpha Old South, Snake Day, Special Olympics and a rock-a-thon.

Diamond Days and Penny Drop TBA are events that this sorority hosts. The money raised in these activities will be used to benefit their philanthropy, the Ronald McDonald houses.

This sorority was first started in 1851 at the Weslyan College in Macon, Georgia.

It was the first sorority of its type to ever be formed.

(Randall Lewis)

All sorority sisters find themselves busy with their sororities, but some, such as Vickie Boyd (left), find the time to double as little sisters for various fraternities on campus.

The members of Alpha Delta Pi are: (Front Row) Kim Spikes, Patsu Washington, Carrie Word, Pam Peterson, Vanessa Moore, Belinda Burleson, Rhonda Moody, Karen Wright, Sally Shelton, Cindy Shepard, Sebrena Gillis, Laurel Johnson, Lisa Emmert, Leanne Walker, Lyda Johnson, Jane Collins, Cindi Caldwell, Jennifer Poteat, Tammy Peters, Mona Ornduff, Katherine Simpson, Kay Danna, Vickie Boyd, Carla Bolton, (Back Row) Katie Poffenbarger, Jami McKinny, Stacy Bible, Jennifer Greenawalt, Eunice Baker, Edna Seehorn, Maryann Pavlik, Becky Miller, Tracy Hundley, Tammie Pinkston, Donna Benfield, Karen King, Judy Robertson, Mary Haverly, Kim Denton, Whitney Honeycutt, Sara Sadd, Annie Norris, Becky Burnette, Wendy Turner, Betsy Edwards, Joy Bowman, Regina Bradford, Joan Zeller, Linden Colley, Kim Coleman, Teri Adam, and Angela Phelan.

(Matt Bowman)

Alpha Delta Pi sister Laurel Johnson received the honor of second runner-up during the 1983 Homecoming Queen Contest. Laurel was escorted by her father.

(Greg Walters)

Never free from sorority business, Joan Zeller calls in to get the latest information on an upcoming fundraiser from a friend's house.

The members of Delta Zeta are: (Front Row) Anne Schmudde, Susan Bilbrey, Becky Brien, Jan Williams, Susan Baughan, Sonya Musick, Rhonda Freeman, Judith Williams, (Back Row) Cind Johnson, Lisa Luster, Suzie Mynatt, Becky Walsh, Carol Hurst, Lisa Reinking, Charlotte Patterson, An Wright, Tonjua McCullough, Terry Palmer, Nita Der Hovanesian, Laurie Sampson, and (Not Pictured) Becky Trivett, Bonnie Landis, Dee Hatmaker, Barbara Potter, Tina Koontz, Terry Carroll, Angi Aldridge, Lisa Boothe, Lynn Chapel, Cindi Luton, Missy Mundy, Sherri Smith, Kim Rose, Debby Vin cent, and Susan Caudle.

(David Hale)

(Doug Hilliard)

Tina Koontz, Becky Ginder, and Becky Brien pose as southern belles at Lambda Chi's All-Sing.

Delta Zeta banners hang from the windows of Panhellenic dorm during rush week.

Delta Zeta sisters pose for a group picture at their annual Kilarny Rose Formal.

The ETSU chapter of the Delta Zeta sorority was founded January 28, 1956. The sorority's national headquarters is located in Oxford, Ohio. The sorority was founded on October 24, 1902, at Miami University in Oxford. The colors of Delta Zeta are old rose and nile green. Their flower is the Kilarny rose.

Delta Zeta's national philanthropy is the Galludent College for the Deaf. Locally, the sorority works with the Johnson City Speech and Hearing Clinic. This past spring, Delta Zeta helped with Hearing Impairment Week and held a reception for Dr. Pete Merrill, president of Galludent College. The sorority also hosted a "Most Eligible Bachelor" contest to raise money for their philanthropy.

Delta Zeta also participated in Pike's Peak and Lambda Chi Alpha All-Sing. They placed second in Sigma Nu's Snake Day and third in Kappa Alpha's Old South Day. Panhellenic awarded Delta Zeta tne Junior Panhellenic Award. They have won this honor for the past two years.

The highlight for Delta Zeta was during Delta Zeta Province Day. They received awards for activities, attendance, scholarship, and most improved chapter.

Delta Zeta

(Kyle Fugate)

The members of Phi Mu are: (Front Row) Nancy Fox, Angela Amburgey, Laura Levy, Mary Kay Fulford, Dee Dee Ford, Robin Cathey, Dana Dafferner, Robin Lloyd, Anna Fox, (Second Row) Stacy Cummings, Dawn McCloud, Anne-Marie Adams, Jane Lethco, Dana Keesee, Debbie Watson, Robin Dykes, Denise Thomas, Beth Johnson, (Third Row) Lesia Paine, Tina Brooks, Vicki McCloud, Linda Church, Sherri Davenport, Shelley Littleton, Lisa Matlock, Jeanne McWeeney, Jamey Smeltzer, (Fourth Row) Carol Foster, Kathryn Felton, Julie Ross, Robin Rogers, Karen Dieterich, Sharon Mills, Jean Anne Smith, Kathy Seals, Kim Loomis, Cheryl Bennett, (Back Row) Diana Purser, Kim Johnson, Kristi Tanner, Terri Watson, Jamie Catron, Leslie Stewart, Robin Smith, Dori DeWitt, Cynthia Vyuegar, Lisa Hester, Libby Vick, and Lisa Long.

(Doug Hilliard)

During Homecoming, the Phi Mu's teamed up with the Sigma Chi's to compete in the "Olympic Games."

Phi Mu

Phi Mu was founded at Weslyan Female College in Macon, Georgia, in 1852, making it the second oldest sorority in the nation. The Kappa Kappa chapter of Phi Mu was founded upon the campus of ETSU in 1955.

The Phi Mu's regularly host a pledge tea along with a Parent's Day. They actively support their philanthropies, Project Hope, Unicef, and Heart Fund, by raising money in annual events. The Phi Mu's are also participants in Homecoming, Pike's Peak, Derby Days, and All-Sing.

Phi Mu's colors are rose and white, and their flower is the rose carnation. They stress the ideals of sisterhood and individualism as well as their motto: "Love, Honor, and Truth."

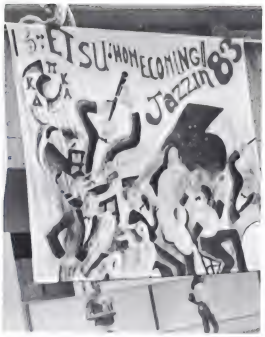
(Doug Hilliard)

The Sigma Chi-Phi Mu Homecoming float rests peacefully before being taken to the parade route.

Phi Mu sister Robin Cathey models the latest fashion in casual dresses for a feature story in the *East Tennessean*.

(Ron Campbell)

Kappa Delta



(Ron Campbell)
The Kappa Delta-Pi Kappa Alpha Homecoming banner hangs from the ramp of the University Center.

The Gamma Delta chapter of Kappa Delta has been active on campus since 1954. It was originally founded in 1897 in Farnville, Va. on the campus of State Female Normal School.

Their national colors are olive green and white; their symbol is the ladybug. Kappa Delta's national philanthropy is the Crippled Children's Hospital in Richmond, Va. Locally, the "KD Ladies" support the East Tennessee Christian Children's Home. Kappa Delta teamed with Pi Kappa Alpha to win the first place trophy in Homecoming 1983.

Kappa Delta's motto is "Let us strive for that which is honorable, beautiful, and highest."

(Ron Campbell)
Laura Ledford prepares to dance with her Pike partner during the Homecoming Skit Competition.

(Adrienne Lopez)
The members of Kappa Delta are: (Front Row) Nancy Kendriks, Marianne Connor, Amanda Foster, Sonja Gilreath, Tommi Stott, Kathy Allen, Vickie Howard, Susie Chumley, Laura Ledford, (Second Row) Carolyn Phagan, Lori Caldwell, Beth Salyers, Becky Matzek, Kim Johnson, Pamela Lowe, Karen Pierson, Monica Keck, Linda Martin, LeAnne Hutchins, Leslie Tentler, Janet Ownby, Mary Pat Buchannan, (Third Row) Linda Karling, Betsy Berry, Beth Bass, Joan Bolen, Karen Pope, Jani Ahmad, Kim Romak, Bonnie Whitaker, Karen Paulfrey, Robin Faust, Tina Mauk, Linda Basham, Kaye McKinney, Katherine Holland, Cindy Cross, Kelly Hale, (Back Row) Jennifer McQuary, Sarah Fox, Tamara Skinnell, Rita Kirby, Teigha Randolph, Anita Dennison, Maureen Donahue, and Julie Jennings.

(Terry Rowell)

The members of Sigma Kappa are: (Front Row) Ruth Dessart, Missy Gilreath, Charlotte Lovell, Laurie Long, Denise Arnold, Beverly Justus, Denna Johnson, (Second Row) Mitzi Marsh, Beth Boyd, Kim King, Bridgett Armstrong, Dana Banks, Anita Mussleman, Carla Heton, Dee Dee Tipton, (Back Row) Terri Harmon, Mary Ann Myers, Susan Walton, Jan Kirby, Donna Welch, Pam Przygocki, Karen Hill, Tammy Howell, Teresa King, Sharon Durham, Susan Roark, Ann Williams, Debbie Swift, Robin Cates, Pam Siler, Holly Heffner, Trish Thomas, Stephanie Way, Kelly Reynolds, Lori Ferrell, and Teri Carty.

Sigma Kappa

(Matt Bowman)

Sigma Kappa was founded nationally in 1874 at Colky College in Waterville, Maine. The ETSU chapter was founded in 1956.

The sorority's national philanthropy is the Main Sea Coast Mission and the American Farm School. Locally, the chapter helps at the Veteran's Administration Hospital.

Their symbols are the dove and triangle; their motto is "One Heart, One Wing." Lavender and maroon are the colors of Sigma Kappa. Their designated jewel is the pearl.

Sigma Kappa sister Dana Banks was crowned 1983 Homecoming Queen. She is being congratulated by Laurel Johnson of ADPi.

Interfraternity Council

The purpose of the Interfraterni ty Council is to help govern th ETSU fraternity system. The coun cil is composed of two represen tatives from each of the ten frater nities, an executive board, and ar advisor from the Student Affair Office.

Each year the Interfraternit Council (IFC), with the aid o Panhellenic, sponsors a kick-of dance to start rush. The IFC anc Panhellenic also work on Greel Week as well as other Greel functions.

(Adrienne Lope

The members of the Interfraternity Council are: (Front Row) Kevin Cable, Mark Taylor, Tim Bartley, Kevin Harrison, K. C. Frew, Jim Lyon, Bob Cantler, (Se cond Row) Tim Haga, David Fowler, Terry Adkins, John Morton, Ed Kelly, (Back Row) Chris Prescott, James Gregory, Kyle Fugate, Geoff Dutton, J. L Grillot, Randy Hall, Bryan Adams, Roger Broyles, John Murphy, and David Holsclaw.

(Ron Campbell)

Fraternity Rush registration occurs once each semester and is sponsored by the IFC. During the spring semester, registration took place at the Seahorse with the IFC providing free beer.

Kappa Alpha

Fraternity Rush parties can be long and tiring. Members of Kappa Alpha take a break from all the partying.

(Adrienne Lopez)

The Kappa Alpha fraternity wa founded on December 21, 1865 Washington College. The chapt at ETSU was founded on April 2 1966. Their national headquarte is in Atlanta, Georgia.

In 1983-1984, the Kappa Alph fraternity plans to host a bathtu push for the Muscular Dystroph Association in March. They wi also have Old South Day, which a competition between th sororities on campus, in April 1984. The funds raised will b given to their philanthropies, th Muscular Dystrophy Associatio and the Bloodmobile.

(Adrienne Lop

The members of Kappa Alpha are: (Front Row) Michael Lawson, Jon Shull, David Adams, Tim Broyles, Belinda Carroll, James Pickering, Terry Adkin Stephen Brink, James Grillot, (Second Row) Frankie Bruhin, Kelly Kennerly, Debby Vincent, Liz Read, Sharon Durham, Tina Koontz, Jamey Smeltzer, Jul Ross, Jamie Catron, Tim Bartley, Carrie Cowan, Shannon Chambers, Missy Richeson, Kayleen Berger, Janet Hopsons, Kellye Henderson, Jan Wolz, Peg Shinkle, Dana Keesee, Karen Belcher, (Back Row) John Rutledge, Mark Littleton, Mike Vehlein, Douglas Allen, Gerry Spries, Greg Shubert, Tony Deely, B Gregory, Jeffery White, Kirk Hamlet, and Daryl Dennis

Pie in the face was only one of many hazards Kappa Alpha members faced during the "Olympic Games" held the week of Homecoming.

(Adrienne Lopez)

Tending bar during a Rush party gives a brother the opportunity to meet potential members as well as pretty girls.

(Ron Campbell)

The members of Pi Kappa Alpha are: (Front Row) Tamara Skinnell, Janet Ownby, Mary Beth Best, Jeanne Sanders, Stephanie Collins, Missy Blocker, Stell Stevenson, Margaret Lawless, Sara King, Laura Ledford, Kevin Wastler, Kerina Wood, (Second Row) Bob Cantler, Jim Horton, Alan Hartman, Stephani Hawks, Janie Banks, Nancy Lyons, Rocky Ratliff, Scott Clepper, John Speropulos, (Back Row) Todd Range, Bob Tentler, Devon Smith, Dwight Harrell, Mik Cox, James John Feshimpeur, Todd Grindstaff, Randall Light, Pete Butziger, Newman Shufflebarger, Coleman Easterly, Earle Rubin, Greg Hodge, and Ben ny Hale.

Pi Kappa Alpha

Pi Kappa Alpha was founded at the University of Virginia on March 1, 1868. The Epsilon Zeta chapter was chartered on campus on May 14, 1955.

The Pikes participate in the community by helping the Big Brothers of America. They regularly host Pikes' Peak, sorority mixers, and the Appy State Football Run. They are also active on campus by participating in Homecoming, All-Sing, and Diamond Days.

The chapter's colors are garnet and old gold. Their symbol is the fire truck.

The members of Pi Kappa Alpha are: (Front Row) Tamara Skinnell, Janet Ownby, Mary Beth Best, Jeanne Sanders, Stephanie Collins, Missy Blocker, Stell Stevenson, Margaret Lawless, Sara King, Laura Ledford, Kevin Wastler, Kerina Wood, (Second Row) Bob Cantler, Jim Horton, Alan Hartman, Stephani Hawks, Janie Banks, Nancy Lyons, Rocky Ratliff, Scott Clepper, John Speropulos, (Back Row) Todd Range, Bob Tentler, Devon Smith, Dwight Harrell, Mik Cox, James John Feshimpeur, Todd Grindstaff, Randall Light, Pete Butziger, Newman Shufflebarger, Coleman Easterly, Earle Rubin, Greg Hodge, and Ben ny Hale.

(All Photos by Doug Hilliard)

Pi Kappa Phi

The members of Pi Kappa Phi are: (Front Row) Tracy Hughes, David Perdue, C. R. Trammell, Doug Burt, Mike Davenport, David Lovelace, Doug Latham, Mark Smith, (Back Row) Barry Howell, Ron Campbell, Mike Mooneyham, Tim Coffey, Chris King, Terry Dempsey, Alan Bagley, Brian Kerr, Richard Gray, Tom Lesnak, David Hale, Skip Campbell, and Charles Chambers.

Founded on December 20, 1904, at the College of Charleston in Charleston, South Carolina, Pi Kappa Phi fraternity currently has 100 national chapters and 15 chapters being organized across the country. The original Beta Omega chapter of Pi Kappa Phi was colonized on June 14, 1962, at ETSU and reorganized during the fall semester of 1983.

Unable to meet their national requirements, Pi Kappa Phi faced possible closing until a group of men looking for a new direction in fraternities consented to reorganize Pi Kappa Phi. Members of the fraternity at this time were put on alumni status, and 29 new members or associates, as they were called until initiation took place in January, took control of the fraternity.

Pi Kappa Phi's colors are white, gold, and auxillary blue, while their symbols are the long stem red rose and the white diamond. Pi Kappa Phi contributes to Project Push which raises money to provide disabled children with wheelchairs.

Pi Kappa Phi planned several closed parties and mixers with ETSU sororities as well as participating in all traditional fraternity events.

Charlie Chambers prepares to party in the latest formal wear.

Pi Kappa Phi held it first Rush party under new management during the spring semester.

A New Way ... Pi Kappa Phi showed its spirit during Homecoming by placing a sign in the Mini-Dome.

David Lovelace mans the reception desk at a Pi Kappa Phi party with a little help.

(Kyle Fugate)

The Sigma Chi's welcomed back past members during the fraternity's celebration of Homecoming.

David Blythe and Cathy Carlisle enjoy some intramural football action during Homecoming Week.

(Kyle Fugate)

Sigma Chi

(Adrienne Lopez)

The members of Sigma Chi are: Curtis Acres, David Blythe, Scott Boruff, Jeff Brackins, David Bull, Jeff Bush, Roger Catlett, Tim Cherry, Jody Chudina, Bill Clairborne, Scott Davenport, Dolph David, Chris DeCarlo, Kenny Dunn, Steve Finney, Keith Ford, Ray Franklin, Kyle Fugate, Gary Glass, Stewart Hale, Bill Hall, Greg Hall, Keith Hampton, Brent Harris, Avery Huff, Warren Huff, Bo Jones, Mark Lyon, Greg Maiden, Mark Massey, Toby Mays, Chris McCall, Tyson McGhee, Greg McIntosh, Rusty Micthell, Eric Morris, John Morris, Pat Morris, Steve Munsey, Randy Myers, Ken Perry, Lance Ritchie, Mark Sanders, Ron Smith, Scott Smith, Bobby Spicer, Brett Taylor, Mark Taylor, Allen Vicars, Craig Waller, Tim Way, Mike Whitt, Kent Wilkers, and Daniel Sadd.

In May of 1969, the Zeta Omega chapter of Sigma Chi was chartered at East Tennessee State University. With blue and gold as their colors and with a white cross as a symbol of their brotherhood, they soon became one of the most competitive and active fraternities on campus.

Each year the Sig's along with the Johnson City Red Cross sponsor an annual blood drive to replinish the Johnson City Blood Bank. On a national scale, the Sigma Chi fraternity raises money for the Wallace Village for Mentally Retarded Children by sponsoring the ever popular Derby Week. Derby is a three day competition between sororities, with continuous events and parties.

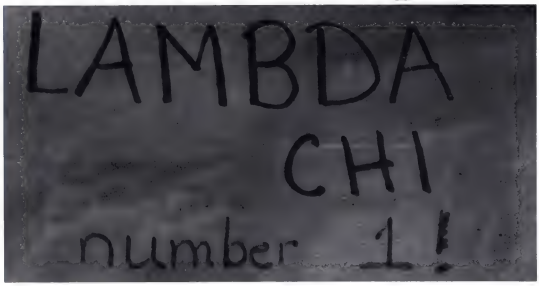
On campus, the men of Sigma Chi particiate in the Alpha Delta Pi Diamond Days which they have won for the past six years. They have also participated in the Sigma Phi Epsilon Drink-Off which they have won for the past two years.

In the intramural action, the Sig's captured the Interfraternity Council Sports Trophy for the eighth consecutive year. They also contribute to the Lambda Chi Alpha All-Sing and Homecoming.

(Ron Campbell)

The members of Lambda Chi Alpha are: (First Row) Wendy Mumpower, Cindy McCown, Cindy Kyte, Diane Salesky, Angie Farmer (Second Row) John Rader, Scott Knowton, Dail Ogle, Darrell Lankford (Back Row) Robbie Caldwell, James Gregory, Kevin Cable, David Carrier, Jim Smith, Ronald Yancey John Crumb, and Mark Robinson.

Lambda Chi Alpha



(Ron Campbell)

During Rush, fraternities show their pride by displaying signs to attract potential new members.

The Iota Omicron Zeta chapter of Lambda Chi Alpha was founded on the ETSU campus in 1956. The original chapter was founded in 1903 on the campus of Boston College.

The brothers of the fraternity are active on campus by annually hosting an All-Sing party and choral competition. They also participate in Homecoming, Alpha Delta Pi's Diamond Days, and intramurals.

The local chapter supports the United Way and the American Cancer Society. They also help the underprivileged children from the Salvation Army.

Their colors are purple, green, and gold with the white rose as their flower.

Omega Psi Phi Fraternity Inc. was founded at Howard University on November 17, 1911. The fraternity has been on campus for eleven years.

The motto of the Omega Psi Phi's is "Friendship is essential to the soul." They strive for four cardinal principals: manhood, scholarship, perseverance and uplift. Their colors are royal purple and old gold. The Theta Zeta chapter also sponsors the Miss Omega Pageant.

Omega Psi Phi

The members of Omega Psi Phi are: Chris Prescott, Frank Armstrong, Andre Westfield, Reggie Bland, Robert Achoe, and William Weaver.

[Randal Lewis]

Phi Sigma Kappa

The Zeta Tetarton chapter of the Phi Sigma Kappa fraternity was founded in 1954. This fraternity was founded at the University of Massachusetts in 1873. Their national headquarters is located in Indiannapolis, Indiana.

To raise money for their philanthropy, the Dawn of Hope, the Phi Sigs sponsor the "Hot Legs Contest." Held during the fall, the contest is open to all campus organizations. They also sponsor a kissing booth at the Senior Citizens' Center. In 1982 and 1983, they took up money for the heart fund and also worked with the Lion's Club by helping to fix up the Lion's Field.

This fraternity's colors are silver and magenta. The flower representing the Phi Sigs is the carnation.

(David Haley)

The members of Phi Sigma Kappa are: (Front Row) Karen Niver, Michael Moody, Damnit, Pam Peterson (Second Row) Teresa Johnson, Tammy Cowan, Patty Shoemaker, Jennifer Volkmann, Cheri Officer, Robin Crutchfield, Selena Baker, Mary Jo Spencer, Debbie Hoover (Third Row) Sandra Kelley, Angela Bowman, Lori Nichols, Kris Leighton, Mary Karnowski, Angela Alexander, Lisa Reinking, Valerie Walker, Vicki McCloud, Katie Chamberlin, Tracie Gray, Carolyn Chamberlin, Marvin Hunt (Fourth Row) Karen Holmes, Sandra Roland, John Pingo, Dawn McCloud, Kathy Franklin, Kari Humphreys, William Fassacht, Michael Parks (Fifth Row) Sam Taylor, Eddie Casida, John Jones, Randy Johnston, Mark Latham, David Holsclaw, Ben Laywell (Back Row) Jeff Estes, David McKaren, Michael Brown, Rick Spurling, Rod McCarter, Lee Austin, Dana Holloway, Robert Cooper, Paul Wilson, and Kip Parks.

Sigma Nu

(Randall Lewis)

Randy Hall and John Bentley stroll toward the Sigma Nu house after attending the Organizational Fair and scouting likely recruits for the fraternity.

The Theta Chi chapter of Sigma Nu has been at ETSU since 1973. The Sigma Nu fraternity was started on June 1, 1868, at Virginia Military Institute and their national headquarters are located in Lexington, Virginia.

Their symbol is the serpent and their colors are black, gold, and white.

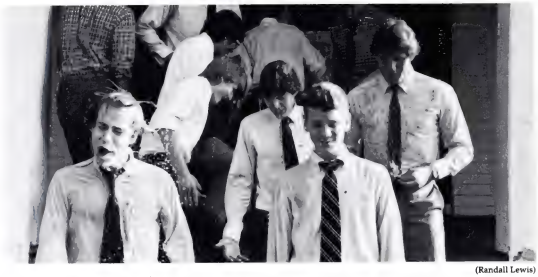
As a philanthropy, the Sigma Nu's helped the Johnson City Jaycees with their Haunted House. They also have a canned food drive for Muscular Dystrophy.

(Terry Rowell)

The members of Sigma Nu are: (Front Row) Richard Jennings, Byran Adams, Randy Hall, Howard McQueen, Michael Hamilton, (Second Row) Elizabeth Hurt, Kristie Tanner, Lisa Thompson, Kim Baker, Teresa Rivers, Patty Franklin, (Third Row) Jennifer Stevens, Terri Watson, Jonna Blankenship, Jill Ragle, Nita Den Hovanesian, Karen Scalf, Rhonda Lucas, Darlene Lawson, Pam Goslin, Veronica Cox, Robbie Michorn, Mark Yantz, Don Simmerman, Brett Eason, Mike Ford, Charles Davidson, David Clements, Brian Blough, Todd Hartgrove, Scott Shultz, John Deacon, Mark Munsey, Randy Martin, Joe Driscoll, Jim Jones, Rusty Wilhelm, Chad Kennedy, (Back Row) Kim Pryor, Tammy Counts, Stephanie Collins, Rebecca Hurley, Karlen Boring, Gail Bond, Jill Harwood, Nikki Ingram, Sandy Light, Kathy Zibelin, Steve Bell, Terry Bennington, Todd Powley, John Bentley, Mike Branscomb, Robert Barnes, Steve Yarber, Robbie Hibbits, Joe Hollister, Craig Smith, Jay Faulkner, Tim Buckner, Jeff Walls, Kent Clark, Kent Yerkes, Micth Murray, and (Not Pictured) Brian Williamson.

(Randall Lewis)

The members of Sigma Phi Epsilon are: (Front Row) Lisa Luster, Anna Crouch, Karen Redmond, Sheri Hatmaker, Michele McClure, Robin Davis, Sharon Finchan, Beth Huffelt, Lisa Taylor, Michele Toncray, Angie Shaw, Kelly Distl, Tammy Payne, Susan Hooper, Jennie Miller, Cindy Graceffo, Ellen Duncan, Sharon Burleson, Bonnie Drinkard, Lisa Butfiloski, Gina Lijoi, Teresa Broyles (Second Row) Ken Shugars, Jamie Lancaster, Mike Musick, Richard Cazort, Bruce Hughes, Gary Fake, Chris Green, Mark Peterson, Kelly Kuhn, Andy Mack, Bill Thacker, Robert Bradford, Jim Lyon, Tim D'Amico, David Seckler, Tom Seals, Don Pittman, Jack Leonard, Bruce Drinkard, David Fowler (Third Row) Rod Terry, Chilt Price, Tom Mays, John Morton (Fourth Row) Mike Heathfield, Mike Lee, Tommy Henson, (Fifth Row) Steve Norman, Greg Maricken, Rob McMunus, Keith Malcuit, David Ridenmour (Sixth Row) James Sutton, Frank Underwood, William Leeming, Scott Smith, (Back Row) William Terrell, Wally Site, Barry Burton, and Rob Ade.



(Randall Lewis)

Following their annual tradition, the Sigma Phi Epsilon brothers doused their pledges with water after the fraternity's group picture.

Sigma Phi Epsilon was founded at Richmond College on November 1, 1901 and has since expanded across the nation.

The Tennessee Gamma chapter of Sigma Phi Epsilon was established on the campus of ETSU in April 1954.

The fraternity is actively involved in the community with a Christmas party being hosted each year for underprivileged children in the Johnson City area.

Sigma Phi Epsilon

Tau Kappa Epsilon

(Matt Bowman)

The members of Tau Kappa Epsilon are: (First Row) Tracy Jobe, Mike Christian, K. C. Frew, Mark Hodgson, Jo Bradley, Penny Jones, (Second Row) Hope Dykes, Tim Blevins, Terry Laughlin, Tracey Childress, (Third Row) Michele Weikel, Susan Jones, Kent Robinette, Bill Ledbetter, Nate Songer, Connie Imler, Lori Ferrell, (Fourth Row) Keith Holland, Vincent Vannoorbeeck, Doug Harrington, Dink Shackleford, Todd Bishop, Russ Heinrich, Tim Culbertson, (Back Row) Allan R. Maki, Jeff Faw, Dan Robinette, Jeff Powell, Steve McKinnis, Don Workman, and Kevin Harrison.

The members of East Tennessee State University's chapter of The Tau Kappa Epsilon started their fraternity in February 1977. This fraternity was founded on January 10, 1899, in Indianapolis, Indiana which is also where their national headquarters are located.

Since their arrival on campus, they have been involved in several activities. Their major events are participation in Homecoming, a fund raiser for the Jobe Hunter Scholarship Fund, an annual Christmas party for the children from the Washington County Human Development Agency and possibly a keg roll for the St. Judes Children Hospital.

The fraternity's colors are cherry red with grey. Their symbols are the carnation and the equilateral triangle which reflects their ideals of brotherhood and fellowship.

They are also looking forward to a new fraternity house that they will move into at the beginning of the year.

This fraternity is the newest one on campus. It has been here for six years and has twenty-five members.

(David Hale)

The members of Phi Mu Alpha are: Cindy Allen, Willie Benson, Julie Ann Birchfield, Tommy Burniston, Skip Campbell, Danna Crane, Andrea Cross, Lance de la Rosa, Terry Dempsey, Mark Foster, Tracy Godsey, Terry Holston, Chris King, Roberta Knaff, David Lester, David Lovelace, Tommy Massengill, Paula Monk, Eloisa Muzquiz, Mike Phillips, Jane Raulston, Donna Simerly, Mark Smith, Ralph Snowden, Greg Stout, Rick Thompson, Mike Thomas, Kathy Urquhart, Pamela Wallace, and Beverly Williams.

PHI MU ALPHA

Phi Mu Alpha is a professional music fraternity founded at the New England Conservatory on October 6, 1896.

The fraternity contributes to the campus by helping with various functions. This year they sold concessions at the Marching Bands of America Band Festival and the Eastman Invitational. They also provided funds for the ETSU Christmas concert and donated funds to the Baptist Children Home.

The purpose of this fraternity is to promote high standards of creativity, performance education, and research of music in America.

The ETSU Color Guard helps to add the final touches to the band by adding original flag and rifle routines. This is the first year that the rifle corps was introduced to the band. Chebella Forney said "I enjoyed being in the color guard because it makes one aware that while you must learn your own individualism, you must also realize the strength in working with others."

COLOR GUARD

(Randall Lewis)

The members of the Color Guard are: (Front Row) Teresa Green, Pam Wallace, Teresa Mahan, (Second Row) Chris King, Audie Crum, Dwayne Stokley, Patnck French, (Third Row) Chebella Forney, Karen Rhea, Roberta Knaff, Lisa Mullins, Debbie Smith, (Back Row) Sharon Mills, Penny Keefer, Alicia Hornbuckle, Gail Jenkins, Karen Cox, Charlie Bruce, and (Not Pictured) Melanie Sauls, Terri O'Donnell, Terri Palmer, Tom Atkinson, Mary Karnowski, Laura Salyer, Debbie Pickle, and Rhonda Klorley.

(Matt Bowman)

(Matt Bowman)

Pepper the Parrot sometimes sneaks up on a band member to help keep the music flowing.

An added attraction of the band is the seven majorettes who twirl and dance while the band performs its intricate formations.

During the games, the band members fill an entire section of seats to cheer the Bucs on.

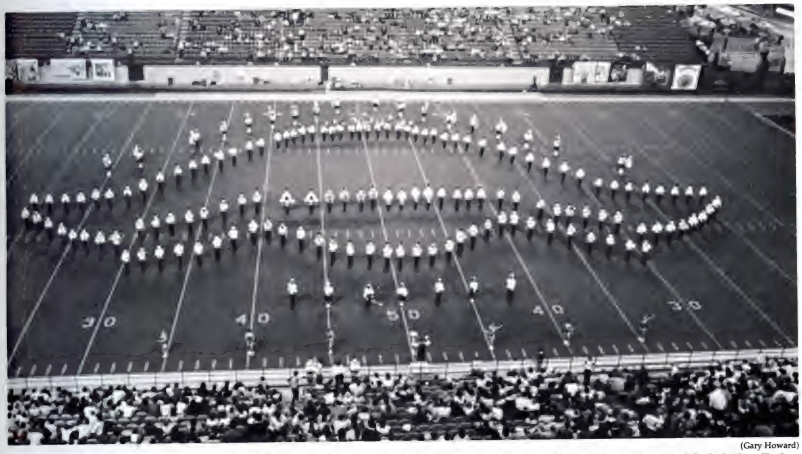
(Ron Campbell)

This year the ETSU Band, under the direction of Joe Hermann, completed a successful marching season.

The band performs at all home games and is one of the most spirited of the groups on campus. Each member displays a dedication to the field show, and it is obvious by the crowd's response that each performance is a success.

The band helps to motivate the football team as well as the crowd.

BAND



(Gary Howard)

The members of the 1983 Marching Band are: Chad Griffin, Mark Foster, Mark Hoskins, Pam Lewis, Tim Ford, Mike Cunningham, Bob Ladich, Fran Taylor, Betsy Gressler, Dean Guthrie, David Lester, Mike Lynch, Nancy Keene, Tommy Burniston, Mike Thomas, Donna Simerly, Julie Birchfield, Paula Monk, Dena Suttles, Cindy Gurkert, Billie Kay Sandidge, Janie Martin, Rebecca Hurley, Dawn Martin, Jane Raulston, Robert Frazier, Jeff Leonard, Teresa Barnett, Tommy Miller, Greg Fritz, Scott Stout, Maria Shell, Maurice Parks, Teresa Bumpus, Ralph Snowden, Willie Benson, Sarah Starnes, Rhonda Brodrick, Sheila Hall, Jan Thomas, Jennifer Stephens, Teresa Farley, Emily Goodwin, Keith Owens, Steve Seward, Robbie Cardwell, Mike Phillips, Scot Fleming, George Augustus, Baby Honaker, Brian Cook, Tim Powers, Belinda Smith, Cindy Allen, Steve Lyons, Jennie Cypers, Mike Vehlein, Kim Stapleton, Greg Stout, Mike Williams, Starlene Casey, Karen Good, Eloisa Muzquiz, Penny Barker, Amy Jacobs, Michelle Ridge, Theona McKee, Chris Harrison, Joe Moore, Tim Heath, Teresa Fleming, Jill Ginder, Sam Richardson, Ted Pobst, Connie Hoskins, Debra Rae Davis, Jeff Turner, Allie Rogers, Kendyl Peebles, Karen McClothin, Sharon Watts, Stephanie Brooks, Betsy Jayne, Jaccie Daniels, Danna Borders, Mary McElrath, McCall Bohanan, Sandy Light, Tim Sutphin, Terry Austin, Skip Campbell, Tim Morrell, Brenda Goodman, Beverly Williams, Edward Brown, Jeff Pearce, Kim Harris, Tim Coffey, C. R. Trammell, Melissa Seife, Nat Llyod, Margret Cavin, Ted Cogdell, David Perdue, Erin Kirk, Blake Coe, Kevin Feathers, Cary Hamic, Judith Williams, Susan Thorman, Tonjua McCullough, Robin Smith, Ramona Dalton, Sandra Williams, Anna Fox, Pauline Douglas, Karen Paulfrey, Lynn Chappell, Joe Baker, Theresa Scott, Lance de la Rosa, David Lovelace, Ken Yarbough, Whit Morrison, Raymond Morton, Greg McPeak, Kerry Miller, Debbie Smith, Gail Jenkins, Terry Palmer, Karen Rhea, Lora Salyer, Audie Crum, Teresa Mahan, Amy Rogers, Lisa Mullins, Roberta Knaff, Tom Atkinson, Mary Karnowski, Patrick French, Dwayne Stokley, Sharon Mills, Charles Bruce, Alicia Hornbuckle, Chebella Forney, Melaine Sauls, Teresa Green, Pam Wallace, Ronda Worley, Karen Cox, Teresa O'Donnell, Penny Keefer, Chris King, Renee Bays, Tammie Pinkston, Sharon Cox, Kimberly Morris, Kim Tunnell, Leslie Moses, Sandra Wilson, Tommy Massengill, and Nancy Herndon.

(Ron Campbell)

The Jazz Singers perform throughout the year for a variety of audiences. Billie Jean Hyder, Brian Wilson, Katherine Patterson, and Bo Reed sing during a Homecoming performance for alumni and students.

Under the direction of Dr. Thomas Jenrette, the ETSU Choir gave a Christmas concert at Munsey Memorial United Methodist Church in December. They performed "Mass in G Minor" by Ralph Vaughan Williams.

(Larry Smith)

CHOIR AND JAZZ SINGERS

The ETSU Choir and Jazz Singers are two organizations on campus that help to promote ETSU. Each group introduces a wide variety of music to the community as well as to the students, faculty, and staff.

The ETSU Choir is made up of 117 members and is under the direction of Dr. Thomas Jenrette. During the school year, the choir performed at Seeger Chapel, on the campus of Milligan College, and Central Baptist Church. In December, they gave a Christmas concert at Munsey Memorial United Methodist Church, featuring "Mass in G Minor" by Ralph Vaughan Williams.

The Jazz Singers have 16 members as well as a 10 member band. They entertain various civic and private organizations along with providing concerts for ETSU students. This year the Jazz Singers performed for the United Way, the Chamber of Commerce, and the Dawn of Hope. The Jazz Singers' repertoire includes such diverse songs as Diana Ross' "Ain't No Mountain High Enough" to Toto's "Rosanna." The group also specializes in choreography to enhance their performances.

Both the Choir and the Jazz Singers performed in a Spring Concert for ETSU. The selections included music for all ages and featured a medly of patriotic songs.

(Larry Smith)

The members of the Jazz Singers and their musical accompaniment are: (Front Row) John Mark Crawford, Patrick French, Tim Morrell, Donna Simerly, Stacy Hobbs, Logan Brown, David Perdue, Kathy Urquhart, Mark Hoskins, Chip Justus, (Back Row) Debbie Pierson, Scott Young, Carla Campbell, Ted Pobst, Andrea Cross, Richard Gray, Mark Smith, Vicki Sells, Mark Garland, Jackie Hampton, Charles Chambers, Katie Birchfield, Brian Wilson, Billie Jean Hyder, Bo Reed, and Katherine Patterson.

ALPHA LAMBDA DELTA

(Adrienne Lopez)

The members of Alpha Lambda Delta are: (Front Row) Charlotte Patterson, Ruth Dessart, Beverly Greenwood, Wendy Turner, Pam Prince, Ronda English, Jim Venable, (Second Row) Elva Blankenship, Karen Dyer, Carol Thagard, Kelly Moncier, Anita Hawk, Wendi Price, Barbara Burgus, (Third Row) Lisa Fairchild, Donna Haynes, Sherrie Greear, Sherry Robbins, (Fourth Row) Helen Hollingsworth, Valerie Lewis, Katrina Shoemaker, Bonnii Rogers, Dianna Brown, Teri Odom, (Fifth Row) Deborah Morton, Suzanne Walters, Janet Phillips, Lora Myers, Richard Greeve, Amanda Foster, Bertie Hazelwood, (Back Row) Ralph Snowden, Harry Farthing, Brenda Thomas, Randall Lewis, Karen Paulfre, Maureen Donahue, and Debbie Clouse.

Alpha Lambda Delta is a national society which honors high scholastic achievement during the freshman year in college. Its purpose, which is in the organization's constitution is "to encourage superior scholastic achievement among students in their first year in institutions of higher education, to promote intelligent living and a continued high standard of learning, and to assist men and women in recognizing and developing meaningful goals for their roles in society."

This society was founded as an honor society for freshmen women at the University of Illinois in 1924. After chapters were started at Purdue in 1926 and DePaul in 1927, it became a national organization. In 1975, men were admitted to Alpha Lambda Delta. Now, the organization has 195 chapters and well over a quarter of a million members.

In order to get into Alpha Lambda Delta, freshmen must meet the qualifications standard. The standard is to have no less than a 3.5 average (a 4 being an "A") on a full load over a school year.

Once a person is a member of this group, the person has a lifetime membership and may remain active through the rest of their collegiate years.

After initiation, a member pays a 10 dollar initiation fee which pays for a membership certificate and a group key.

GOLDEN GIRLS

(Ron Campbell)

The members of the Golden Girls are: Kristy Hodge, Karen Root, Patricia Keith, Stacy Caruthers, Kim Sartain, Sandy Ragin, Teresa Hill, Cindy Shepard and Kellie Carey.

The Golden Girls are a dance team made up of nine ETSU students who dance at home basketball games and, when asked, they do community performances. Last year, the Golden Girls were guest entertainers at the sororities' Pike's Peak celebration.

The girls dance mostly to jazz music and their performances include acrobatic steps. This year, their show will include production, western, and the 50's style of dancing. The routine changes every week and it requires an hour to an hour-and-a-half of practice a week to work up a new routine.

There are four requirements to become a Golden Girl. Each girl must be an ETSU student, must be able to dance well, must have a nice figure and be able to project their personalities into the audience. Each girl must also be able to pass a dance audition before they can become a member of the dance team.

In order to finance the Golden Girls, the team receives some money from the basketball team's budget. The rest of the team's expenses are met by the girl's own personal finances. Some help was given to the Golden Girls by some ladies who made costumes for the dance team's performances.

ETSU has had several dance teams to perform at the home basketball games over the years. This is the Golden Girls second year of performing.

PRESIDENT'S PRIDE

(Adrienne Lopez)

The members of President's Pride are: (First Row) Jana Johnson, Debbie Brooks, Dianna Bourn, (Second Row) Jim Venable, Becky Burnette, Debbie Clouse, Maureen Donahue, John Cinkus, Kellie Brown, Cathy Hyder, Tracy Robinson, Dr. Bob McGinnis, (Back Row) Chris Hutchins, Brenda Street, Katherine Lonsbury, Amanda Foster, Deanne Morgan, Tess Davenport, Sherry Robbins, and Tim Powers.

President's Pride is an organization made up of 35 graduate and undergraduate students specially chosen to represent the university to the community. It was started in 1978 by former ETSU president Arthur DeRosier.

President's Pride is rather unique. Unlike most university groups which stress academics or athletics, President's Pride members must be well rounded students in order to represent the university more effectively. Some of the requirements to be a member of President's Pride are to have leadership ability, to be good ambassadors and, most importantly, be enthusiastic about ETSU.

There are three main functions of the organization. The first is to serve, at the president's discretion, at special events in public relations matters. The second is assisting the Admissions Office in areas of pre-college admissions orientation and tours. The last is to serve the university in other functions at the discretion of President's Pride members.

It is difficult to become a member of President's Pride. A student, with a 3.0 grade point average, must first be nominated by a faculty member or a current President's Pride member. The students then fill out a questionnaire and make an appointment for an interview which will determine if a student will be accepted. To renew membership, the current members of President's Pride must undergo an annual review. Membership is limited to 35 students.

ACM-IEEE

ACM-IEEE

The Association for Computing Machinery and the Institution of Electrical and Electronics Engineers, Inc., is an organization of computer science and technology students working towards developing their professional careers.

ALPHA SIGMA IOTA

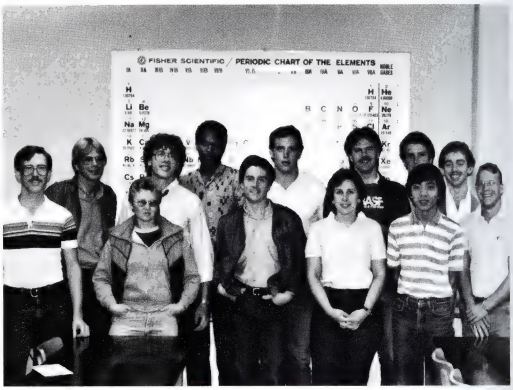
ALPHA SIGMA IOTA

Alpha Sigma Iota is the professional society of broadcasting majors and those interested in broadcasting. ASI holds a variety of functions to promote interest in broadcasting, highlighted by an annual picnic. Tom Headly is the faculty adviser.

AMERICAN CHEMICAL SOCIETY

AMERICAN CHEMICAL SOCIETY

The American Chemical Society promotes an interest in chemistry at ETSU and serves as an outlet for chemistry majors, minors, pre-professionals and interested students. The organization was founded February 4, 1954, and presently consists of 30 members. One of the organizations major accomplishments was attracting and sponsoring the only Nobel Prize winner to ever visit ETSU.



BLACK AFFAIRS

BLACK AFFAIRS

The Black Affairs association is an organization that helps to maintain dignity and respect for the black race. They participate in a wide variety of campus and community affairs.

BUCCANEER

BUCCANEER

The Buccaneer is the student produced yearbook of the university. Fifteen students worked throughout the year in writing, photographing, and laying out the publication. Deborah Morton is the editor and Dr. Murvin Perry of the communications department is the faculty adviser.

CAB

CAMPUS ACTIVITIES BOARD

The Campus Activities Board is an organization that plans a wide variety of campus entertainment. This year they sponsored weekly movies, several concerts, and dances.

CAB OFFICERS

CAMPUS ACTIVITIES BOARD OFFICERS

The CAB officers are the main planning body of the Campus Activities Board. They supervise and coordinate all activities sponsored by the CAB and are responsible for attracting various forms of entertainment to campus.

CATHOLIC CAMPUS MINISTRY

CATHOLIC CAMPUS MINISTRY

Providing a medium for Christian fellowship is the goal of the Catholic Campus Ministry. It is composed of more than 100 students and faculty members and has been on campus for more than 19 years. The CCM provides weekly masses for its members in the University Center as well as joint meetings with the Episcopal Ministry. The CCM is also quite active in Oxfam and various other projects to promote world peace and prosperity.

CAMPUS CRUSADE FOR CHRIST

CAMPUS CRUSADE FOR CHRIST

Campus Crusade for Christ is an organization to bring spiritual encouragement and growth to students on the campus of ETSU through Jesus Christ. The group has 125 members and has been in operation for 15 years. They also meet regularly for training sessions every Tuesday night.

CHRISTIAN STUDENT FELLOWSHIP

CHRISTIAN STUDENT FELLOWSHIP

The Christian Student Fellowship, made up of 60 active members and in operation for 22 years, encourages students to believe and share the message of Jesus Christ. It has meetings every Wednesday and Sunday. The CSF will hold retreats and seminars on religious authors. It will also participate in the World Vision and Oxfam which are both groups that try to relieve world hunger.

CLUB CERVANTES

CLUB CERVANTES

The Spanish Club (Club Cervantes) is an organization of students and faculty interested in the Spanish language and culture. They promote campus and community interest in the Spanish language.

CRIMINAL JUSTICE SOCIETY

CRIMINAL JUSTICE SOCIETY

The Criminal Justice Society plan to hold socials, to listen to guest speakers and have a Law Observance Day. The Criminal Justice Society promotes professional excellence among criminal justice students and members. This organization has 30 members and has been active at ETSU for 15 years.

DELTA SIGMA PI

DELTA SIGMA PI

Delta Sigma Pi is the business fraternity on campus which is made up of 14 students and has been active for 25 years. This fraternity was organized to help the study of business in universities. They meet on Tuesdays and listen to professional business speakers and tour local businesses.

EPISCOPAL MINISTRY

EPISCOPAL MINISTRY

The Episcopal University Ministry is the campus organization for Episcipal students and faculty members and those interested in the Episcopal faith. As an organiztion, the Episcopal University Ministry is very active in the annual Oxfam Fast for World Hunger as well as other varieties of campus and community religious activities. The ministry also participates in Homecoming and other social events on campus and surrounding areas. Highlights of the year include ski trips as well as a yearly retreat to Hemlock Haven in Virginia.

EPSILON NUETA

EPSILON NUETA

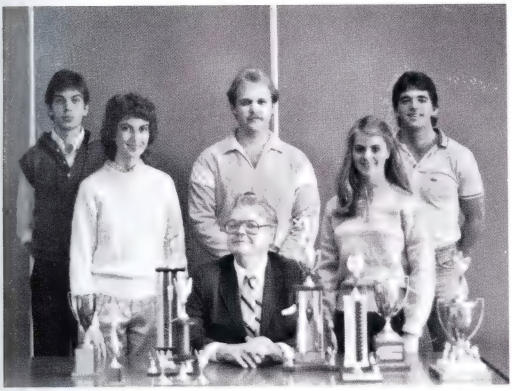
Epsilon Nueta is the organization related to environmental health. It recognizes and encourages interest in the advancement of environmental health. It is made up of 20 members and has been in operation for five years. This organization plans to have speakers at their meetings. They have awarded Congressman Albert Gore of Tennessee an honorary membership to recognize his efforts in environmental health.

FCA

FELLOWSHIP OF CHRISTIAN ATHLETES

The Fellowship of Christian Athletes strive to make the Gospel of Jesus Christ known to athletes, coaches, and others who are interested. They also try to teach each other how to apply the Gospel to their lives. This year, their activities will include Bible studies, homecoming participation and a winter retreat to Gatlinburg.

FORENSICS TEAM



GEO-SCIENCE CLUB

GEO-SCIENCE CLUB

The Geo-Science Club is interested in earth sciences and tries to gain a better understanding of the earth as man's home. The club has 25 members and has been at ETSU for 15 years. This organization plans to have a series of field trips to local areas, have lectures about geology and geography and have social events to allow students to meet the faculty.

GERMAN CLUB

Der Deutsche Klub (The German Club) is presently made up of 52 members and promotes an interest in the German culture, language, and customs among the students at ETSU and residents of the community.

GERMAN CLUB

HOME ECONOMICS ASSOCIATION

This organization encourages and promotes a wider and better understanding of home economics. It tries to reach individuals and the nation to promote its ideals. The HEA is currently made up of 50 members. This organization holds monthly district and state meetings and conventions.

HEA

KAPPA DELTA PI

KAPPA DELTA PI

Kappa Delta Pi recognizes outstanding contributions to education. It is made up of 147 students and has been in operation for the past 36 years. Kappa Delta Pi will have two initiations this year. They will also have several fund raising activities to raise money to support the Good Schools Research Project. This organization will also attend the 34th Biennial Convocation of Kappa Delta Pi in Montreal, Canada.

KAPPA OMICRON PHI

KAPPA OMICRON PHI

Kappa Omicron Phi aids the interest of home economics and scholastic excellence and recognizes and developes leadership abilities. The goals of the honor society are to help foster professional activities and interests. It also promotes fellowship among the faculty, staff, and students interested in the profession.

NFSSW

NATIONAL FEDERATION OF STUDENT SOCIAL WORKERS

The NFFSW is an organization in which social work majors can serve the community and the university while exploring their fields of interest. It is made up of 15 members. The NFSSW conducts a drug and alcohol program for University High School, has a social work library, holds food and clothes drives and has other projects for community families and organizations.

PHI BETA LAMBDA

PHI BETA LAMBDA

Phi Beta Lambda attempts to prepare business students for the business world. It is comprised of 53 students and has been active for 27 years. The activities that Phi Beta Lambda plan for this year are mock interviews, a spring banquet, and leadership conferences that will be held in Gatlinburg.

PI SIGMA ALPHA

The political science honor society, Pi Sigma Alpha, is made up of 40 members and has been in operation for eight years. This society recognizes academic and professional excellence in the field of political science. It promotes its membership by having academic and social activities such as participating in homecoming, holding banquets and having a Latin American lecture series.

PI SIGMA ALPHA

PRE-PROFESSIONAL SOCIETY

The Pre-Professional Society is designed to provide, social and academic opportunities for students in pre-health professions such as dentistry and pharmacy. It provides not only academic advantages but also social interaction between students and faculty.

PRE-PROFESSIONAL SOCIETY

PSYCHOLOGY CLUB

PRSSA

PUBLIC RELATIONS
STUDENT
SOCIETY OF AMERICA

The Public Relations Student Society of America has 10 members and has been in operation for six years. This organization acquaints students and professionals with methods, issues, and ethics of public relations.

RANGERS

The Cpt. Eddie Reed Ranger Company, which is affiliated with the ROTC, is made up of 34 members and has been active for four years. The company is named after Capt. Eddie Reed who was commissioned at ETSU, became a ranger in the U.S. Army and died in 1968 during the Tet offensive in Viet Nam. The Rangers practice all phases of military training including formations, patrols and ambushes, survival techniques, and first aid. They plan to go to a field training exercise in Fort Bragg, N.C. and practice waterborne and snow skiing operations.

RANGERS

RESIDENT HALL ASSOCIATION

RHO LAMBDA

RHO LAMBDA

Holding dinners for graduating seniors and color analysises for its members are just some of the activities of Rho Lambda. This organization of 24 members became a nationally recognized honor society in 1975 and came to ETSU's campus in 1976. Rho Lambda's purpose is to honor full-time undergraduate women with a quality point average of 2.3 to 4.0. These people must also demonstrate leadership ability and be loyal to the Panhallenic and their sorority. Women who are not sorority members can be honorary members if they meet the same criteria.

ROTC

ROTC

The 1st Battalion, 1st Brigade of the Reserve Officer Training Corps (ROTC) is made up of a total of 63 military science students. The first goal of the ROTC is to train students military skills in preparation for advanced camp under the U.S. Army. The final goal is to train the advanced students in staff and command procedures in preparation for commissioning for active or reserve duty in the U.S. Army. The ROTC have planned several field training exercises, a military ball, a dining in, and an invitational drill meet.

SADHA

SCABBARD AND BLADE

SCABBARD AND BLADE

Scabbard and Blade, M. Company, 11th Regiment, plans to hold a dining in, a military ball, and conduct community service projects. Scabbard and Balde is a military honor society that tries to form a professional bond between the armed forces cadets and their officers through community service, pursuit of military excellence, and dedication to efficiency, loyalty, obedience, courage, and good fellowship. There are 21 members and eight alumni members in Scabbard and Blade. It has recently celebrated its 30th year in operation.

SGA

SGA

The Student Government Association is made up of 32 senators and eight cabinet members. The association gives the students a medium in which to express themselves to the university administration. Some of the goals that the SGA have are to improve communication between the students and the university administration, make SGA activities more known and establish an honor program to recognize students with high grade point averages but who do not get recognition on the dean's list.

SIGMA DELTA CHI

SIGMA DELTA CHI

Sigma Delta Chi is the society of professional journalists which includes 15 members and has been active at ETSU for eleven years. Sigma Delta Chi strives to advance freedom of information, stands guard for a free press, fosters ethics for journalism, and educates both on and off-campus journalists. Sigma Delta Chi will help sponsor a communications workshop for high school students, participate in an honor program for journalists, and present the Freedom of Information Award to a non-journalist person.

SOCIOLOGY CLUB

SNEHA

STUDENT NATIONAL ENVIRONMENTAL HEALTH ASSOCIATION

For the past eleven years, the goals of the SNEHA have been to actively promote the improved health and welfare of the campus, community, and nation through participation and education in the concepts of environmental health. SNEHA is open to any student regardless of his major.

TRI-BETA

TRI BETA

The Pi Delta chapter of Tri-Beta serves as an honor society for persons involved in the biological sciences. This organization helps promote interest, scholarly attainment and investigation in biology. The club has 28 undergraduate, three graduate, and eleven faculty members.

The Varsity Cheerleaders show their expectations for a successful new football season.

(Matt Bowman)

(Ned Jilton)

With support from the sidelines, this intramural player struggles to catch the ball.

The word "sports" evokes many different memories for many different people. For some, the thrill of participation is one of the best memories of their college time. For others, cheering the team of their favorite sport to victory or mourning with their team over a loss makes a lasting memory.

This year, sports fans saw some sports activities dropped. Budget cuts made it impossible to continue the golf team and the gymnastics program. But there were also good memories. The football team's Homecoming win gave fans the sweet taste of victory.

Victory also included jogging, tennis, and other activities for all who wanted to participate.

(Randall Lewis)

This Lady Buc is ready to show the opposing team how to spike the ball with a good technique.

SPORTS

Hot 'n' Cold

by Dennis Stark

Controversy racked the 1983 baseball team throughout the season. That was due to the Athletic Program Review Committee's recommendation that the sport be curtailed and cut back to almost half its 1982-1983 budget. This included a scheduling of only 27 games compared to 1983&s 56 games and cuts in both scholarship money and travel expenses.

Under those conditions, 1983 Head Coach Charley Lodes resigned effective June 1983. In discussing the fate of the players with the administration, Lodes recommended that the sport be dropped from the program. But ETSU's baseball program remained when the dust had finally settled over the issue.

Under these conditions, Lodes had a schedule so tough for his team to play, that if he had been able to play all 56 games, it would have hurt the team's record even more. Going against perrenial playoff powers on an assumed 13 game trip through the South, the Bucs dropped seven of eight contests.

Bad weather forced the cancellation of some games and then, better teams beat the Bucs in their first seven games. Ole Miss., Mississippi State, Tulane (three losses), New Orleans, and Middle Tennessee State took turns handing the Bucs successive losses. The Bucs took one game from MTSU's Blue Raiders before returning home.

That win was followed by eight more victories. Wins over Milligan sandwiched a thumping of George Washington. Liberty Baptist fell twice to the Bucs next. The Battlin' Bucs then opened their Southern Conference campaign with two wins over Appalachian State. The ninth victory in a row came over Tennessee Tech, 13-8.

Now with a 9-7 record, things looked like they were coming around. But Tennessee Tech beat the Bucs 14-8 in a rematch. The men of spring then headed to Clemson to take on the Tigers in a three game set. The Tigers scratched their way to three successive victories and sent the Bucs back home with a 9-11 record.

VMI was the unfortuante victim of a bunch of ruthless assaults by the Bucs. The Keydets hopped home after suffering 17-2 and 11-5 setbacks. The Davidson Wildcats were next in line and the Bucs made them look like tabbies by bombing them 14-1 and 11-3 in a doubleheader. With a six win, no losses Conference slate, Marshall came to Johnson City to face the Bucs.

After passing the Herd 15-3, the Marshall team thundered back to win the second game 3-2 on a controversial play that scored them two runs. That loss was the first of four as the Bucs fell to Tennessee and Virginia Tech respectively.

The Bucs headed to a crucial showdown with the Citadel's Bulldogs in Charleston, SC; and lost the first game of a doubleheader, 5-3. The Bucs kept their Conference title hopes alive by dropped the Bulldogs 7-5 in the second game. Their Conference record stood at 8 wins and 2 losses.

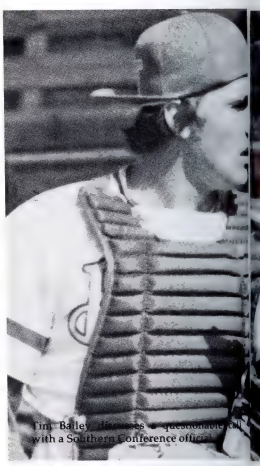
Two wins by forfeit over Tusculum hurt the Bucs as they only earned a split with Western Carolina. The third loss meant no conference title and no playoffs. An 18-16 record would not get any notice from the NCAA Playoff committee.

The Bucs fell to Tennessee 11-10 in 10 innings before the Bucs beat Tennessee Tech 12-4. The Bucs then closed their season with a split against Va. Tech. The Hokies won the last game in 12 innings, 10-9. The record of the team stood at 29 and 19.

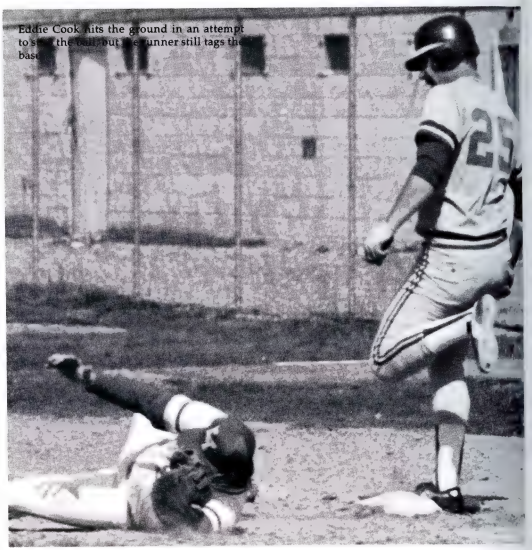
In an up and down season, some bright spots could be found. Mike Nipper had 21 home runs and was the leader in RHI's with 61. Only Tony Martin (.418) carried a higher batting average than Nipper (.368).

The pitching duties were shared between Pat Mckinley, Russell Burke, Phil Pierce, and Jeff Brintle. Pierce was the workhorse starting 12 of 36 games; but he only finished with a 3-4 record.

McKinely appeared in 18 games as a starter and a reliever with a 5-3 record and a respectable 4.46 earned run average. Brintle had a 4-4 mark while Burks finished the season at 4-3. Frank Borbeck was 2-2 in spot action duty.



Tim Bailey [illegible] a questionable call with a Southern Conference official.



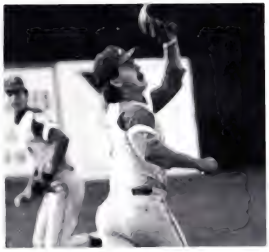
Eddie Cook hits the ground in an attempt to stop the ball, but the runner still tags the base.

Streaks Mar Controversial Season

Jeff Barr grimaces with pain as he narrowly escapes the tag and makes it to second base.

Jeff Brintle shows the pain, dexterity, and concentration required of an ace pitcher.

(All Photos by Ned Jilton)



Mike Nipper jumps for a high fly ball. Nipper graduated in 1983, and he now plays for the Atlanta Braves' farm team.

Chris Hurst tags first in a game against Coach Harold Stout's former team, the Milligan Buffaloes.

(Ned Jilton)

Mike Nipper makes the tag.

Baseball Coach Carries Long List

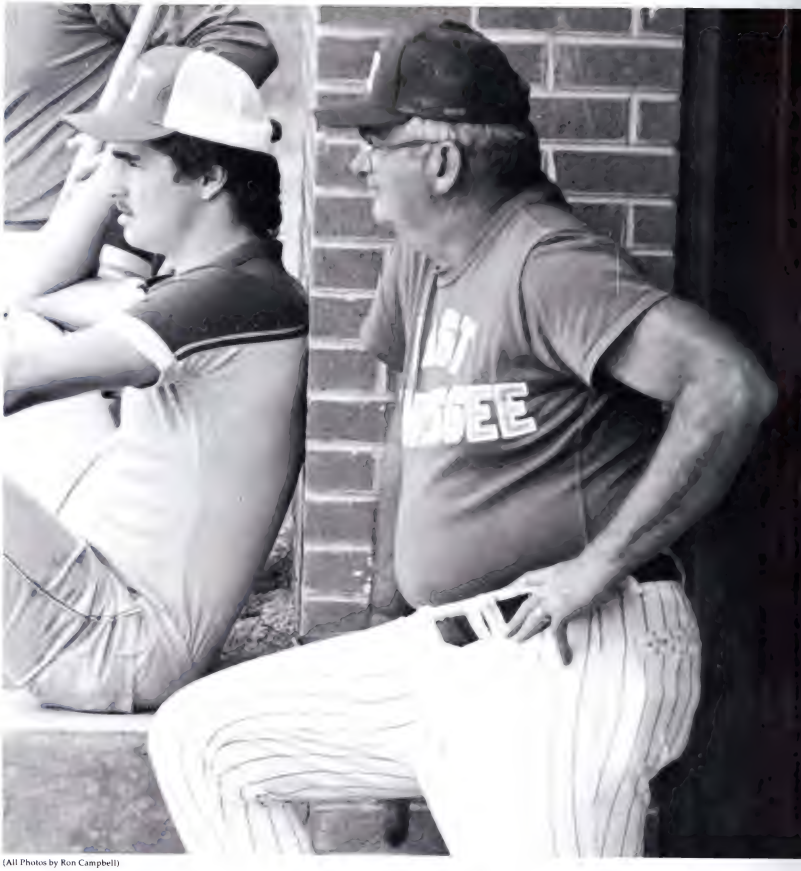
by Dennis Stark

The ETSU Baseball team will feature a new head skipper this year. The new man in charge will be former ETSU student, Harold Stout.

Stout is a likeable man. He beams baseball. It is a sport that has been a big part of his life since he picked up a glove back a few years.

Stout was born in neighboring Carter County. He attended Elizabethton High School and was a four year recipient of letters in football, basketball, and baseball. It seems he was a natural born athlete. So much so that he was named to the Tennessee All-State team not only in baseball, but also basketball in his senior year.

From Elizabethton High, Stout enrolled at ETSU. Here, he continued to stand out in both baseball and basketball. (He didn't play basketball his freshman year). As a left-hand pitcher, Stout recorded a 35-9 won-loss record for the Bucs when they were a member of the Volunteer State Athletic Conference (VASC).



(All Photos by Ron Campbell)

# of Honors

Stout was an All-Conference selection and was also an honorable mention All-American in 1956, his senior year when East Tennessee State College was an NAIA member institution.

He earned his Bachelor of Science degree from ETSU in Physical Education in 1956. From there, he went to the University of Tennessee (Knoxville) and earned his Master's degree in 1959 in both Physical Education and Education. He also earned his Doctorate (Ph.D.) from ETSU in 1974 in Education and Administration.

In the fall of 1959, Stout was hired by Milligan College to rejuvenate the baseball program there. This he did remarkably well, building the Buffaloes into VSAC powerhouse every season virtually.

The past 24 years have been Stout years at Milligan. In those 24 years, he had only three losing seasons. On the other side of the coin, he was the outright winner of the VSAC title or runnerup to the champion 15 times. He averaged an impressive 20 wins a year as skipper of the Buffaloe's.

Stout not only coached baseball, he served as basketball coach at one point for three years. The team improved each year under his guidance. However, his first love was baseball and he decided to hand basketball over to someone else.

For the past 15 years, Stout had also served as the Athletic Director of the Milligan Sports Program. It was a job he enjoyed and performed tremendously.

Stout had an impressive 479 wins to only 273 losses at Milligan for a winning percentage of .600. Some of the titles he reaped were VASC Coach of the Year numerous times as well as NAIA District 24 Coach of the Year in 1972, 1973, and 1977.

So what made a very successful man at Milligan leave a place he had grown to love? "I've always been proud of my alma mater and now I have the chance to serve it in a new way," he added.

When former skipper Charley Lodes resigned, Stout was one of the first to apply. Since he was a former student, had lots of connections in the area, he was named the new head baseball coach on July 1 of this year.

"I'm very excited about the prospects of ETSU baseball this year," said Stout. After coaching baseball at Milligan for 24 years, you would think the desire is almost gone to be a coach. Not true, the fire burns brighter than ever, "I look forward to help rebuild an already respected program here at ETSU," said Stout. "We have a lot of newcomers and some good returning lettermen that can help us," he added.

This past fall, the Bucs in early baseball games were 7-0. "There's definitely enthusiasm here," says Stout, "I had 57 players try out for the team."

When Stout is not coaching, recruiting and traveling, he enjoys spending time with his family. "We like to do things a family can do together, like bowling or swimming," he said.

Stout is married to the former Teresa Walker. They have three children, Tony, 15: Anlyn, 11, and Stephanie, 10.

With such a long list of accomplishments, it can only be a short matter of time before the ETSU baseball team regains the heights it enjoyed not so long ago. With the enthusiasm of Stout, it could be very soon.

Coach Harold Stout, newly named coach of the Buccaneer baseball team, looks pleased with his team's performance during a fall scrimmage game.

Stout gives a concentrated look toward home plate as a ball hurls past his head.

With a puzzled look on his face, Coach Stout contemplates his next move for the Buccaneer batters.

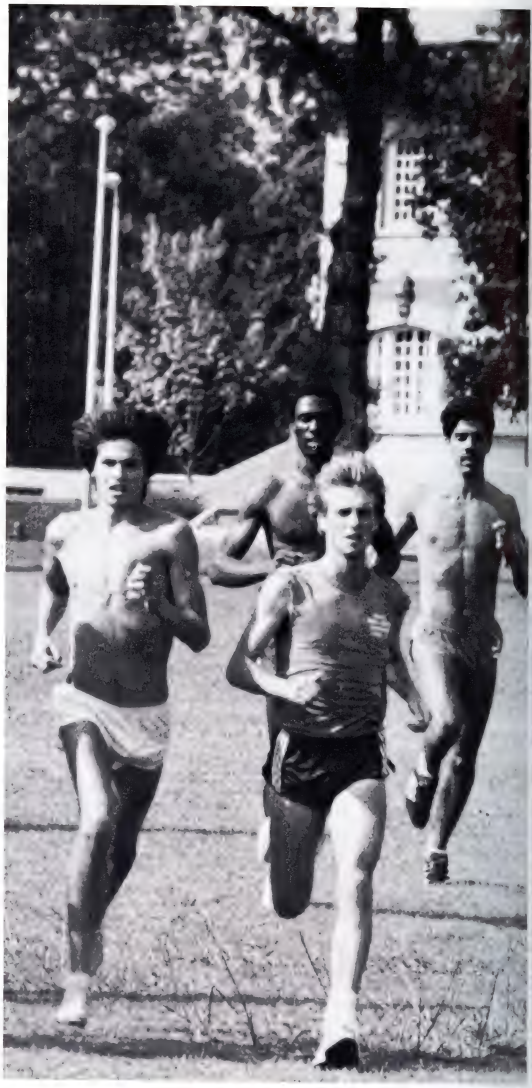
The 1983 men's outdoor track team was very small in number but showed plenty of talent. While the talent was there, only one was fortunate enough to earn a trip to the NCAA Championships held in Houston, Texas.

That man was senior Kevin Johnson of Newport News, Virginia. Johnson ran many miles and 1500 meter races setting personal bests at the Florida Relays in Gainesville, Florida with a 3:58.4 mile nad late in the season at the Virginia Relays with a fine 3:40.9 1500 meter clocking. At the NCAA Championships, he squeezed into the 1500 meter finals, but after a long season, could only muster enough energy to place 12th overall.

Some other distance runners (for which ETSU is famous) came close to qualifying but narrowly missed. Carey Nelson, a sophomore, has a personal best of 14:06 in the 5000 meter, yet he still missed qualifying by just under nine seconds. Dennis Stark missed the NCAA standard by a whisker in both the 1500 and 5000 meter runs. Needing 3:43.7 and 13:57.7 and 3:45.0 in the 1500 meter and 14:00.6 and 14:04 in the 5000 meter events.

James Barham, a freshman sprinter from Knoxville, showed his raw speed late in the season. At the Southern Conference Championships, Barham raced to both the 100 meter and 200 meter titles in the span of 40 minutes. His 200 meter time of 20.99 seconds was a mere nine one-hundredths of a second off the NCAA qualification mark.

Two new school records were also set in relay events at the Domino's Pizza Relays at Florida State University. On the first day, the quartet of Conrad Connely, Bernard Dunne, Stark, and Johnson eclipsed the 4x1 mile relay school record set the year before. They clocked 16:26.8 to the old Buccaneer mark of 16:27.4. The very next day, Stark, Barham, Conneely, and Johnson broke the distance medley relay mark by five seconds in posting a time of 9:38.1 for the event.



Several members of the ETSU men's track team practice their distances in the Veterans Administration Park. The park is located next to the campus and open year round.

Close . . . But No Cigars

by Dennis Stark

The 1983 men's indoor track team had a second place finish in the Southern Conference Championships at Virginia Military Institute last year. It was the highlight of a short season that saw two of their proposed meets snowed out.

Individually, there were some sterling performances by a number of Buccaneer athletes. Kevin Johnson opened the season with a third place finish in the Eastman Invitational's mile run in front of an enthusiastic and partisan home crowd. It was the first sub four minute mile run by Johnson ever. He followed that with a victory in the Mason-Dixon Games in the mile race and culminated his year with a third place finish in the NCAA Indoor Championships in Pontiac, Mich. attaining All-American honors.

Snow forced the cancellation of the West Virginia Classic and the Indiana Indoor Invitational. So, with not much racing experience, the Bucs went with guarded optimism and only eleven competitors to the Southern Conference Indoor Championships.

On the first day, Dennis Stark, James Barham, Brian Dunne, and Kevin Johnson scored a come from Behind victory in the distance medley relay despite a muffed hand-off between Stark and Barham in the baton exchange. Then an hour and a half later, Stark, Carey Nelson, Conrad Conneely, and Gerry Duffy made a 1-3-4-5 finish in the 3000 m race. Stark set a new record for the distance with a time of 8:06.8 indoors, Mike Mansy, Paul March, Dunne, and Johnson placed second in the two mile relay just a second behind the winning VMI quartet.

The second day of events saw VMI rack up points in the events that ETSU did not contest. But in every event the Bucs did try, ETSU nearly came home a winner every time. Stark and Johnson led a 1-2-4-5 Buccaneer romp in the 1500m race. Stark broke his own record by running 3:49.2 to earn the win. Then to the delight of his teammates, Barham nosed his way to claim the 60 yard title. Nelson, Stark, Johnson, Dunne, and Duffy made it a first through fifth affair in the 5000m race respectively. Bob Sulfridge claimed sixth place and a point in the triple jump to complete the scoring. VMI won the team title with 225 points, but the Bucs grabbed second with 104 points.

Coach Dave Walker has developed the ETSU men's track team into one of the top teams of the Southern Conference as well as in the nation.

East Tennessee runner Dennis Stark performed well during the 1983 Eastman Invitational Track Meet, but he received three gold and one silver medal for his performance at the Southern Conference Indoor Championships.

Dee Fox mentally prepares herself for a strenuous run through the Veterans' Administration Park.

Coach Tom Roberts watches his ladies intently for imperfections in their running technique.

The Lady Buccaneer's Track Team uses the Veterans' Administration grounds as a practice field. The grounds are open to all runners in the community.

Injuries and Motivation

by Dennis Stark

The 1983 women's track team was smaller than ever due to injuries. But one girl was able to qualify for the NCAA Outdoor Championships. Kim Bird, a junior from Antigonish, Nova Scotia, Canada waltzed her way to a respectable 15th place finish in the 10,000 meter race in Houston, Texas.

In the latter parts of the spring semester, it takes a lot of dedication to go to the track at 3:30 in the afternoon with the temperature in the 85-90 degree Fahrenheit range and workout on the track. Especially when you have to work out with the guy's team and all your friends are laying out in the sun.

But for Ms. Bird and Dee Shipley, working out was an everyday chore. For Ms. Bird, it paid dividends last year as she went to the NCAA's, while Ms. Shipley posted some personal best times and hopefully she will be able to qualify for the outdoor championships this spring.

Beth Wilson and Tracy Klos worked out with Betsy Baymiller in the sprints. Linda Preston, a senior from Toronto, Ontario, saw little action to aggravating injuries. Many of the others who ran cross-country or trained in the fall could not be found and Coach Tom Roberts had to make do. With some new recruits this coming year, perhaps women's track can make a big step in the right direction.

A Buc runner takes a breather during a practice session.

The Bucs warm up to prevent injury.

Running sprints takes its toll on the faces of these women.

On the Road to Respectability

by Dennis Stark

If you thought the men's tennis team was young, the women's team was practically fresh out of high school. With the graduation of senior players like Donna Arnold, Lea Bailey, Brennan Crump and Kaye Figg over the past two years, the outlook was dim for the 1982-83 year.

With Shari Beck as the team captain, the other five seeded players were all new to the ETSU line-up. Four of the five came straight out of high school. The other number one seed, Dina Robinson, was a transfer student from the University of Charleston, where first year Coach Dan Warner also came from. Despite their youthfulness, the women were 16-19 in overall action. Four of those losses were agonizing 4-5 decisions which could have meant the difference between a winning season and a losing one.

Robinson, as the number one seed, drew the toughest of the opponents competition. She did reasonably well, with a singles record of 15-18. Teamed with her doubles partner Cheryl Cook, she had a great deal more success and ETSU's number one doubles team came away with a superb 21-9 record. Cook, in the number two position, found the going rough and was 11-21 in singles play.

Tracey Parris and Cindy Morgan, held down the number three and four positions. Parris, an Athens TN native, had a respectable 14-17 singles record but only an 8-18 doubles record. Morgan was superb in singles play sporting a 21-14 record. Again, her lack of experience hurt her doubles play as she was 8-25.

Team captain Shari Beck was 16-18 in singles play in the number five position. In doubles play she was 14-16.

The other girls who saw action were Renee Kline (4-2, 4-9); Patti Heaton (1-1, 2-1); Robin Campbell (0-1, 0-1); and Jamie West (0-3, 0-2).

The girls ended up 3-5 in action against Southern Conference schools including a 2-1 record over arch rival Appalachian State.

(Ron Campbell)

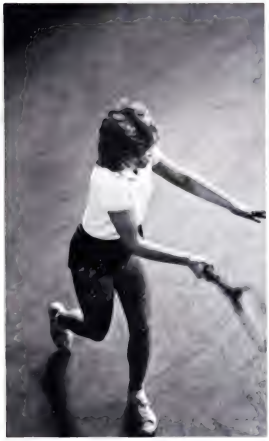
Two-hand backhand return is one of the most difficult shots to master. This Lady Buc follows through effortlessly with a feather light touch.

(Ned Jilton)

Although only a practice game, Dina Robinson goes that extra inch to return a difficult shot.

(Ned Jilton)

The number one women's seed, Dina Robinson top spins a serve. Dina ended the Lady Bucs season with a singles record of 15-18.



(Ron Campbell)

The forehand return is one of the basic shots in tennis. The proper footwork and follow through are essential to its success.

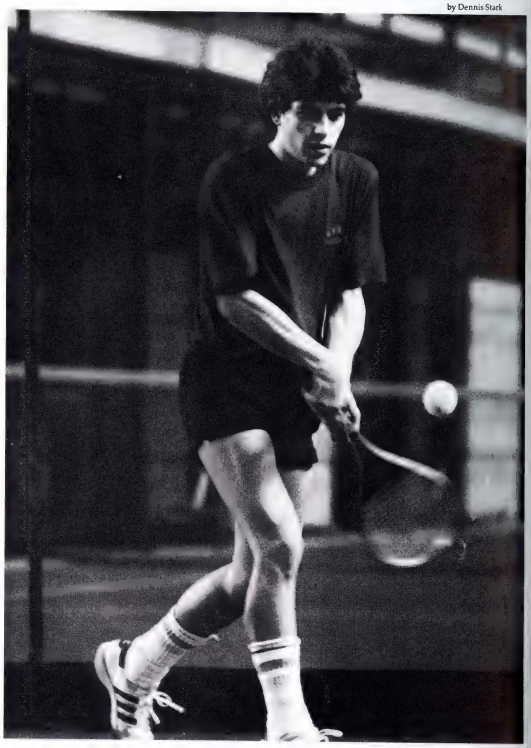
Young Team Holds Their Ground

by Dennis Stark

The 1982-83 men's tennis team consisted of a lot of young players. Despite their youthful line-up, the Bucs more than held their ground with a 23-13 overall record. But when it came time to enter the Southern Conference Tournament, the more experienced squads of Davidson, UT-Chatanooga, Marshall, and Western Carolina pounded out decisions over the Bucs on a soft court surface.

Coach Dan Warner had the men play a lot of matches before the conference season started. The Bucs showed their mastery over schools like West Liberty with 9-0 shut-out victories. Close losses came to some well respected tennis schools like Eastern Kentucky, Kentucky, and Ohio State. Heartbreaking 4-5 losses came against tough West Virginia, Miami (of Ohio), Central Florida, and the Citadel.

There were a number of bright spots on the team. Senior Jamie Miller emerged as the team's number one seed by the end of the season. In singles competition, he was a fine 23-13 for the year. In doubles play, he and Bryan Woodard were the number one tandem with a 19-13 overall record. Woodard was also the number two singles player and had a stellar 25-13 won-lost record.

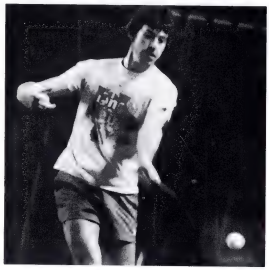


(Photo Lab)

The 1983-84 Number One seed, Hans Akan, concentrates on eye and racket control as he prepares to return a shot.

Exhibiting control by keeping his eyes on the ball, Jamie Miller hits the ball dead center with the racket.

Half of the 1982-83 top seeded doubles pair, John Howerton returns a ball using his powerful backhand.



(Photo Lab)

(Photo Lab)

John Howerton and Greg Dellinger made up the number two doubles pair. They carried a composite record of 16-8. Howerton played in the number three slot and sported a 18-9 singles record. Dellinger, in the fourth position, sparkled to a sterling 24-10 mark. Norm White finished with a 9-7 record against the roughest part of the schedule, and Jeff Taylor ended up respectively in spot appearances. The experience that Taylor, Green, and Hurt gained will benefit them this year.

Coach Dan Warner and his charges ended up sixth in the final conference standings. It was the second straight year that the Bucs were sixth.

The Bucs will all be a year older this season and should be ready to make a move up the ladder in the Conference wars. Under Warner's tutelage, they can do it. After all, he built the University of Charleston into a NAIA powerhouse in his short tenure there.

(Photo Lab)

(Ron Campbell)

The forehand cross-court return becomes an effective weapon against an out-of-position opponent.

Coach Dan Warner has molded the Bucs into one of the top Southern Conference contenders in 1984. Here he discusses strategy with Scott Davis.

Sasser: A New Era in Football

by Kim Reece

George F. (Buddy) Sasser officially began his reign at ETSU in December of 1982. After having built Wofford College into a powerhouse in the National Association of Intercollegiate Athletics (NAIA), he came here with the hope and determination of building a fundamentally solid team.

While at Wofford, he compiled an overall record of 36-26-2 and the Terriers were nationally ranked three of the six years that Sasser was at the holm. Sasser was named Kodak District III coach of the year in 1977, 1979, and 1982.

Sasser's coaching career began as an assistant at Eau Clair High School, he then moved on to Conway (S.C.) where he compiled an overall record of 66-17-5 over an eight year period.

Appalachian State was Sasser's first school on the collegiate level. While there he served as the offensive coordinator. The Mountaineers set several offensive records while under his direction.

After coaching football for twenty-five years, Buddy Sasser has been able to set goals. These goals are of only the familiar ones of championships, trophies, and All-American picks; they include the hope that a player will gain from his experiences as a team member and walk across the stage on Graduation Day with his diploma in his hand. He also hopes the impression he has made on his team during his first year as coach would be one that would influence a graduation senior enough so he would come back and play for ETSU all over again.

"Team Unity" is the phrase Sasser wants everybody to think of when they remember the team of 1983. According to several players, Coach Sasser has unified the Bucs and a lot of admiration goes along with the respect Sasser has gained from his men. When asked, "What is the price of Glory?" Coach Sasser replied there are a lot of prices to pay, starting in elementary school and going through to college and that "Glory never comes easy."

(Photo Lab)

Coach Sasser, standing among his players, awaits the start of the next play during the practice in the Dome.

The Price of Glory

by Kim Reece

The answers to "What is the price of Glory?" add up to one thing — dedication to football. By sacrificing a social life, attending classes, maintaining grades, enduring workouts, and surviving the pain the Buc's have built a team to be proud of. Coach Sasser and his staff have unified the team and made "men out of boys." When talking to some of the players (past and present) we found intelligent, hard-working young men dedicated to the cause — winning.

After playing football for the past six yeras things have finally started to pay off for Vince Redd. He has become one of ETSU's premiere backs and he feels he has only started to learn about the game. Vince can only find one fault with the program — students aren't willing to support the team through all the games (winning and losing). As for the "Price of Glory," "No pain, no gain," as he casually flexes a bicep.

Calvin Thompson is the man Coach Sasser picked as a potential All-American and Pro draftee. When asked about this he replied he has always dreamed of playing professional ball but he realizes now that if he doesn't get the chance to go, he'll be "ok." He commented that the only thing he wants from football is to be a winner. His advice to younger athletes is to work hard and not to give up. Calvin's answer to "What is the Price of Glory?" "Hard work and pain pain — every year!" Calvin is a sophomore in Criminal Justice from Tampa, Fl.

Zane Vance is the unsung hero of the Buccaneers. Although Zane is only on the third string, he has gained a lot from the game. He thinks the football team has come a long way since Coach Sasser's arrival in that the attitude is much better and the team is now unified. Zane credits all of his progress he has made to his prayer life and faith in God. He knows that without God he probably would have given up a long time ago — but he keeps on working. Zane says there's one thing he'd like to change about himself; he'd like to be a stronger Christian and witness more to his friends. Zane's answer to "The Price of Glory" is that working hard doesn't necessarily mean starting but have to keep trying.

For Tony Yost, things are finally starting to come together. After transferring from University of Virginia, Tony was riddled with injuries and wasn't able to play. After playing linebacker during the Spring '82 drills he was moved to noseguard. Tony hopes he will stay healthy so he can play. Tony stated that there are a lot of hours put into football with practicing, traveling, and studying but he also said that it's really worth it. "The Price of Glory" to Tony is sacrificing his time and willingness to work hard.

For Leonard Raglin, "The Price of Glory" has been to give up football. During his freshman year, Leonard received an injury to his knee and gradually it grew worse. While in his third year at ETSU he had surgery. In his fourth, he went out for spring ball and again hurt his knee. This was all he needed to say goodbye to football. But his career in sports was not over yet. Leonard joined the ETSU cheer-

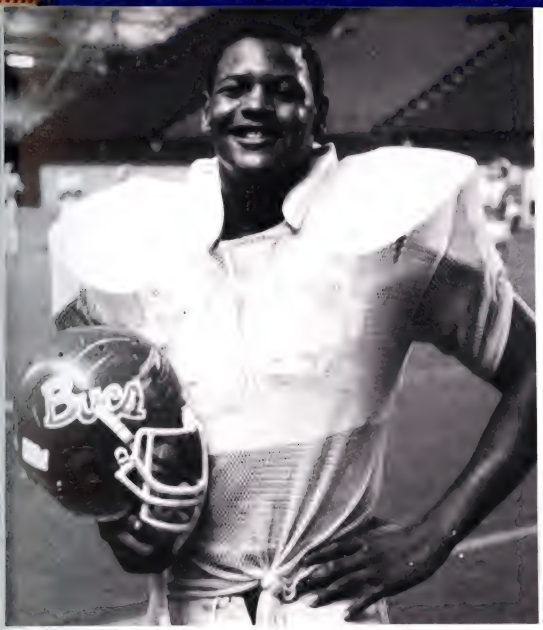
Leonard Raglin finds it easy to provide enthusiasm for a team he once played for. Leonard joined the ETSU cheerleaders in 1983 after a bit of coaxing from his friends.



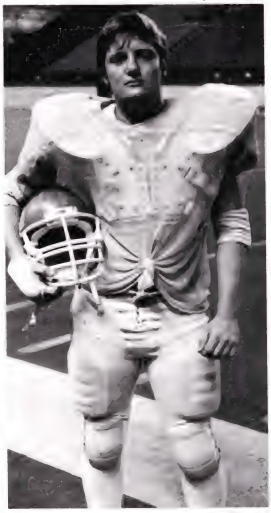
(Randall Lewis)

leading squad. He commented that he picked up the routines and the technique fairly easy. Lenord's most memorable experience was when his church New Life Christian Fellowship gave him some money to continue in his education. Leonard's words of wisdom to everyone are "the bottom line of everyone is none would be worth it without God."

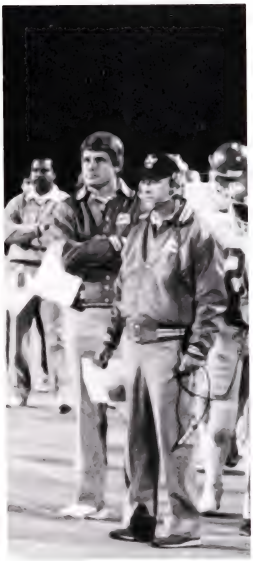
Calvin Thompson may smile cutely off the field, but on the field he's a "lean, mean, fightin' machine."

Sasser's answer to "What is the price of glory?" is that it "doesn't come easy" as exemplified by the look of disappointment after the surprising loss to Western Carolina.

(Randall Lewis)



(Randall Lewis)



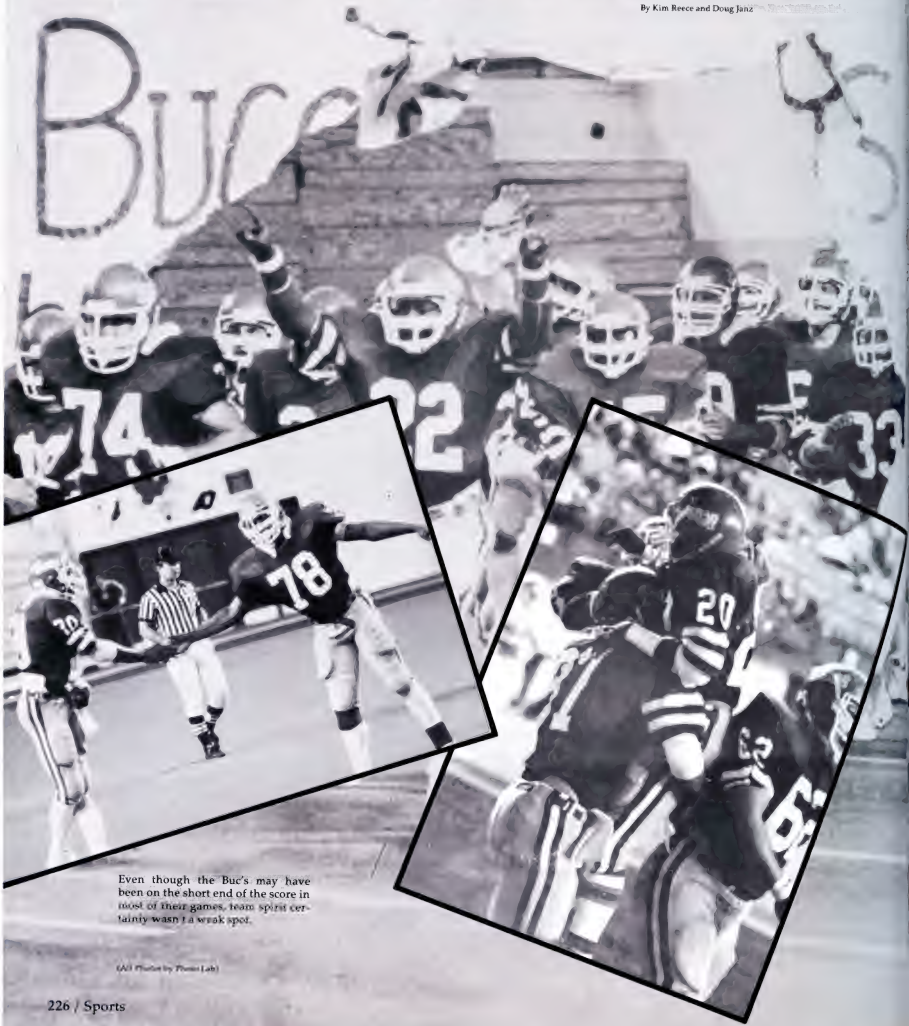
(Ron Campbell)

"No pain, no gain — it's the same way with life." Vince Redd's philosophy contributes to his success on the field.

Zane Vance feels that his faith in God has helped him to be named as the practice Player of the Week several times.

A New Beginning

By Kim Reece and Doug Janz



Even though the Buc's may have been on the short end of the score in most of their games, team spirit certainly wasn't a weak spot.

(All Photos by Photo Lab)

For the 1983 football team, this year was one of change but in some ways it was much the same as last season. The Buc's had a new coaching staff and the '83 season was an improvement over 1982's, 2-9 record. But a 3-8 record wasn't much of an improvement but at least ETSU showed potential and a "new beginning" for ETSU football.

The 1983 Buc's lost some very close games and won handily over very tough opponents. Yet with the overall youth of his group, Sasser's team suffered heartbreaking losses to some of the conferences not so tough foes.

The Buc's opened their season with a 21-15 loss to a powerful Eastern Kentucky team. Through most of the game, ETSU held their ground both offensively and defensively until finally being overpowered by the EKU offense.

One Sept. 10, Tenn. Tech invaded the Dome in hopes of handing ETSU their second defeat. The game was scoreless until the second quarter when Tech came through with a 43 yard TD pass and added the extra point. Achoe then scored on a 3-yard run and converted the extra point to tie the game at the half. The final points of the game came when Latham ran for a 21-yard touchdown and Campbell's extra point eventually lead the Buc's to a 14-7 decision.

Western Carolina was yet another team to frustrate the Buc's. After building a 16-6 lead over the Catamounts,Western miraculously pulled the win out by driving for a TD with less than three minutes left, and then recovering an onsides kick to set up for a Biasucci 43-yard winning fieldgoal. The stunned Bucs headed home a 17-16 loser.

Apparently the Bucs were unable to recuperate from the previous loss to a Carolina team because App. State rolled over the Bucs, 21-11, the next week. This was also one of the largest crowds (9,565) for this season in the Dome due to the support from the Appy fans.

Marshall was the next opponent to add even more frustration to the Bucs. ETSU and Marshall struggled with each other throughout the

David Ferrell launches toward an ASU guard.

Paul Rose in action against Georgia Southern.

game with Marshall finally kicking a 22-yard fieldgoal with 4:06 left in the game and again the team headed home disappointed.

Finally the tables turned on ETSU. Georgia Southern fell to the Buc's powerful ground attack, 24-7. Latham ran for 108 years, with a team rushing total of 262. Georgia Southern was limited to 106 years and seven first downs to ETSU's 24 first downs.

The Bucs, following their pattern of playing a bad game after a good one, were downed by Virginia Military Institute, 24-12. The Bucs were not badly outplayed in the game but simply couldn't keep the ball long enough to make it a contest.

Then ETSU came upon a tough Eastern Carolina team that was nationally ranked for part of the season. The Bucs fell behind 21-0 in the first half, but turned things around once ETSU found out that ECU wasn't the mighty force that everyone thought and the Bucs played some of their best ball of the season. ETSU dominated the second half. Yet the comeback had taken too long and it spelled another defeat, 21-9, for the Bucs. But the game could be best described as an "awesome" defensive victory for the team!

Furman took advantage of a disillusioned Buccaneer team and walked over them, 28-7. The Paladins' quarterback, David Charpia, picked apart the Bucs defense by hitting 15 of 25 passes for 265 yards.

The Bucs responded in the next game by clobbering The Citadel, 45-0, behind the season's most brilliant performance by Herman Jacobs. The freshman running back from Tampa, Fla. rushed for 237 years to set a new record at ETSU. He also added three touchdowns which earned him Player of the Week in the Southern Conference.

Keith Harris, freshman quarterback, scrambles in hopes of a first down.

(Matt Bowman)

Robert Achoe prepares to set his offense in motion

(Ron Campbell)

The season finale was yet another frustrating loss, 13-10, to UT-Chattanooga. It was the same old story, the Bucs saw victory slip away on a fourth quarter fieldgoal. It epitomized the year — a year of great highs and terrible lows, an up-and-down season with too many near misses.

On the offensive side of the team the potential was there, yet with the team's overall youth and inexperience this potential was not visible at some of the most crucial points in the game.

The running attack was ETSU's offensive weapon. A corps of talented running backs and a hard-working offensive line brought the team five 200-yards-plus rushing games.

The main problem was finding a consistent quarterback. Achoe started much of the season but was an unproductive passer. White and Bowlin shared time, as did Keith Harris. Harris started the final two games and

(Photo Lab)

After a near miss by Danny Carmicheal, Gary Ingman and Phil Forney pursue the opponents quarterback.

looked good, hitting 17 of 33 tosses for 156 yards, two touchdowns, and one interception.

If in fact Harris is the answer to the Bucs quarterback woes, the offense will be sound in the future. The running game is potentially one of the best in the conference.

The East Tennessee State defense was on the whole a great group. Six times, the defense held opponents to under 20 points, including a fantastic 45-0 crushing of The Citadel. The total rushing output for the Citadel was 28 yards.

The eight losses ETSU absorbed were usually not the fault of the defense. A turnover by the kicking team lost the Western Carolina matchup. Tenn. Tech managed only one touchdown as the Bucs won. Marshall and UT-C only scored 13 points each game, but meanwhile unanswered points meant losses both times. At times the defense broke down and several times the Bucs appeared to have the win chalked up, but a minor slip-up would allow the opposition just enough room to squeeze out a victory.

Still, the inspired play of such palyers as Harvey Zachery, Gary Ingman, Calvin Thompson, Tony Yost, David Vestal, David Ferrell, and Phil Forney (just to name a few) helped the Bucs keep the spirit together. The defense, just as is true for the offense, looks to be a bright spot for next season.

Volleyball: To The Top

By: Kim Reece

Coach Louise Stallworth ended her third season at ETSU with an outlook of optimism and hope for the future of the Lady Buc Volleyball Squad. Prior to the 1983 season, Coach Stallworth stated "The Lady Bucs are looking forward to a strong winning season in the Southern Conference in 1983." Winning is what the Lady Bucs did! After compiling a 25-16 record, the Lady Bucs finished second in the Southern Conference tournament — second only to the Western Carolina powerhouse. Coach Stallworth held a conference with each player. She commented that each player felt good about how they had played and were anxious and very positive about preparing for next year's season. Coach Stallworth also raised the fact that a victory would have been even closer, if her top player, Brenda Holtsclaw, had not been out due to surgery on an injury she sustained four weeks before the championship.

Brenda Holtsclaw and Pam Sherwood were named All-Conference players. Holtsclaw, captain and outstanding senior leader, led her teammates both on the court and off. Even after her injury, she still kept the team spirit alive. Coach Stallworth feels that due to an outstanding recruiting season that the Lady Bucs are on their way to the top and only more success can be forecast for the squad.

At the end of the season, Coach Stallworth gave awards to three deserving players. The Hustle Award was given to Senior Deidre Wilkes, MVP was Brenda Holtsclaw, and sophomore Pam Smith was named as the Most Improved Player.

The 1983 Edition of the Volleyball Squad includes: (Front Row) Melina Helton, Deidre Wilkes, Karen Fraley, Leslie Fletcher, Pam Smith, Linda Elston, (Back Row) Assistant Coach Sue Bias, Manager Sharon Bolli, Judy Constantin, Chenia Young, Jan Everson, Pam Farmer, Pam Sherwood, Terri Griffith, Brenda Holtsclaw and Coach Louise Stallworth.

Surpassing The Rest

By John Langanke

The 1983-84 Varsity Cheerleading squad surpassed the success of any other squad in the history of East Tennessee State. At the national camp sponsored by the Universal Cheerleading Association in August, the squad made it to the finals in two events and walked away with two first place trophies, a feat no squad has ever accomplished before. "It's just incredible," commented Varsity Cheerleader Teresa King. The squad rose to the occasion by beating other major squads from the University of Florida, Applachian State, Eastern Kentucky, University of Kentucky, and Western Carolina in both Fight Song and Sideline Competition.

The requirements to make the squad increase in difficulty every year, making the competition that much tougher. Mastery of tumbling, crowd rapport, and double stunts head the list of things that are considered before one can make the squad.

(Photo Lab)

The '83-84 squad enjoyed the experience of five veterans: Steve Mostella, Phil Kiser, Geri Ikenberry, Janet Snodgrass, and Teresa King. Steve Mostella, the head cheerleader, a junior from Knoxville, represented ETSU as a National Instructor for UCA this past summer, an honor bestowed on only the nation's best cheerleaders. Experience from the girl's side helped the squad enjoy success in all aspects: Snodgrass and King figuring prominently in pyramid, double stunts and tumbling. Geri Ikenberry in overall crowd rapport.

New additions to the squad were Michele Adkins, Laura Conkey, Kim Sartain, Tim D'Amico, John Langanke, Jim Newman, and Leonard Raglin. Sartain, D'Amico, and Langanke being from last year's Junior Varsity squad.

Whether new or old, both combined to contribute to the squad's incredible success. Will the squad continue to get better? As one Varsity Cheerleader put it, "There's no way we can't, with the talent in the ranks that haven't peaked yet — we can only get better." After winning two major awards nationally, as well as, spirit sticks every day at camp for exemplifying the highest level of spirit — one can only wonder what lies ahead for this group of 12 very talented people. Besides being featured on Home Box Office and a television special this year; the squad was also seen at all basketball and football games.

Janet Snodgrass and Tim D'Amico exemplify the Buccaneer spirit and enthusiasm that the Varsity Cheerleaders express in everything they do.

The Varsity Cheerleaders execute one of their difficult stunts during a pep rally. These stunts take continuous time and practice to make them perfect.

Flying High With Spirit

By Kim Reece

Joe Hollister has once again brought to life the bright blue feathered costume that we all know as "Pepper the Parrot." "Pepper," now four years old, has become one of ETSU's all-time crowd pleasers due to his never ending antics. This is Joe's last year as Pepper and a cheerleading friend commented, "He'll be dearly missed!!" Pepper is always a great pick up for the crowd and adds so much to the cheering section by flapping his wings in encouragement to the crowd.

Joe is a senior criminal justice major from Knoxville and a member of the Sigma Nu fraternity. The first "Pepper" was Mike Edmunds, also a Sigma Nu and Joe's Big Brother. Joe is a slightly shy person until he transforms into the charismatic bird we all love.

Going For The Gold

By Rick Kemper

Showing school spirit, technique, rhythm, and coordination are just a few of the basic qualities a person needs to become a Junior Varsity Cheerleader here at ETSU. Every year in the late fall, the Varsity Cheerleaders hold a week long camp teaching new students the required routines and cheers for tryouts. Both the men and women were judged in gymnastics, fight song, double stunts, and the overall performance of two cheers. The four men and women who were picked came from a field of approximately 30 women and 6 men.

Under the leadership of Captain Lorisa Hodsden, the squad met three times a week and practiced for two hours each time on routines and cheers for the Girls' Basketball games. Through cheering at the games and practicing along side the Varsity Cheerleaders, the J.V. Cheerleaders will gain the experience needed in making the Varsity Squad in the late spring.

Lorisa Hodsden shows her dancing techniques during a time-out at a basketball game.

Glimpses of Potential

By Doug Janz

The 1983-84 season for ETSU's men's basketball team was one of disappointment to many Buc fans, but it was also a season that showed glimpses of the Buccaneers' potential.

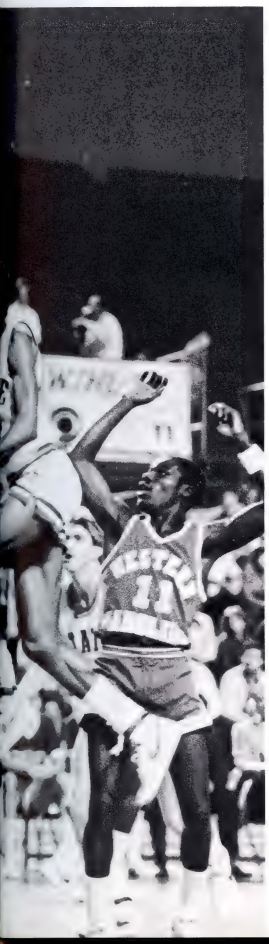
After ETSU coach Barry Dowd recorded a splended 22-9 season last year, fans had high expectations for the coming season. But Dowd knew how difficult things would probably be. He came into the 83-84 season without a single returning starter from the previous year, and only one player with much game experience, 6'3" senior Marcus Reese. Coupled with the team's lack of experience was one of the most difficult schedules ever played by an ETSU team.

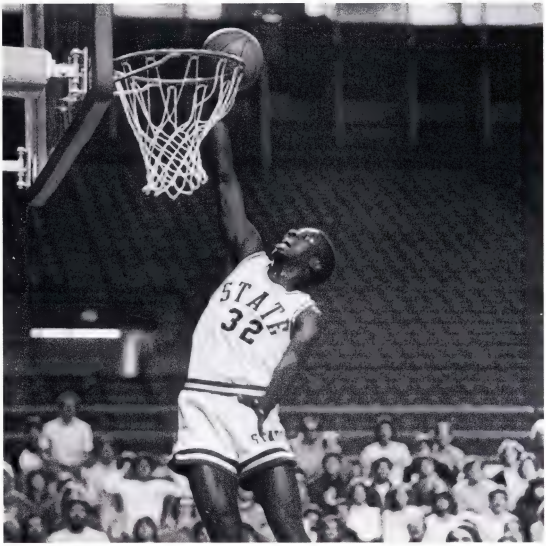
So with guarded optimism, the team began the campaign. It was a team comprised largely of transfers, redshirts, freshmen, and inexperienced players; a group that had never before played competitively together.

Over the first part of the season all the Bucs' weaknesses were exposed. After a backbuster season — opening win over North Georgia, 64-54, the Bucs nearly pulled off a major upset, falling just short in overtime to Ole Miss, 46-44.

Following a 65-56 loss to Richmond came the bone-crunching road schedule, containing colleges like Arkansas, Alabama, South Carolina and Georgia. The Bucs became sparring partners for these national heavyweights, losing by 19 or more points to all four. Sandwiched in between shellackings at the hands of the bigger schools were wins over Radford, 84-67, and UNC-Greensboro, 70-53, at the Memorial Center, and a 73-67 Southern Conference defeat at the hand of Furman.

Heading into a road trip to California for the Cabrillo Classic over Christmas Break, the Bucs were 3-7, but the roughest part of the year was over. Dowd hoped





The members of the 1983-84 Bucs are: (Front Row) Jimmy Goff, Wes Stallings, Albert Sams, Brad Moorehouse, James Tandy, Ben Coffman, (Back Row) Jamie Phillips, James Hildebrand, Marcus Reese, Mike Dent, Scott Daniels, Mark Watkins, and David Vaught.

the experience might serve to give his team a fast, brutal lesson on how to play "bigtime" college basketball.

The Bucs were slowly improving but they were still inconsistent. Reese and guard James Tandy, a transfer from Texas who sat out last season, led the way in scoring, while Reece's team-leading rebound average hovered around six a game, exposing ETSU's problems under the basket.

Reese exploded for 36 points on 15 of 18 shooting in the win over Radford, but in some games he and Tandy would falter, leaving the Bucs absent an offense. Flashes of potential shown through with ETSU's post players, David Vaught, James Hildebrand, Jamie Phillips and Mike Dent. But the sudden departure from the team of Ben Collman, one of the brightest-looking inside prospects, was another blow to the team. Coffman, apparently unhappy with his situation, transferred to Kentucky Wesleyan.

In the California Tourney ETSU fell to both San Diego State, 80-58, and Washington, 52-54. Again, at times the team played well, but at many other crucial times it came apart.

Possibly the low point of the year came when the Bucs next fell to Virginia Military Institute, 62-56, in the Memorial Center. The Keydets, annually in the conference doghouse and winners of only three games in two years, were much-improved but the loss was nevertheless a tough one to take. It made the Bucs 0-2 in conference play and only 3-3 in all home games.

Finally, against Western Carolina, the Bucs brought home a conference win, downing the Catamounts 81-76. But the inconsistency that plagued them all year struck again when the Citadel came to ETSU and posted a 75-62 victory. It was not one of the better games for the Bucs as they hit only 39 percent of their shots and allowed Regan Truesdale, the league's top scorer to get 26 points. The Bucs were outscored 45-27 in the second half. After that horrendous affair, the Bucs began to play better. Barring one game, the rest of the season until Buccaneer press time saw the Bucs play competitively with every team in the conference.

(All Photos by Ron Campbell)

Marcus Reese finished high in individual conference statistics for scoring, freethrows, and rebounds.

ETSU beat Davidson, 58-51, but lost to league-leading Marshall, 100-82. The Bucs played well, getting 28 points from Tandy and 23 from Reese, but they ran into the Herd on the wrong night.

The Bucs followed with an avenging 56-55 win over VMI. Wes Stallings canned a short jumper in the last seconds to give ETSU the win. ETSU upped its conference record to 4-4 by slipping by Appalachian State, 65-63. Tandy scored 21, and he and Reese combined for five three-point shots to propel the Bucs victory.

Next was a 86-69 loss to powerful UT-Chattanooga. It happened to be one of the best games of the year for the Mocassins, who shot 59.5 percent, put five players in double figures and soundly whipped the Bucs under the basket.

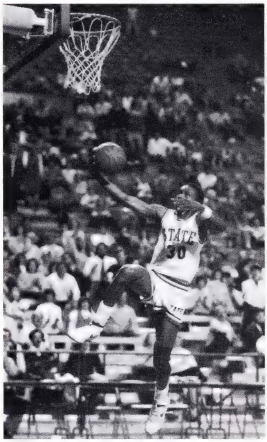
WCU handed ETSU yet another conference loss, 74-65. Things looked bleak for the Bucs at that time; they were 4-6 in league play and had Marshall as their next opponent. It was almost miracle time, but Marshall escaped with a 65-63 win after the Bucs had led much of the contest. Tandy scored 25.

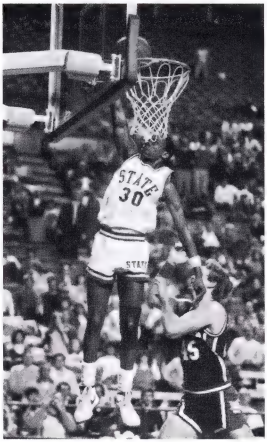
But instead of allowing themselves to fall further in the depths of depression, the Bucs came back by beating the Citadel, 76-72. As a team ETSU hit 62 percent of its shots, led by Tandy's 23 points, but excessive turnovers almost cost the Bucs the ballgame.

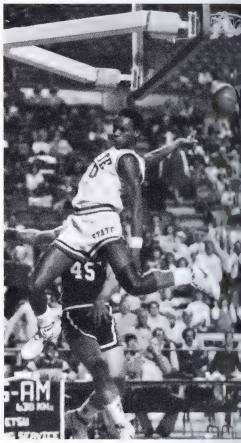
Finally ETSU got the miracle finish it was long overdue when Tandy nailed a pair of three-pointers in the last seconds to give the Bucs a 60-58 win over Furman. They were 6-7 in conference play, 9-15 overall at press deadline.

Tandy and Reese both had 16-point or better scoring averages and were being touted as strong all-conference candidates.

It was a season of ups and downs for the Bucs, but the potential that appeared at times was enough to give Buccaneer fans some hope for a high finish in the Southern Conference tournament.

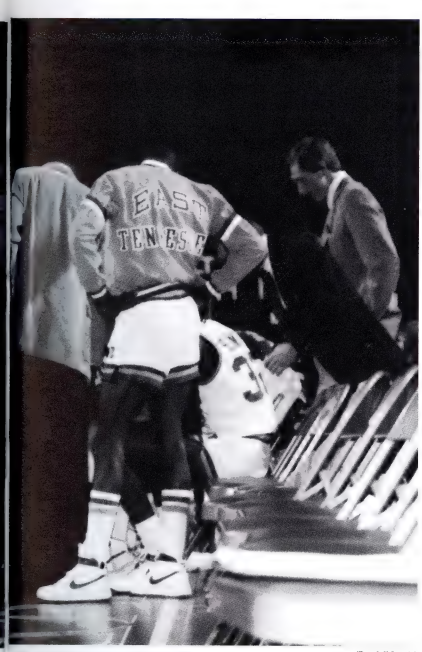






(Ron Campbel

Kentucky native, James Tandy, seems to be a bright spot in the future of ETSU basketball. Here he brings the home crowd to their feet in a thrillin "slam-dunk"



(Randall Lewis)

Coach Barry Dowd with his team during a time out.

"We said that this was a young team and a team of the future, we have played better each game and next year will be great!"
Coach Barry Dowd

REESE:

THE ICE MAN

Marcus Reese, otherwise known as "The Iceman", feels that he has been very fortunate to be a part of the Buccaneer basketball team. Reese, who received his name through his ability to remain under control on the court, has played in every game — except one — during his college career.

Reese, the only senior on the team, said that it felt good to be the team leader but at the same time it was a "bit shakey". He said that not having anyone to relate to about his college career winding down made him apprehensive about the season — but he set his goals and was determined to reach them.

Reese wanted to specialize in his "own thing" all through his basketball career. He enjoys watching the "superstars" in action but never really patterned himself after any certain player.

Averaging more than 16.2 points, and 6.2 rebounds per game is lower than Reese was striving for but he still has hopes for a future in basketball. If Reese does not make the NBA draft, he will finish his education in the field of accounting at ETSU.

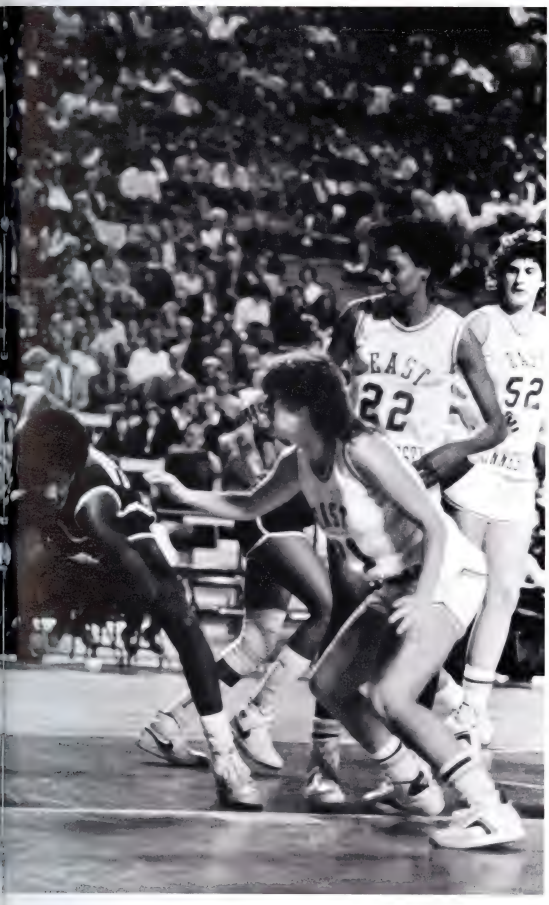
Regina Blair from Mitchellville, MD, is crowded by several Lady Mocs as she attempts to make a shot.

A Team to Be Proud Of!



Kim Skala and Regina Blair on the defense against UT-Chattanooga.

By Kim Reece

For the women's basketball team, this year has been one of success. As of press time, the Lady Bucs had compiled a record of 16-8.

At the beginning of the season there was an air of guarded optimism among team members. By developing a deeper inside game, solid scoring offense, and finding someone to replace Marsha Cowart — the most prolific scorer in the history of ETSU, the Lady Buc's gave the school a team to be proud of.

Lori Hines, Punkie Mills, Regina Blair, and Leigh Jaffke were the top returners from last years 16-10 season. With transfer player, 6'5" Tammy Larkey, and 5'8" guard, Kim Skala, the Lady Bucs had the tools for success.

The season opener, Tennessee Tech Classic, saw ETSU defeating Alabama-Birmingham, 85-70, but then falling to host team, Tennessee Tech in the finals, 63-75.

Virginia Tech became the first victim for the home crowd. The Lady Hokies of the Metro conference fell to the Lady Bucs, 67-60.

ETSU went on to win against non-conference teams Lenoir-Rhyne, Kentucky State, College of Charleston, and Murray State. They also fell to defeat at the hands of basketball powers North Carolina,
62-53, and Virginia, 71-68 (OT).

The Lady Bucs first conference contest came during a road trip to Marshall University. The Thundering Herd fell to the Lady Bucs, 61-57.

Linda Gregg avoids an Appy State guard during a pass to teammate Kim Skala.

ETSU first conference loss came to UT-Chattanooga in a close 58-55 contest in Johnson City.

The Lady Bucs were then defeated by Louisville Lady Cards, 68-61, in the first round of the UAB Diet Coke Classic.

The next three games were victorious as the Lady Bucs defeated Alabama-Birmingham (59-50), James Madison (64-56), and Southern Conference foe Western Carolina (68-56).

The next showdown saw UT-Chattanooga taking the home court advantage and slipped by the Lady Bucs, 70-68. This loss eventually cost the Lady Bucs a bid for the Southern Conference crown.

The Lady Bucs went on to win their next six out of eight which included Appalachian States Lady Mountaineers, East Carolina Lady Pirates, and the University of Charleston Lady Cougars.

Individually, the Lady Bucs compiled rather impressive statistics. As of press time Gina Blair led the way in scoring with 359 points followed by Punkie Mills' 318 and Tammy Larkey's 293 points.

Larkey, who entered the season late due to eligibility requirements, led the team in points averaged per game with 16.3. Blair followed with 15.0, and Mills 13.3.

Leading the team in free throws are Larkey, 70.3%, Lori Hines, 69.9%, and Gwenella Marshall, 64.7%.

Hines and Kim Skala led the team in assists with 124 and 104, respectively.

Rebounding was led by Mills who had a total of 281 with an average of 9.6 a game. Blair followed closely with 230 also averaging 9.6 per game.

Blair scored a game high of 30 points against the Univ. of Charleston. Mills pulled down a game high of 20 rebounds against Kentucky State.

Overall, the Lady Bucs only allowed their opponents 1490 points, averaging 62.1. The Bucs had a total of 1625 points with an average of 67.7. The Lady Bucs out rebounded their opponents by averaging 40.9 and allowing only 35.5.

(All Photos by Ron Campbell)

Freshman forward Gwenella Marshall takes to the action against Appy State.

The members of the Lady Bucs are: (Front Row) Lori Hines, Kim Skala, Nancy Caldwell, Kim Payne, Beth Bass, (Back Row) Coach Susan Yow, Assistant Coach Susan Doran, Linda Gregg, Regina Blair, Tammy Larkey, Leigh Jaffke, Gwennella Marshall, Graduate Assistant Marsha Cowart, Leslie Payne, and (Not Pictured) Punkie Mills.

"At the beginning of the season there was an air of guarded optimism among team members."

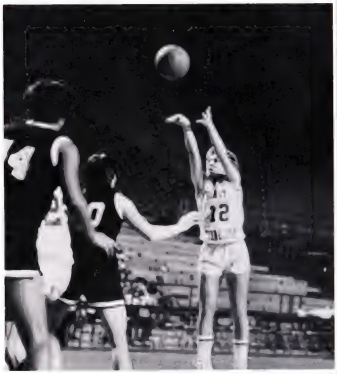
Tammy Larkey's 6'5" advantage helps her put the ball up over this Lady Moc.

Beth Bass and Kim Skala double team an Appy State forward.



Lori Hines goes up for an outside shot.

Hectic but Smooth Running

By Kim Reece

John Cathey, Nancy Peterson, David Carmicheal, and two student workers comprise the ETSU Sports Information Office.

John Cathey, director, heads the hectic, always on the move, media-oriented office. He, along with his fellow workers put together all of the information concerning everything that goes on in the world of sports at ETSU.

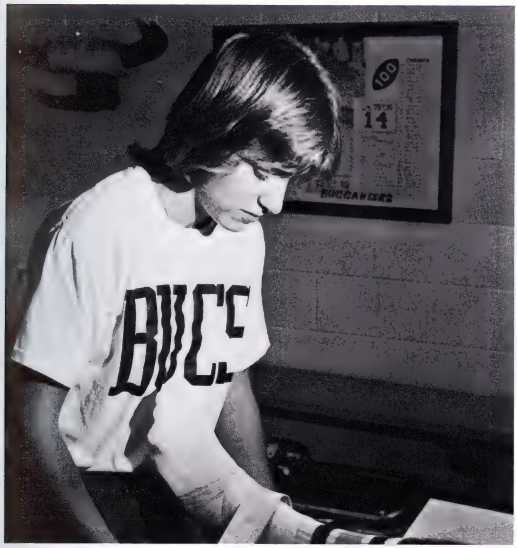
The SID office's main objectives are to prepare and write news releases concerning all sports, and provide information to local media, wire services, and professional sports organizations. SID also prepares tapes and provides "clips" to the television and radio stations in the area. Making the press guides, pamphlets, and game programs are also one of the time consuming jobs that the SID office is in charge of.

SID also manages press box operations during all major home events, makes all necessary arrangements for home football games, and compiles play-by-play, defensive, and offensive statistics for every game.

Many students don't know that the Sports Information Office exists, but without it's endless list of responsibilities, many people wouldn't enjoy the athletic information that is reported every day to local media and the "smooth running" operation of the home events.

John Cathey during a humorous moment at basketball press day.

John Cathey at work during the Tennessee Tech vs. ETSU football game.



Debbie Price, student trainer, wraps the ankle of an injured athlete.

Jim Brannen and Debbie Fogle treat Jon Forrestor's shoulder injury with their electronic equipment.

Training Room

By Kim Reece

ETSU's training room serves the university as a source of care, treatment, and rehabilitation of athletic injuries and the prevention of further injury. The trainers provide to ETSU athletes, as well as to students, faculty, and staff (when recommended by a doctor).

Jerry Robertson, head trainer, his assistants — Debbie Fogle and Jim Brannen — along with 12 student workers compose a training facility that is one of the finest in not only the Southern Conference — but the nation. This distinction was made possible by Robertson who is described by John Cathey, SID, as being "truly one of the finest athletic trainers in the country."

The training room works with each team physician who prescribes the necessary treatment. The trainers along with the team doctors also try to help each athlete to cope with their injuries. Brannen commented that some athletes have a rough time dealing with their injuries but they (staff) try to do everything they can for the athlete both physically and mentally.

(All Photos by Ron Campbell)

Competitive Battlefield

By Kim Reece

Intramurals have become a competitive battlefield on which team pride and reputation is at stake in every event. The sports are all in the name of friendly competition, but at times the honor of defeating the rival team provides more atonement than any intercollegiate sports victory.

The intramural sports range in variety from basketball, tennis, football, bowling, track, volleyball, and swimming. With regard to the ex-high school athlete, these sports provide the extension of years of participation in the sports which so many love.

Fraternity, campus organizational, dorm, and independent leagues make up the intramural community at East Tennessee State University. The Supreme Court, Warriors, Avengers, Sig Eps, Sigma Chi's, Pikes, Lucy's Ladies, Baby Bucs, and Ladies Choice continue to dominate in the intramural competition.

Thomas Joyce serves as the director of the Department of Intramurals and Recreation. He, along with several graduate assistants, arrange and promote the activities.

Any student who wishes to participate in any of the numerous activities is urged to contact the Intramurals Office for information on how to join the many others who make up the Intramurals at East Tennessee State University.

Rifle Team: This Year

By Kim Reece

The ETSU Rifle Team has enhanced its reputation by outstanding achievements in the past and this year was no exception. Under the guidance of first year coach, Paul Anderson, the 83-84 edition of the rifle team is predicted to be not only the Southern Conference champs but a top contender for the NCAA crown as well.

Anderson took over the reins as coach after Ray Carter left to pursue his goal to be an Olympian. Anderson, a former ROTC and marksmanship instructor, retired from the Army in 1982 and worked with Carter during the summer to make a "smooth transition."

The Buc's have competed in several prestigious tournaments including the Eastern Kentucky Invitational, Buccaneer Invitational, U.S. Naval Academy Invitational, West Virginia Invitational, the South Conference Tournament, and the NCAA Championships.

West Virginia and Tennessee Tech are considered to be the only real threats to the Buccaneers. But Anderson said, "My team could defeat any team on a given day with the right conditions and a little luck."

The rifle range room displays the numerous trophies and plaques that have accumulated over the years.

Was No Exception

(All Photos by Randall Lewis)

The 1984 Southern Conference Champions are: (Front Row) Cindy German, Laura O'Daly, Elizabeth McKay, (Back Row) Bill Thomas, David Yeager, Paul Anderson, Kurt Kisch, and Joe McGuigan.

The first team shooters include Elizabeth McKay, Joe McGuigan, Bill Thomas, and David Yeager all of whom are past and present All-American Riflemen. ETSU is also equipped with one of the country's top facilities.

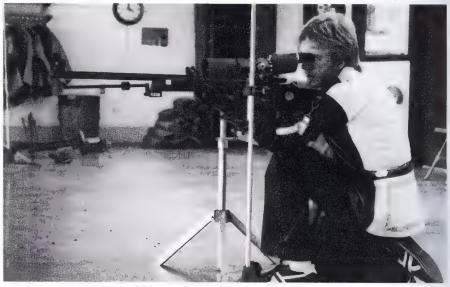
The rifle team utilizes the Calaber Ans-Schutz rifle and air rifles. Only the small bore .22's are used in Southern Conference competition due to the number of schools that aren't equipped to use air rifles.

Recruiting in the rifle team is just like recruiting in any other sport except for the fact that no full scholarships are provided.

When asked about what the shooters do to prepare for the events, Elizabeth McKay said, "Only 10% of the game is physical and 90% is concentration."

(Randall Lewis)

(Randall Lewis)



(Randall Lewis)

McKay: Eye on the Olympics

By Kim Reece

Elizabeth McKay, one of the nations top women's rifle competitors, has her eye on the 1984 Olympics in Los Angeles.

Ms. McKay, who began shooting as a hobby in the third grade, has competed on an international level since 1981. Since that time, she has compiled an impressive list of achievements including two time All-American honors, a silver medal in the National Sports Festival, silver and bronze in the Championship of the Americas, gold in the Benite Juarez Games, as well as being the current national champ in cross bow and third in the international 10 meter competition.

Ms. McKay has had the opportunity to travel to different parts of the world because of her success. She has competed in East and West Germany, Rio de Janerio, Mexico City, and will travel to Cuba to compete as a member of the USA National Development Team. She has also qualified for the Olympic preliminaries in June of 1984.

Other than being a sound athlete, she also takes time for her academic achievements, being named to Who's Who in American Colleges and Universities, Who's Who in International Youth, and the Phi Beta Lambda Honor Society Historian.

(Photo Lab)

Elizabeth McKay was individual champion in small bore and air rifle competitions of the Southern Conference.

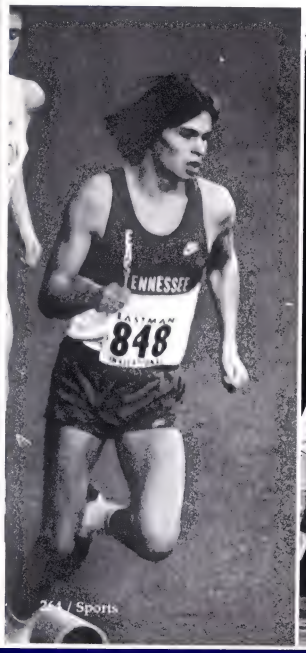
Failures and Successes

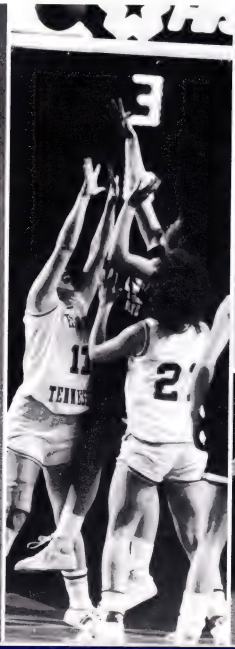
By Kim Reece

Sports have become a series of failures and successes for East Tennessee State University. Fans, young and old, continue to show their support to their teams through the endless screams of encouragement. During the games, their sighs of relief echo through the school when they hear of a cross-country, rifle, or tennis victory.

The future of sports at ETSU looks bright and the anticipation of a winning season is there. Potential All-American candidates exist in every sport.

Fans in our school and area need to continue their endless support to all athletic teams. When times are bad, stick with the team and when things are great, help to revel in the fact that we are the best.





STATE

Hot Action Inside the Dome

By Dennis Stark

Despite the sub-freezing temperatures outside, the action was hot inside the Memorial Center for this year's Eastman Invitational Track and Field Meet.

The two day competition was highlighted with one world record and 12 Memorial Center records being set.

The newest event of the meet proved also to be the most exciting. The Levi's Wheelchair mile saw all five finishers break the existing world mark with George Murray taking first with a 5:04.5 clocking.

John Gregorek, a 1980 Olympian, roared into the meet record book with a sizzling 13:12.7 clocking in the Invitational Three Mile run. He was hotly pursued as four others also eclipsed the old mark of 13:24.64. Second went to Dave Murphy of Brooks Racing Team in 13:14.44 and third went to former ETSU All-American Adrian Leek in 13:18.95.

Sean O'Neil, of Villanova, raced to a new Meet Record in the University Men's 880 yard run with a 1:50.47 clocking.

Villanova slashed their meet record in the Invitational Distance Medley by recording a time of 9:39.97. They easily outdistanced Virginia and Pittsburgh who took second and third respectively.

The Invitational Mile Relay Record was snapped by University of Texas-El Paso. They recorded a time of 3:09.97 to break Villanova's record of 3:10.33. Texas A&M and Auburn were also under the old meet record.

The Pole Vault was the event which everyone came to see. They were not disappointed as Jeff Buckingham vaulted 5.60 meters to wipe out the old mark of 5.49 meters set last year. He also defeated a host of top rivals such as

(All Photos by Ned Jilton)

Despite the Freezing Cold Outside

the former world indoor record holder, Billy Olson, who took second.

In other highlights, Jacek Wzola of Poland won the Invitational Men's High Jump on fewer misses over Paul Pivinski of Track America. Both cleared 7'4$".

Jason Grimes won the Men's Invitational Long Jump with a leap of 26'½".

Stijn Jaspers, of the Netherlands, used 4:08 first mile to bury the competition in the Men's Invitational Two Mile Run. He ran 8:37.41 for his second win in a row.

The Invitational 60 yard dash for men went to Emmit King in a meet record 6.06 seconds. It was the third year in a row King has won the event.

Kevin Johnson, of the Adidas Track Club and a former ETSU All-American, used a 56 second last quarter mile to win the Invitational Mile in 4:01.82.

Brenda Webb of Athletics West, blasted her own Invitational Women's Mile run Meet Record of 4:44.75 by running 4:40.38.

Women's 60 yard hurdles champ, Benita Fitzgerald eclipsed her own meet record of 7.85 by winning and clocking 7.82 in the finals.

On Saturday evening, Carol Howe, competing for Tuxedo High School in Winnipeg, Canada, destroyed the field and the record in the High School Girls Mile run. Howe ran 5:03.83 to Karen Wierville's old record of 5:12.4.

Perennial women's sprint champion, Chandra Cheeseborough, raced to a meet tying record in the 60 yard semifinals of 6.88 seconds. Then on Saturday in the finals, Cheeseborough broke her own meet record with a 6.70 clocking and winning comfortably.

Disa Gisladotter, competing unattached, tied the women's high jump mark of 1.83m (6'0") in winning the event.

Once more, a severe cold weather streak and snow kept attendance down at the 1984 Eastman. But if you braved the cold outside, you were quickly warmed by the hot competition inside.

Successful Staging ...

By Dennis Stark

The brainstorming of Dave Walker, the head track coach of East Tennessee State University, paid off in the successful staging of probably the highlight of the sporting season in the Johnson City area, the Eastman Invitational Indoor Track and Field Meet.

Walker couldn't prepare the event without the help of his organizing committee or the competition that the invited athletes bring. This year alone, these athletes sparked excitement with one world record and twelve other Memorial Center records being either broken or tied.

Willie Gault, the Chicago Bears rookie running back, was present for both days of the event. Gault commented that the Eastman Invitational was an invaluable experience for the athletes especially due to the upcoming 1984 Summer Olympics in Los Angeles.

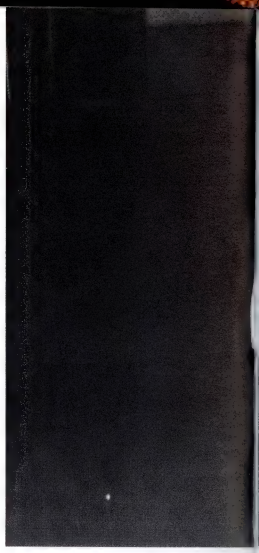
Moves to quickly down an opponent of an attacker are part of the Martial Arts training.

Throwing an attacker off of you from a lying position is essential to self defense.



The Art of Self-Defense

by Tim Miller and Rick Kemper

A new member of the sports community appeared during the fall with the addition of the Martial Arts Club. Under the guidance and direction of Dr. Brian Peter Rowe, an assistant professor of physiology at ETSU who is originally from Sussex, England, the Martial Arts program operated for those students who had an interest in Judo and the desire to work their way to a Black Belt. This full year program was available for those students paying a $10 annual fee and attending meetings every Tuesday and Thursday in Brooks Memorial Gym.

Dr. Brian Peter Rowe's interest in Judo began when he was in high school, but he didn't seriously study the art until he went to college and he has continued studying it for over 13 years. As a graduate from the University of South Hampton, England with a doctorate degree in physiology, Dr. Rowe holds the Black Belt in Judo, which is a very distinguished achievement. When asked about the Martial Arts Club, Dr. Rowe commented that he would like the club to become a national member of the U.S.J.F. (United States Judo Federation) and eventually for his students to compete in local and regional tournaments. To prepare for these tournaments, Dr. Rowe puts his students through rigorous workouts, which include stretching, push-ups, sit-ups, leg lifts, throws and escapes. Each workout lasts an hour to an hour-and-a-half. All students were encouraged to come out and learn the art of self-defense.

An opponent flies through the air as one of the Martial Arts students practices his moves.

A student throws another during a practice session. Although the moves are designed to subdue an attacker, injuries are rare.

Practicing moves and holds is the only way to perfect the Martial Arts skills. These students show another a form of a throw.

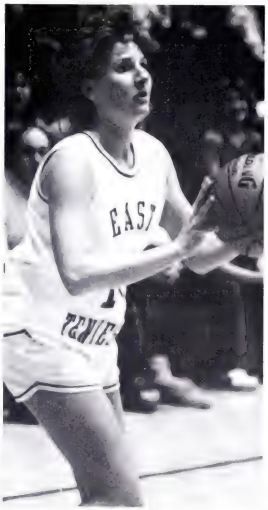
Dr. Rowe demonstrates a hold with one of his students during a work-out session.

Ex-Bucs Make It

by Kim Reese



Marsha Cowart, a former Dean's List student majoring in physical education, is in action during the 1982-83' women's basketball season.

Being successful in collegiate sports is a dream all athletes share and becoming nationally recognized is an honor that most never attain. Fans have seen, over the years, their outstanding athletes bring the sports limelight to ETSU. Four of ETSU's athletes from 1982-83 certainly gave ETSU's athletic program the recognition it deserves.

Winfred King, after only playing one season at ETSU, has to be a name that many people recognize due to his overwhelming contribution in rounding out one of the most awesome teams that ETSU had seen in years. In 1982-83, King alone pulled down 257 rebounds, connected for an average of 15.2 points a game and occasionally added an extra blocked shot or slam dunk. Being drafted in the NBA's third round isn't bad and playing for the Boston Celtics isn't bad either, so for King, who is sitting out the 83-84 season with a shoulder problem only more success can be forcast and ETSU fans can hope to see more of him in the future.

Who is 5'10", has blonde hair, and can knock the bottom out of the basket at forty paces? Marsha Cowart that's who! During her four year career at ETSU, she has compiled some rather impressive statistics. She averaged 23.2 points a game, scored in double figures 96-104 times, and became the all time leading scorer (men's and women's) with 2239 points. During her senior year, her jersey became the first to be retired at ETSU. She is continuing her education at ETSU and is serving as a graduate assistant for the Lady Bucs. Marsha's willingness and inner drive made her one of the top Division I players in the country.

Troy Lee Mikell has become one of the most dynamic and energetic sports figures in the history of ETSU. On the court, his 360 mid-air dunks, spectacular "alley-oops," and magic ball handling gave the Dowd crowd the excitement and thrill that they were looking for. Although he was cut from the New York Knicks, Troy Lee will be playing for a continental league in New York. He will be sitting out a season due to surgery on his Achilles tendon in the late fall of 1983.

Winfred King, from Atlanta, Ga., pulls down one of his 257 rebounds as teammate Sonny Vinson prepares to assist.

(All Photos by Photo Lab)

Mike Nipper is the most recent Battin' Buc to make baseball history at ETSU, a sport to be highly respected. Over the years, several baseball players from our area have succeeded in the pros and it looks as if Mike Nipper will be no exception. During 1983, Mike was at bat 136 times and saw 97 hits, 21 of which were homeruns. Mike's average was .368 for the spring schedule, which was good enough to land him a contract with the Atlanta Braves.

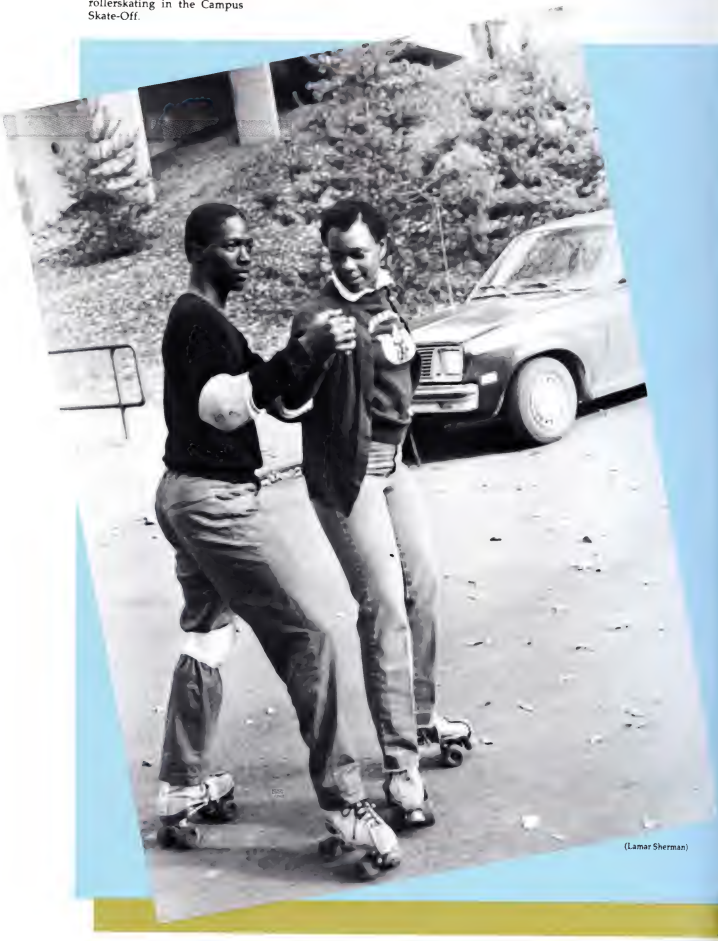
During the summer of '83, he played in the Braves' farm system at Pulaski, Va. in the Applachian League.

There have been rumors circulating that he is moving up to the AA system, after the spring '84 practice season.

Troy Lee Mikell, one of the prolific players in Buccaneer history, goes up for two points as an opposing team member fails to block his shot.

Mike Nipper former ETSU stand-out, in action during the 1983 Spring Baseball season at Mooney Field.

Reggie Bland and Kim Ballou take part in the annual Homecoming festivities by rollerskating in the Campus Skate-Off.



(Lamar Sherman)

(Lin Ruys)

Dane Brown, caught in a reflective mood, captures the spirit of individuality students displayed throughout the year.

The everyday life of a student is filled with activities which become memories that last a lifetime, whether they be cramming or partying.

The people section contains the medical, the graduate, the senior, and the underclass students, along with a faculty listing.

The enrollment of students was up this year, going over the 10,000 mark.

An endless list of lifestyles was present on campus, ranging from the ''preppies'' to the "hillbillies" to the "punks."

No matter what the lifestyle, each student created his own unique personality to benefit the whole. We, the people of ETSU, kept the mountain glory alive.

(Matt Bowman)

Todd Treadway and Todd Walker relax in the Eat and Run, a popular hangout on campus for students, between classes.

The Glory Continues . . .

by Deborah Morton

Last year, the Quillen-Dishner College of Medicine graduated its first class of medical students. This year, the Medical School will graduate its second class of twenty-two students who will be the doctors, not of tomorrow, but of today.

Their training has been intense, the lessons hard, but the pain — "Well worth it!" The glory of a job well done and of lessons skillfully learned bring new renown to the ETSU community. Eight years of dedication have finally paid-off for some, but for others the final four years of hard work are just beginning. Thirteen new students entered Quillen-Dishner College in 1983, eight males and five females.

Dedicated on October 14, 1983, Buildings 1 and 119 of the Veteran's Administration completed the dream of a local medical school. The Medical School is expected to provide quality service.

President of ETSU, Dr. Ronald Beller explains the importance of Buildings 1 and 119 during a formal dedication.

One Step Beyond

by Deborah Morton

They have worked and they have studied hard. They have even graduated, but one can still see them around campus. They are still in school. Who are "they?"

"They" are the graduate students — one step beyond. A different breed of students, these master and doctorate candidates decided to continue their education beyond the average four year college level. Reasons for this decision varied greatly, but the most popular explanation was economical, not educational.

In today's highly competitive world, graduate students hoped to gain an edge over the competition by earning specialist degrees in their chosen fields. By earning these degrees, they hoped to increase their future incomes by thousands of dollars. Also, the added experience of at least two extra years of college work could open many more doors to future employment.

Graduate students, also referred to as "professional students" because they seem to make a living of going to school, should never be accused of being unambitious. Consider the complaining one hears from underclassmen about the never ending semesters of school. Give your local graduate student a pat on the back. It takes a very ambitious person to stay in school as long as they have just to earn a few extra dollars.

Pamela Young, Geography

A Time For Nervousness

by Greg Walters

There are few times in the lives of students that are as exciting as their senior year. Whether in college or high school, there is something magical in the title of Senior. Perhaps it is the expectations that arise with the approach of graduation or the nervous excitement of proud accomplishment which occurs at the thought of a degree that makes a senior year so unusual from any other year.

A typical senior year begins the semester before with registration. A last minute rush to schedule "forgotten" core requirements and frantic conferences with faculty advisors to find out which classes were forgotten take up much of the time. Once registration is taken care of, the new seniors can begin preparing for classes. The first semester usually goes smoothly with a few parties and a lot of laughs. The second semester begins with a few worries, including that dreaded Letter of Intent to Graduate. Less parties, less laughs, and fulfilling major and minor requirements expend much of the senior energy found that semester. Finally, graduation arrives. That long awaited day of nervousness, laughs, tears, and screams of pride seems to make four long years of hard work worth it.

Seniors are special!

Elevators . . . Up Please!

by Brenda Crisp

Elevators seemed to be the main cause of groups suddenly forming and of long periods of time being wasted around ETSU. Sometimes just to ride to the second floor of the few buildings on campus that have working elevators, students would have to wait as long as five minutes before the elevator doors would open to emitt them.

Industrious people, however, usually those who rode to the fourth floor, did not waste their time while waiting. Sometimes they opened their mail, searched the bullentin boards for useful information, talked to others waiting for the elevator, or studied whatever books they had in their possession.

When the slow elevators became so frustrating that even veteran riders could not stand it, some students would even climb the stairs, but only as a last resort and always to have the elevator doors open as the first step was mounted.

Elevators seemed to have a big influence on student life. Only freshmen and transfer students knew little enough to try to catch an elevator at class change. Older, more experienced students, however, rearranged their lifestyle to fit around these inconvenient machines. Sometimes classes were even cut because passersby would tempt others who were waiting for the elevator with "Forget it; you'll never get there that way!"

A familiar sight around campus, this elevator is "temporarily" out of order, but that does not keep the desperate from trying the button.

Ah, the life . . .

by Deborah Morton

Ah, the life of an underclassman.

As a freshman, the perils of the core requirements eat away at your schedule. Even though you would like to take Deep Sea Snorkeling, your faculty advisor sternly tells you that you have to have Math 1020. Suddenly, you find that after eighteen years, you have to adjust to a new roommate, new (?) food, and the rigors of college education.

As a sophomore, you are pretty well adjusted to college life, but those core requirements still play havoc with your schedule. You have no doubt joined clubs by now and have a hectic academic life between dates.

Finally, your junior year pops up. This is your last year as an underclassman and you had better make it good. Those core requirements have been conquered and all that is left are major and minor requirements. Of course, with all those class projects, your social life is extinct. Do not despair, only one more year and you can date all you want (unless you decide to bail out and start early). By now, you have mastered the college life. Those late nights are not so bad and the food can keep you alive, not satisfied but alive.

(Ron Campbell)

(Matt Bowman)

A common experience for all ETSU students, this student searches for his textbooks in the University Bookstore.

One of the most popular programs at ETSU is the computer science curriculum. Students are attracted by the promising future of computers in every aspect of life.

Empty Post Office Box

by Tony Ruys

When I paid my post office box fee, I didn't know that I had rented the eternally empty post office box. Once, while checking my box for mail, I discovered a spider's web within its shadowed interior. I carefully closed the door and left it. At least the spider was putting the space to some good use. I suppose I can only blame myself. Mom always told me that you have to write them to get them. Things could be worse . . . my box could be filled with bills and traffic tickets.

The ETSU Campus Post Office is a familiar stopping place for every student longing for a little mail from home and friends. The friendly staff at the counter or hidden behind those little windows is ready to aid students and faculty in all aspects of mailing any sort of package or letter. They do everything any other post office does except deliver the mail to your door. Our little post office even has its own ZIP code. In addition to processing large amounts of incoming and outgoing mail every day, they also sort and deliver intra-campus mail to its proper little cubicles.

About the most common request heard by the campus post office staff comes from students who forget or lose their mail box combinations. Remembering my combination is never a real problem for me. I hardly ever have any reason to use it, anyway.

(Adrienne Lopez)

The most obvious disadvantage of campus post office boxes is the difficulty in opening them. Instructions for doing so are posted on most of the post office's walls.

Celebrating the Thanksgiving holidays, the University Bookstore displays home grown decorations and straw mannequins.

Shining ETSU's Shoes

by Tony Ruys

Think back to when you were younger and the only way you could get a good clean shine on your shoes was to do it yourself. You had to open a can of polish, jam your shoe on one hand and go to work on it with an old rag in the other hand. But that was before you came to college and had the chance to meet Ozell Carter, one of the nicest gentlemen who ever buffed a boot.

Mr. Carter can usually be found on the second level of the D. P. Culp Center, greeting people and working his magic with a brush and polish. His stand is located beside the lockers across from the University Bookstore, but Mr. Carter spends less time shining shoes than he does strolling around, talking with passing students, faculty, and staff. When Ozell arrives at work, he removes his coat and hat and pulls on a long, white apron over his shirt and tie. Along with his ETSU cap, the smile on his face is a familiar sight to those who pass through the student center.

Ozell Carter could be called a campus institution. He has been shining shoes for more than twenty years around campus, starting his occupation before most of us were even born. Ozell worked as a custodian in the men's dormitories before that. Originally from Cedartown, Georgia, Mr. Carter has resided in Johnson City for forty-five years.

In addition to being a master shoe shiner, Ozell is also a minister. Pastor of the Church of Our Jesus, located on 1409 East Fairview, Mr. Carter entered the ministry thirty-five years ago.

Ozell Carter might not get rich off of the hundreds of running shoes and canvas sneakers that walk past him each day, but there sure are a lot of students on campus who feel a lot richer by having Ozell Carter around.

"You can find something good in everybody if you look for it. Some people don't look for it."

— Ozell Carter

(Adrienne Lopez)

Ozell Carter prepares to give Matt Bowman's boots one of the best shines they will ever receive.

College: Shock Effect

by Greg Walters

College can be as joyous as one makes it or as horrorifying as one believes it to be. One must be prepared for the cultural shock of college and of higher education. A college student must be emotionally, economically, and socially prepared before a successful college life can be achieved.

Emotional stability is the most important. An entering freshman must be willing to break ties with the traditional concept of spelled-out education. Nothing is ever done for the college student. Paying bills, finding classes, meeting people, buying textbooks, researching material, or becoming involved are responsibilities of the individual. To handle these responsibilities, a student must be confident and have outlets for anger and frustration. The most vital resource a student can have is the knowledge that college is the place for him to be.

Once a potential college student decides that college is the place to be, the time for financial evaluation arrives. The best thing about college is the number of financial aid plans available. The lucky student is entirely financed by his or her parents, while others have to get all the aid they can. Work programs, scholarships, grants, and loans make college a viable institution for many.

The social stage of college life can be the most fulfilling. A student must become involved with the institution to understand it. Fraternities, sororities, and organizations of all kinds enhance social contact and make the student feel needed. A well rounded education includes the experience and drama found outside the classroom.

(Adrienne Lopez)

The atmosphere of successful college life can be felt at ETSU as exemplified by this peaceful scene.

The Final Week

by Brenda Crisp

The final week of school — a week for cramming. It was a week for cramming a whole semester's worth of information into one all night study session and of cramming an accumulation of "junk" from a dorm room into one car for the trip home.

Warm weather and end-of-the-year parties made exam week and studying more difficult than usual. After exams were over, most students wanted nothing more than to get rid of their books. The books that were sold back to the bookstore, however, were usually worth only less than half of the original price.

After selling their books, students then started the packing. After observing their empty dorm rooms and packed suitcases, students finally faced the reality of leaving school. Some would be back; others would never see ETSU again.

It was a week of wishing classmates good luck, a week of reminiscing, and a week of good-byes. Yet, it was also a week of pride. Another semester of college completed — for some, this was the best thing about the final week of school.

The Man With the Unique First Name

by Brenda Crisp

Dink Shackleford, a junior history major, calls himself a "macho-cripple." Some of his favorite hobbies are riding his Harley-Davidson motorcycle, deer hunting, and fishing.

He said that he enjoys riding his motorcycle to school until it gets too cold and then he drives his car. Finding a parking space this year was harder "because there are more handicapped people on campus."

During the spring, usually in March, Shackleford said that he "takes my bike to Florida for bike week."

Another hobby he seemed to enjoy talking about was cooking. "I resent being called a cook," he said. "I am a chef." He said his favorite dish is steak with his own "special sauce."

With such a unique first name, Dink, he said that the origin could be a story in itself. He said he was named after an uncle who died in a coal mine. He also said that he believes it is a German word that means "yard locomotive."

Although he has many friends here at school, he said he prefers to live alone in his apartment at Buccaneer Court.

When asked when he plans to graduate, he always gives the same reply, "probably."

(Matt Bowman)

Dink Shackleford, on his Harley-Davidson motorcycle, enjoys riding it during warm weather.

Scanning the Racks

By Brenda Crisp

The interest of many students was aroused by magazines, whether it be for the pictures or the articles. Some were looking for hairstyles, while some were looking for new fashions in clothes.

The slick GQ, for example, attracted women to the pictures, causing men to search for hints on sex appeal. Men also seemed to be more attracted to the "hobby" magazines, such as Auto Mechanics.

More women seemed to be switching from Seventeen to more sophisticated magazines such as Cosmopolitan, Vogue, Mademoiselle, and Glamour. These magazines offered advice on hair, makeup, new ways to get into shape, diets, and problems with men. All of these magazines seemed to cover a variety of topics to help cope with day to day situations.

The magazines that seemed to attract both men and women were the "gossip" magazines, ranging from People to the Soap Opera Digest. Whether or not the gossip was true, this was favorite way for people to "dig" into the private lives of their favorite stars.

An all time favorite magazine for the men of ETSU was Playboy. In this magazine men could find articles on political issues, as well as "fascinating art."

Whatever the magazine, they seemed to offer a quick "getaway" from classwork for almost all ETSU students.

(Randall Lewis)

These students "getaway" from the pressure of school for a moment by browsing through a selection of magazines.

A popular place to get fast pizza and sandwiches, Greg's Pizza is located in north Johnson City.

(Matt Bowman)

(Matt Bowman)

Open since September 1983, Bennigan's has fast become one of "the" places to dine and relax.

A large part of a college student's life is spent as a consumer, whether it be on campus or off. As a result, Johnson City and surrounding areas prosper, and as a way of acknowledging this, area businesses support ETSU and campus organizations by advertising.

Advertising is an essential factor of any business, and this section consists of sponsors of the Buccaneer. These are places where students shop, eat, and gather for good times. Memories of nights on the town and shopping with friends will last for many years.

Popular trends among students, from fashion to weightlifting, can also be found throughout these pages. Area businesses are happy to supply a student with whatever he needs to continue a hobby or to just be fashionable.

(Matt Bowman)

The ever popular Red Lobster continued to serve ETSU students the very best in seafood throughout the year.

Down in the Depths

By Tina Hughes

Scuba diving is becoming an increasingly popular sport in East Tennessee. If you are wondering where to scuba dive when we are located 400 miles from the ocean, you need look no further than your back door. This area has many lakes which provide interesting dive sites with a myriad of underwater scenery.

The course to become certified as a basic scuba diver consists of six to eight weeks of classroom lectures and pool training taught by a certified instructor. The course culminates in a written test and an open-water dive at a local dive site. Often a trip is made to Florida by the class to complete open-water dive requirements. During the certification dive, basic skills such as emergency ascents and buddy-breathing are demonstrated by the students while an instructor observes. After completion of the basic course, you may continue instruction and receive advanced certification and specialize in areas such as cave, ice, rescue, or night diving.

Classes are held by area scuba shops. They not only provide expert scuba instruction, but they also have a complete line of scuba equipment for the beginner and expert.

Area dive sites not only provide interesting and surprising scenery, but they can also prove to be a treasure hunter's paradise. Wrecked boats and cars are often found in this area.

(Greg Hughes)

Tina Hughes assists Marylin Seybold, an instructor at Smoky Mountain Divers, before a dive.

(Tina Hughes)

Greg Hughes surveys the water at Piedmont Quarry in Jefferson City, TN.

(Tina Hughes)

Scenes such as this at South Holston Lake provide popular dive sites for ETSU students as well as for other area scuba enthusiasts.

The weight room in Brooks Gym is opened to all students who wish to workout. In past years, an increasing number of women have opted for its use.

"I always enjoyed seeing a real muscular body," said Joyce Prince, a sophomore from Mountain City, TN, when asked why she chose body building as a hobby. Miss Prince has been involved with body building for the past eight months and reflects body building's movement away from a male dominated sport to one enjoyed by both sexes. During the past year, Johnson City sponsored a Mr. and Miss Johnson City body building contest. Miss Prince hopes to begin competing within the next year and loves the sport because "it's fun and it takes a lot of pressure off school."

While turning up the volume, Charlotte Patterson lets Lamar Sherman hear an inherent danger of portable radio headphones. Radio headphones and portable cassette players (better known as "walkmans") proved popular with students. Dancin' their way to class or groovin' during a lecture let the lucky student, lucky enough to afford one, enjoy his favorite type of music -- rock, pop, country, classical, or jazz. The average prize for a cassette player ranged from $59.95 to $99.95, and the headphones to go along with it cost an additional $9.95 to $19.95. The radio headphones seemed the better value at $17.95. Either way, students could enjoy the gift of music while studying their brains out.

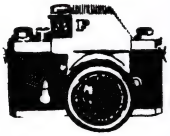
The BUCCANEER

Student Yearbook of East Tennessee State University

Upper Level D. P. Culp University Center

Phone: 929-4249



An extension of a tradition developed at ETSU this year. The Campus Activities Board sponsored an Organizational Fair Day for new and returning students to become familiar with the various organizations on campus. The Student Government Association sponsors a similar day annually during Homecoming Week, but the CAB decided to give students the chance to browse without the interruption of classes and other academic distractions by holding their Fair on August 24, 1983 — the day before classes started.

One of the most popular attractions of the Fair, students could dress as nineteenth century college students and have their pictures taken.

Student-run booths provide incoming freshmen and returning students with the opportunity to gather information and to discuss the various groups on campus with member students.

Terry Adkins strolls the grounds of the Fair as a nineteenth century policeman to ensure the student's safety.

(All Photos by Randall Lewis)

Some scenes at ETSU never changed, just the people in them. Year after year, students attended classes, cheered at ballgames, or ran the halls in the dorms. What made every year special was the individual . . . .

Athletic events are a special part of ETSU. This student's face reflects the concentration needed to follow the events on the football field.

Although the faces and uniforms have changed through the years, the band still keeps the music flowing.

The computer age may have revolutionized the art of registration, but students still find registering for classes tedious and time-consuming.

A Study in Style

by Tina Hughes

Fashion trends are constantly changing from season to season. For this reason, it can become expensive for college students to stay in style. Fortunately, new accessories and a few new pieces can update a wardrobe.

One of the more popular styles this year is the Flashdance look taken from the movie of the same name. This consists of large, cut-out sweatshirts and off-the-shoulder styles. For the more adventurous dressers, there are miniskirts in all types of material including leather. Classic wool suits are making a comeback this season, and the most popular ones have cropped, collarless jackets. A casual outfit is an oversize shirt belted at the waist and paired with blue jeans. Whether they are western-cut, baggy, stone-washed, striped, or designer, blue jeans are always favored with the college crowd.

One of the most popular color combination is black and white. Neutral colors such as gray, and muted tones, such as heather and lavender are also favorites. No outfit would be complete without accessories such as belts, hats, and hose in patterns and colors.

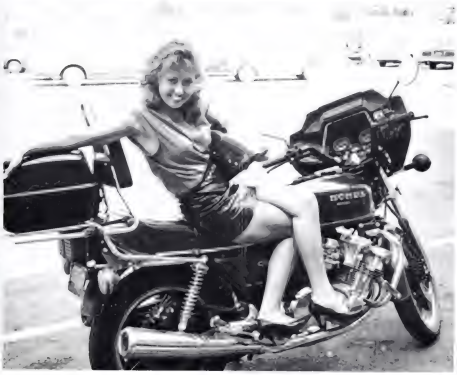
Even though these are some of the popular styles, each student has his or her own favorite outfits which they put together for a unique look. Fashion is often the whims of the individual.

Resting after a shopping spree, Debbie Wright proves that the sweater and skirt are still in the forefront of fashion.

Lisa Hester and Wally Cooper model two uses of the popular fabric wool.

Casual but dressy, Chris Prescott is dressed in the latest menswear.

East meets West — Lisa Kelley models a Japanese influenced blouse paired with a zip-up mini-skirt.



A classic combination — leather and motorcycles, Robin Cathey models the latest fashion in mini-skirts.

(All Photos by Ron Campbell)

As part of the Homecoming festivities paratroopers landed on campus.

(Doug Hilliard)

FINAL GLORY

By Deborah Morton

As May approaches, different sounds come to our campus than the ones heard in August.

The winds have turned from chilling gusts to warm, gentle breezes that cool sunbathers lying behind the dorms. The change in the weather can be seen in the changes in each sunbather's tan. Skin which started out white slowly turns a healthy, golden brown.

The flowers that were so beautiful in August have returned even better. They splash color across the campus as if some painter has gone mad, and in his madness created a masterpiece.

The squirrels seem so happy to be out in the warm sunshine after their long winter sleep. They catch up on their exercises, scampering from trees and benches across student's paths. They run around busily working at squirrel-work, never noticing all the people who continually notice them.

The students are beginning to long for their summer vacation, but realize the big obstacle they must pass before reaching it: Finals Week. Suddenly, books flip open, notes become important.

(Randall Lewis)

Jan Wolz and Kris Riddle found that moving in can be funny and painful. Smashed fingers are just a part of moving.

The trees outside Gilbreath Hall show the changes in seasons on campus. Tourists come for miles to see our mountain colors.

(Randall Lewis)

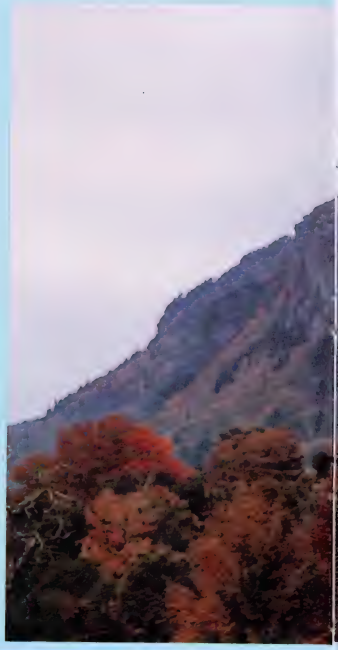
FINAL GLORY

Time slowly slips by and the sound of teachers dismissing their classes for the last time this year mingle with the "Good-byes" of friends who have met in class. Suitcases slowly begin to fill up with clothes to be taken home and the never-ending search for boxes speed up.

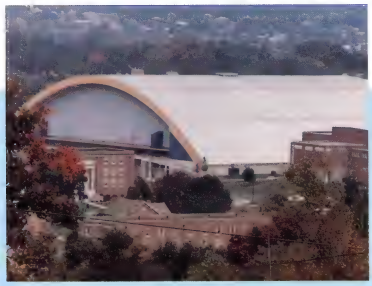
Roommates say good-bye to each other as they prepare for their trips. Some will never return to our campus; graduation or poor grades will have ended their college days. Graduates look the last time at their old hangouts before going to that new job in that new town. And, yes, eventually that last car door shuts as the last car of students pulls away, leaving our campus almost deserted once again.

Still, the mountains go on, the breezes blow, the squirrels attend to their business and the flowers bloom better and better. No matter where you go, you'll always remember how the mountains gave us their glory and always surrounded us.

You'll never forget the fact that you were part of the Mountain Glory.



Janet Snodgrass smiles at the crowd during a football game in the Mini Dome.



(Ron Campbell)

When the Mini Dome was built it was the only facility of its type east of the Mississippi. It now houses all indoor and most outdoor athletic events.

Just one of the mountains that surround upper East Tennessee, Grandfather's Mountain is a popular tourist attraction for students.

(Matt Bowman)

Colophon

Volume 72 of the East Tennessee State University Buccaneer was published by the Buccaneer staff and was printed by the Taylor Publishing Company in Dallas, Texas. All printing was done by off-set lithography in the Dallas plant. Paper is Glossy 80 pound stock. The cover consists of 160 point tempered board grained, embossed with gold metal-lay tool line and typography.

All photography was done by the staff photographers of the Buc-caneer, with contributing photos by the ETSU Photo Lab. The Mountain Glory photos were taken by Matt Bowman at Grandfather Mountain, Roan Mountain, the Beauty Spot, and Linville Gorge. The College of Medicine pictures were supplied by Biomedical Communication. Color photos were processed by ABC Color Lab in Elizabethton, TN, Empire Photos, and 1 Hour Photo, Johnson City, TN.

The primary typestyle is Palen-tino. Body copy is set in 12 point, captions in 8 point, and folios in 10 point type. Cover type was designed by Taylor Publishing Company and the cover colors are Blue 441 and Gold 919.

There were 4500 copies of the 1984 Buccaneer printed with 400 pages.

Silent Glory

The silence is stunning. Even our radio can't seem to fill up the emptiness with music. Our yearbook is finally finished.

The road to making the Buccaneer hasn't always been smooth. Deciding on a theme turned out to be an almost impossible task for Greg and myself. Then in the nick of time, a mutilated salad came to our rescue, and so folks, you have Mountain Glory.

I didn't believe they could, but things got worse.

After numerous staff reorganizations, we finally settled into the best staff in the world. But even the best is not perfect. We continually lost pictures and layouts; keeping a grease pencil handy was out of the question.

We began spending more and more time in our new "home." Out of exasperation Lin (my now sister-shadow) and I decorated the office with posters. When the guys on staff asked if they could bring posters too, I knew we were in trouble.

Soon now, even the posters will be taken down and "home" will become just another empty office.

But it hasn't been all bad. Lin and I found we could be pretty good photographers. Some staffers found they had great hidden talents; photographers began doing layouts and copy, people with very little experience suddenly became section editors and our staff artist found he had a latent tendency toward typewriters. Everyone worked hard and did a terrific job and each should be extremely proud of their work.

There are a few things we could never forget: the bird book, the butt book, finding Wilbur dead in the road, and, yes, all the dog jokes.

At the risk of sounding like someone who has just won an Emmy, there are a few people who deserve some thanks. Greg, thanks for being the best assistant editor that I could have asked for. I also thank Lin for everything she's done (too much to list here); Ron for his patience and understanding. Special thanks goes to Randall for giving me a sense of humor, perspective and helping me through the rough times. Without those, I would have been in a padded cell by now. One last thank you goes to the staff for making my job as easy as possible.

Now all we have to do is sit back and wait for the yearbooks to arrive. The office is slowly being cleaned up and everyone looks more relaxed, and yes, free time does feel good. But deep inside, it will be sad when we turn the lights out for the last time and lock our door.

Then, all we can wish for you is that you always have Mountain Glory in your life.
